Road Department Projects in Area Near Completion

Jackson County Engineer Robert Carstensen reported Friday that a number of road department projects are under way and nearing completion.

Grading work on the south fork of Little Butte creek rd. is under way.

Crews have finished clearing the right of way for the West Fork of Griffin Creek rd. Construction will start about May 1 after power and telephone facilities have been relocated, Carstensen said.

Crews have completed extension of the irrigation crossing on Pioneer rd., which will provide for future widening of the road.

Storm drain facilities are being installed at the county fairgrounds to eliminate standing water around buildings and to provide drainage from parking lots adjacent to the proposed health center site and the existing extension building.

Clean up of the fairgrounds area behind the county shop buildings has been completed. This will be leveled soon, Carstensen said.

Elk Creek rd. near Sugar Pine creek is being widened and graded. Fallen trees from last week's windstorm were cleared from Dead Indian rd.

Ashland Construction company, Grants Pass, has completed the fill for the Dry creek bridge on Rogue River dr., the county engineer reported.

Doctor Shortage Topic Of Program Discussion

"The Doctor Shortage" will be discussed by a group of physicians and surgeons on "Adventures in Medicine" at 1 o'clock this afternoon over station KBES-TV, kicking off a month-long physician recruitment project aimed primarily at high school juniors and seniors and their parents in this area.

Dr. Laurel G. Case, M.D., Donald McGoary, June Byers and Thomas Upton will explain the planned program of activity for April, when students at Medford High school, Phoenix High school, and Crater High school will be personally contacted by members of the Jackson County Medical Society in a pilot program of recruitment.

Plans for enlarging on the program to include other schools in the future also will be explained.

According to the U.S. public health service and medical authorities throughout the country, the need for more physicians is becoming an increasingly serious problem, with the situation being acute in some parts of the country.

It is estimated that the number of graduating physicians must be increased from the present 7,000 to 10,000 annually until 1975 just to maintain the present physician-population ratio.

Chester Irish, president of the Jackson County Tuberculosis and Health association, which sponsors "Adventures in Medicine," said high school students and their parents throughout the area are urged to see the program today, to learn more about the opportunities for students who might be interested in a medical career.
