HATCH YOUR OWN LIVE SEA CIRCUS

Just add water and you've got "INSTANT LIFE."

ONLY \$1.00

Yes, it's the living truth. In just 24-72 hours you can actually hatch a whole tumbling, playful, happy troupe of Sea-Monkeys (Exotic Sashachawan Brine Shrimp) that are more fun than a barrel full of monkeys. Both children and adults will laugh and thrill with wonderful excitement as you watch the comic antics of these fantastic underwater buffoons. Any minute of the day or night, you'll see them chase one another in a playful game of tag. The loser gets caught by the tail and is spun in a dizzy circle. See the "showoffs" turn cartwheels in the water... see the ticklish ones "scratch" each other's backs. Watch them swim singly or in graceful formation creating an underwater circus.

Watch the Miracle of Life

These genuine live sea animals commence life from seemingly inanimate powdergrains which actually remain alive for as long as EIGHT YEARS. And, these delightful pets are so tiny... only ONE HALF INCH LONG when full grown. You can raise an entire troupe in an ordinary glass jar using just tap water. It's so safe, just empty the package into a jar or fish bowl, add water and you have created "instant life." And, best of all, you'll have a whole new brood to give as gifts or sell if you wish.

Watch Them Obey Your Silent Commands

You can actually make these marvelous sea creatures behave like a bunch of trained seals as they follow a beam of light anywhere. Just darken the room and watch them follow a flashlight or candle beam forward, backward, sideways or around like a pack of happy kids playing follow the leader. So don't delay! Order now. Only \$1.00 plus 25c shipping charges complete.

Make Them Change to Any Color You Wish

We send you three colors of sea-monkeys! White, Pink and Red. These are NATURAL colors. Yet, with a tiny drop of vegetable food dye in their water, you can change the color of these little SEA MONKEYS as often as you wish. Make them blue, green, purple, yellow or any other hue or shade without harming them. And this dye will make their internal organs visible, enabling you to see how their life processes function! These sea scamps come to you from a landlocked salt sea in Northern Canada that is so barren, no other type of life can survive, yet is full of billions of these hardy creatures. And, these Brine shrimp are so simple to handle that even a 6-year-old child can raise them successfully.
