

### Organist Appears Tonight

An organ concert by Frank Stitt will be given at the Holly theater tonight at 8 o'clock. The event is sponsored by the Lusk Music company, and the public is invited to attend without charge.

Mr. Stitt, who majored in organ at the University of Redlands in California, is known to many Oregonians for he has played at the Oregon State fair the past several years. The concerts are given daily during the fair in the flower garden. Last year he was one of the organists to play on the large Baldwin organ in the Opera house during the Seattle World's Fair.

The musician was in service during World War II and following his discharge, he became the first Baldwin staff organist. He travels throughout the nation giving concerts, making television appearances and filling civic engagements; he also makes recordings.

John Lusk of the music company stresses that anyone interested is invited to attend the concert tonight.

Montague - Presentation of cash awards to winners of the "Clean-Up Montague" campaign essay and poster contest for school children, and an exhibit of the Pacific Telephone and Telegraph company were among the highlights of the last meeting of the Montague Parent - Teacher association held in the multipurpose room of the Montague school.

Mrs. Arnold Paul, vice president, conducted the business session in the absence of the president, William Frost. The essays were by pupils from the fourth through the eighth grades, and were in letter form written to the mayor of Montague and contained suggestions on how to clean-up, beautify and improve the city.

The campaign which started March 15 will continue through April 15. It is being conducted by the Shasta Valley Garden club with the endorsement of the city council and the Shasta Valley Improvement club. Private properties showing the greatest amount of improvement will be awarded prizes which are being provided by an anonymous donor.

**Winners Named**  
Winners in the essay contest were Susan Conroy, \$15; Christina Havens, \$10; and Ann Harrison, \$5. Honorable mention went to 15 others, each receiving \$1. The top winners read their letters.

various pieces of electronic equipment on display which showed the accomplishments of the telephone company in the past eight years. The exhibit included the new telephone designed to handle the new "all number" calling system, which is gradually being effected through the United States.

**System Explained**  
He explained that 20 years ago there were less than 23 million telephones in the U.S., and today there are more than 74 million, and by 1975 there may be more than 160 million phones in use. At this rate, the country needs more numbers than the present prefix system can provide. At present

## WORK SMARTER - NOT HARDER

By BERNICE STRAWN

That tired-all-the-time feeling seems to plague most mothers of small children. Have you ever made a time-energy budget for your particular "income" of both? It's just like spending money income. If you don't have a plan, you can't possibly come out even.

Give priority to most important jobs but be sure to save time for rest even if only a few minutes a day. A short rest is like money in the bank and pays dividends, too.

Brick fireplaces usually are due for a cleaning at this season. Use a 10 per cent solution of muriatic acid which you can get from the drug store. Scrub with a brush and rinse well with clear water. This acid will remove soot and white spots from rough brick. It can also eat holes in your clothes, so take precautions. Wear rubber gloves if you have them.

Overdrying of clothes in a

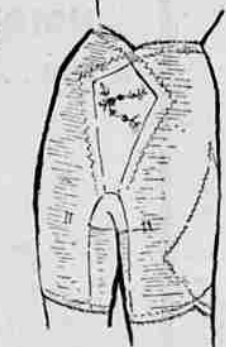

dryer is a common cause of wrinkling and static electricity in many manmade fabrics. If a garment has an elastic band, don't wait until the elastic is dry before taking it out. By this time, the rest of the garment will be overdry. Let the elastic finish drying outside the dryer.

Sprucing up for spring sometimes includes painting articles around the house which small children might chew on. Be sure you use a non-lead base paint. The National Safety Council says that lead poisoning is one of the most hideous of childhood afflictions. The fatality rate is extremely high - one in three children who are poisoned by lead die. And those that survive may suffer permanent brain injury. Use care in selecting paint for nursery furniture, play pens, tools, chairs and window sills. There is no really effective antidote for lead poisoning.
