Everest Expedition Ahead of Schedule

Katmandu, Nepal — (UPI) — The American Everest expedition has established camp four at 24,300 feet, more than a week ahead of schedule.

The expedition has three more camps to go before it begins consecutive assaults on the 29,028 foot Everest and the sister peaks Lhotse and Nuptse.

The group's timetable did not call for establishment of camp three until April 16. Each camp is a step closer to the assault point on Everest's southeast ridge. Camp seven will be at 27,900 feet.

Before starting the climb to the new camp, the group held a party at the 23,200 foot level to celebrate the birth of a daughter to climber Luther Jerstad, 26, Eugene, Ore. Jerstad, a University of Oregon instructor, celebrated the event with the American climbers and their Nepalese sherpas (high altitude porters).

And that's the trouble with modern living. You need hardly exert a muscle today unless you feel so inclined. And most of us don't—including our children, whose participation in healthful activities has dwindled until almost one-third of them fail simple physical achievement tests.

If we are to improve our children's physical abilities, they must become more active.

Our schools can do much to help them keep fit. It can be started with a program that costs little, that takes a minimum of 15 minutes of vigorous activity each school day.

But parents must urge and support such programs. Parents must make known their concern for youth fitness where it counts —with local school officials. Take it up with yours—right away!
