If you just get a lighting fixture when you buy a lighting fixture, you just aren't getting your money's worth!

Properly chosen and placed, a lighting fixture can be a mood setter; a peace maker (settling the argument, for example, over whether to read in bed or sleep); and a great make-up artist that brings out the best features both in you and in your room.

To find lighting like that you need much more than a salesman. The members of our staff are experts in their field. They know enough physics to make use of the strange properties of light rays. They know how glare and bounceback can make people edgy; how the right sort of diffusion can both flatter and soothe. What light does to color. What periods are compatible. And, in our showroom, they have such a full choice of size, kind and period (by famous Lightolier, of course)—they can use all they know to find just the right lamps and fixtures for you.

Come in soon. Discover the magic that proper lighting can perform for you.
