Tax Cut Coiffure Is Designed

To help swell a grass roots movement for the tax cut, one hair products firm has come out with the "tax cut" coiffure. The tax cut itself is indicative of the good times to follow. According to the company's research, it means more free money and more free money nurtures more elegant, intricate hair styles. The new haircut allows women to wear more feminine, highly sculptured coiffures without use of false hair pieces. The cut itself—like income tax is based on angles.

Makes Oasis

A small wooden stepladder, painted to match a room's color scheme, provides an inexpensive and unusual showplace for green plants. Placed near a window for lighting, and steps and top filled with a collection of small foliage plants, the stepladder becomes an interesting oasis of greenery in a family, or any other room, says the Society of American Florists.
