

# WORK SMARTER — NOT HARDER

By BERNICE STRAWN

"Ignoble toil" was the definition of housework given in an old dictionary. We're glad to see that Webster has changed his mind.

Awhile back most people thought women didn't need an education. And at times you may wonder why you ever bothered with schooling only to end up ironing shirts and scrubbing floors.

It's just for this seemingly dull routine that your education stands you in good stead and can help you bring creativity to the job. Make it a challenge to find short cuts to save time.

There's no time like vacuuming the rug to plan the meals for the next few days or concoct a casserole dish. While you're ironing, dream up how you can make over Aunt Martha's old coat for little Suzy or plan to induce the children to help with chores. In fact, think about any of the things you usually say you don't have time to think about.

To prevent mildew, treat clothing and household fabrics with a water repellent spray or a mildew-resistant finish. These products are available at drug and hardware stores, also at boat supply houses.

Many of these finishes are colorless and odorless, can be sprayed on cloth shower curtains (not plastic), draperies, blankets, seat covers. Carefully check directions on the bottle or can.

Mildew will grow on cotton, linen, rayon, silk, wool, leather, wood and paper. Many man-made fibers resist mildew. Wash or dryclean clothing before storing for the summer. Molds feast on starch so

don't starch any articles to be store.

"A red sock got in the wash!" This cry was heard from the other end of the telephone line. We told the caller to treat the once-white, now pink clothes with color remover, available at drug and variety stores. It worked, too! The directions are on the package. A few garments should be treated at a time, but not in the washer.

Your food bill can be lowered if you buy the grade of canned product for the use you make of it, advises Mrs. Zelma Neugart, OSU food marketing specialist. For instance, there's no use to pay a premium for canned whole tomatoes for a stew when broken pieces will do as well, and cost less. Sliced peaches will make just as good cobbler as halves and cost you about 10 per cent less.

## Children Should Know Older Folks

Urbana, Ill. - It is "unfortunate if children are denied the companionship of older people," says University of Illinois family life specialist, Marguerite Lynch.

Mrs. Lynch said that children often learn appreciation and respect for age early in life if they are encouraged to enjoy company of older persons.

An older person's relaxed attitude comports children who live in bustling young household, she said.

Older people also interpret the past and thus contribute to children's understanding of their heritage.

Here's the Tenderly Curled loaf ready for the oven. An extra step in baking gives the familiar fine Sunbeam recipe a final curling flip to squeeze out air pockets.

Ordinary uncurled slice at left lets air pass through to speed staling and drying out. The curled slice has finer, smoother texture, with no holes to let air rob flavor.
