Let's Draw a Jellyfish By Ann Davidow

Here's a creature soft as jelly,
Floating gently on his belly.

Dangling many arms, he wishes
Maybe he will catch some fishes!

Johnny Appleased By Ragna Eskil

He was born in New England in 1775. His real name was John Chapman, but history remembers him as "Johnny Appleased." Johnny Appleased was the name by which he was known to the early settlers of Ohio and Indiana in the days when that area was a great wilderness.

He was a most welcome visitor to the log cabins of these pioneers for he brought with him something that was dear to them from the homes and farms they had left behind in the Eastern settlements. Appleased! He carried a huge bag with him,

and in it he had thousands of appleaseds and tiny saplings.

When he'd come to a clearing, he'd plant some of his seeds and saplings. Perhaps he'd stay overnight with the grateful family living nearby, and there'd be talking, singing, and laughing. Then he'd go back time and again to see how his trees were faring, and when they bore fruit he'd take seeds from these apples to plant somewhere else. It is not surprising that stories and songs were written about him.

We should be proud of Johnny Appleased!
