

BO'S SISTER - Lorraine Belinsky, 20, sister of baseball player Bo Belinsky, will represent Trenton in the state finals of the Miss Universe contest, June 25. Miss Belinsky's brother was recently optioned by the Los Angeles Angels to its farm team in Hawaii but refused to report. She was chosen by representatives of the Miss Universe contest in eliminations last week. (UPI)

Gifts, Grants at University Total \$6 Million in Year

Corvallis—Gifts and grants to Oregon State university this past fiscal year totaled \$6,098,112, a 40 per cent increase over a year ago. Last year's total was \$4,381,118.

Dr. James H. Jensen, OSU president, said of the \$6,098,112 total, \$5,229,207 came from Federal funds and \$868,905 from other sources.

The major share of the funds, \$4,182,101 was for research. And the Federal government provided \$3,603,151 of this amount.

Largest single grant was \$950,500 for construction of the OSU Marine Sciences Laboratory on Yaquina Bay. The grant came from the Area Redevelopment Administration.

The \$6,098,112 was divided as follows: \$4,182,101, research; \$484,826, institutes; \$559,590, construction; \$14,000, overseas training; \$294,283, scholarships; \$5,873, student loan funds; \$92,284, books, supplies and equipment; \$49,678, advancement of teaching; and \$13,477, miscellaneous.

Funds Available
In addition to the \$5,873 in student loan funds given to OSU outright, more than \$450,000 was made available on a "borrowed" basis by the National Defense Education Act, United Student Aid Fund, OSU Dads Club, and Phi Kappa Phi, scholastic honor society. The funds are not included in the annual gift and grant total.

Research grants were received by OSU's Science Research Institute, the agricultural and forestry research divisions of the Agricultural Experiment Station, the Engineering Experiment Station, and many of the teaching departments.

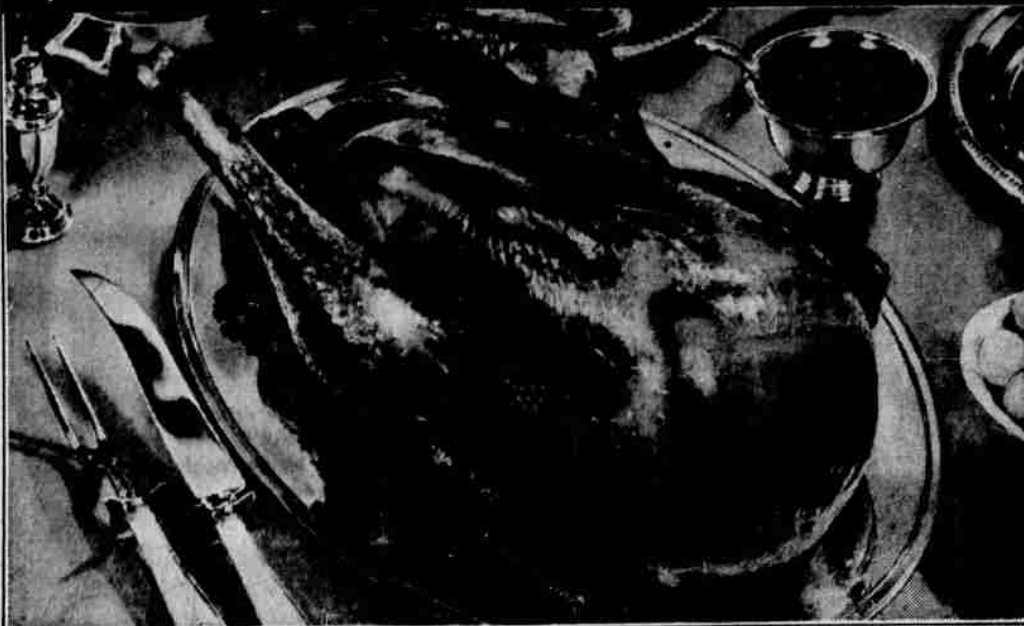

Various research projects engaged in by OSU scientists last year include cancer, solid state electrolytes, heart muscle tissue, metabolism or aerobic bacteria, preservation of wooden poles, oil sprays on pears, embryo development of Douglas fir seeds, onion root disease and tree fruit fungi-cides.

Port, Sherry Have Basic Needs, Claim
Naples, N.Y.—(UPI)—There's more to that glass of sherry or port you quaff than you may think.
Modern wines, according to researchers at Widener's Wine cellars here, contain, in some degree, all 13 of the elements considered by some scientists necessary for maintenance of human and animal life.
They are calcium, phosphorus, magnesium, sodium, potassium, chlorine, sulphur, iron, copper, manganese, zinc, iodine and cobalt.
