State Police Check Four Accidents During Week End

State police this morning reported four accidents occurred on Jackson county highways this week end resulting in minor injuries. Saturday night two Ashland men were injured on the South Pacific highway at the Lithia Drive-in theater in a two car collision.

Lawrence Demont Oviatt, 28, of 275 Mistletoe rd., Ashland, the driver, and his passenger, Raymond Lawrence Shafer, 25, of 455 South Mountain ave., Ashland, received minor injuries when the Oviatt car collided with a car driven by Elden Jane Root, 23, of 332 DeBarre ave., Medford. The Root car was attempting to make a left turn when hit, state police said.

Three Glendale, Ore. youths, Thomas Allen Fatchet, 18, Hubert Freeman Stewart, 17, and James Dwight Chitwood, 17, received minor injuries in a one car accident on Interstate 5 freeway near Rogue River Sunday.

Police said the driver, Robert George Young, 18, Glendale, apparently fell asleep. The car went off the highway and rolled over.

Summertime employees of the U. S. Forest service at Prospect, Norman Faller, 18, Charles Dunford, 19, and John Forstfar, 19, all Portland, and Paul Bibler, 18, Houston, Tex., all received minor injuries in a two car head-on collision on the Crater Lake highway near White City Sunday.

The driver, Walter Ward Summers, 19, Fair Oaks, Calif., also received minor injuries, police said.

State police said a car driven by Willard James Ayers, 19, of Crater Lake highway, Eagle Point, struck the Summers car head on.

Mary A. Rhoten, 41, of route 1, box 131A, Rogue River, received a possible broken arm and was taken to the Rogue Valley hospital by Medford Ambulance Service following a two-car accident Sunday on Beall lane, about 1 1/2 miles west of the South Pacific highway.

State police said she was a passenger in a car driven by Merle Vivian Houston, 61, route 1, box 320, Central Point which made a left turn in front of a car driven by Noble D. Robinson, 55, of 307 South Fifth st., Jacksonville.

No injuries and only minor damage resulted in a car-motorcycle head-on collision on Tolman Creek rd., south of Ashland, Sunday, police reported.

Bruce David Plankenborn, 13, of 920 Wilson rd., Ashland, on a motorcycle crossed the centerline as he rounded a curve and struck the pickup truck driven by George B. Williams, route 1, box 496A, Talent, head on, police said.

Londoners List Top Tourist Areas In United States

By MURRAY J. BROWN New York - (UPI) - What are the most popular tourist attractions in the United States? Maybe you'll be surprised.

An advertisement listing "50 of the places Americans themselves most want to see in the U.S.A.," was published recently in a London newspaper.

It was run in connection with the world-wide program being conducted by the U.S. travel service of the Department of Commerce to promote tourism to America.

The ad noted that the list was drawn up to help Britons planning a holiday on the other side of the Atlantic. It said that each state was asked to name "one of its most popular tourist attractions."

The list, in addition to the state-by-state nominations, included as an "added attraction" the White House in Washington, D.C., where it emphasized that "many of the fascinating sights are free."

Congress, the Supreme court, the National Gallery of Art and the Smithsonian institution.

World Famed Many of the places and sights included in the listing are world-famed tourist attractions. But there are other "most popular places" for tourists that may come as a surprise to many Americans.

Here is the ad's descriptive list of the 50 "most popular places" state by state:

Alabama: First White house of the Confederacy at Montgomery.

Alaska: Mt. McKinley, highest mountain in North America (20,320 feet).

Arizona: Grand canyon.

Arkansas: Eureka springs, a spa in the Ozark mountains.

California: Yosemite National park.

Colorado: Aspen, ski, fish, hike and enjoy chamber music.

Connecticut: Seaport and Marine museum at Mystic.

Delaware: Henry Francis DuPont Winterthur museum near Wilmington.

Florida: The Everglades swamp, wild life refuge.

Hawaii: Hawaii Volcanoes National park.

Idaho: Craters of the Moon National monument.

Illinois: New Salem state park.

Indiana: Indianapolis Motor speedway.

Iowa: The Amara colonies, early religious settlements.

Waste Utilization Problems at Mills Studied by OSU

Invited by representatives of the Medford lumber industry, three officials of Oregon State university were guests in Medford on June 21 for a tour of sawmills of the area.

This program is another step in the efforts of Medford mill operators to solve the problems peculiar to their area in wood waste utilization and disposal.

The great varieties of timber processed and the problems encountered make normal procedures used in other areas impractical for Medford.

George E. Thornburgh, department of mechanical engineering; Martin E. Northcraft, department of civil engineering; and Leif Espenas, Forest Products laboratory, attended a meeting where slides were shown and results explained.

After lunch the tour was completed. It was generally recognized that special technical assistance would be necessary to combat problems of the area. The Medford mill operators agreed to make their plants available and support the project financially.

Although thousands of dollars and considerable experimental efforts have been expended by Medford area sawmill operators with a marked improvement in conditions, they recognize the need for still further improvements.

It is believed the technical assistance from Oregon State university engineering department and Forest laboratory will offer additional information leading to the solution of the existing problems.

After lunch the tour was completed. It was generally recognized that special technical assistance would be necessary to combat problems of the area. The Medford mill operators agreed to make their plants available and support the project financially.

English Language Popular in Japan

By ISAO ZAMOTO Tokyo - (UPI) - With the Tokyo Olympics coming up in October, 1964, the Japanese people are showing an ever-increasing interest in the English language.

The current enthusiasm for English may be compared with that during the early years of the Allied occupation in Japan.

In Tokyo, three television stations air English lessons for half an hour every morning and night from Monday through Friday. One radio station broadcasts 15-minute English lessons twice a day.

Many books on English conversation have been published one after another in the
