

**FARMER'S PROTECTION** — Mosquitoes are making life so miserable for farmers in Williamson County, Illinois, that Loren Nolen, Stonefort, Ill., won't venture into the fields for a prolonged period unless he is wearing a wire mesh hood along with

overalls, leather jacket or raincoat, and gloves, even in 100-degree weather. Some farmers have considered selling out and a bill has been introduced in the Illinois Legislature to appropriate \$10,000 to deal with the mosquito problem. (UPI)

### Festival Opens Area Box Offices

Ashland — Twenty-eight branch box offices in Oregon and northern California will again offer Oregon Shakespearean festival patrons instant reservation service.

The 1963 network, now in operation, links key population centers from Portland to Palo Alto, maintaining a direct telephone wire contact between each location and the theater's central box office in Ashland.

According to General Manager William Patton, ticket orders placed through branch agencies have gained steadily since the plan was launched in 1958. Each of the offices is located in a business firm. The local agent, by using the direct telephone circuit, can immediately determine the best seating availabilities for all performances.

The 23rd season at America's First Elizabethan theater begins July 24, with performances continuing nightly through Sept. 7. Rotating on the main bill are "Merry Wives of Windsor," "Romeo and Juliet," "Love's Labour's Lost," and "Henry the Fifth." Branch offices are located in Barrett's Stationery store, Grants Pass, Mann's Department store, Medford, and at Bigfoot Ranch lodge, Klamath River, in this area.

### Tax Equalization Problems Noted At Group Meeting

Ray Barker, head of the commercial division of the Jackson county assessor's office, recently spoke before the Jackson County Property Owners Rental association, discussing the various problems of tax equalization as they affect rental income.

#### Autoists Should Exit To Sidewalk

Chicago — (UPI) — The automobile driver and his passengers always should leave the car from the sidewalk side, advises the Chicago Motor Club. Opening your door in traffic not only could cause a passing car to hit you, but could cause an accident when it swerves to avoid your open door.

Canned fruits taste better if they're opened and placed in a bowl and kept at room temperature one hour before using.

methods of tax appraisal and explained that the capitalization of income method is little used in Jackson county because of the lack of information available to the assessor's office for effective use.

Barker urged the association to make a comprehensive survey based on income from rentals for usage by the assessor's office as a means of aiding in tax equalization and possibly affording some relief to rental owners.

#### Appointed Chairman

Wally Iverson was appointed chairman and co-ordinator to organize committees to work on the needs of the association. Iverson will contact members to work on the committees with him. Anyone interested in helping with this work may call Iverson since there are many committees which can aid association members to lower operating costs and raise rental income without being forced to raise rents.

It was decided that three work committees will be active during the summer months and until fall there will be no formal general

meeting of the association. All rental owners interested in the organization, whether members or not, may contact Iverson to express their views.

#### SIGNS WITH WARRIORS

San Francisco — (UPI) — Steve Gary of St. Mary's, Calif., has signed his 1963-64 contract with the San Francisco Warriors of the National Basketball Association. Gary was the Warriors' No. 3 draft choice.

New stainless steel wall tiles with decorative finishes don't show scuffs, scratches, fingerprints or other smudges, the manufacturer reports.

Evaporated milk makes an emergency glue for a stamp or label.

## America says, "That's for me!"

F-85 OUTLASS CONVERTIBLE

# Going OLDS is the Going Thing!

Olds fever is taking America by storm... and here's one of the handsomest reasons why: The captivating F-85 Cutlass!

Sensational V-8 action and quicksilver agility both figure in this bucket-seat beauty's record-breaking popularity.

So why not join the nearly 1,700 buyers a day who prove that going Olds is the going thing! You may lose your heart... but you'll discover one of '63's biggest thrills!

FREE 88-PAGE RAND McNALLY ROAD ATLAS—get yours at your Olds Dealer's while supply lasts!

### Small Worlds Around Us

By LYNN M. WATKINS

(Register and Tribune Syndicate, 1963)

#### Indian Children Taught That Clouds Are Pictures In Sky

"Up there the clouds feebly in the sky. By night and by day they are there. Even when we don't see them they still are present." Not in those words, but others of like meaning does the Seminole Indian mother explain to the children the constant and everlasting cloud formations that occur in the blue vault of the sky over the Everglades. The little black eyes of Indian children gaze with simple fascination and listen while their elders explain the meteorological phenomena. Not the scientific explanation of ascending air currents, convection, vaporization and condensation; of strata or jet-stream or cumulus or cirrus. Such things would be of little interest to Indian children of tender age. The children see only shapes of birds, trees, canoes, and leaping deer.

#### Thunder Is War-drum

Sky-shapes change from minute to minute. A great war canoe filled with warriors, brave and strong, sails across a never ending ocean of tranquil blue. The children clap their hands when they see the sky shapes tumble and roll and hold their ears when the thunder rolls across the swampland. For them, they are war-drums or the voice of the thunder is the scolding of the Great Spirit. The children whisper to themselves that they will be very good if "the one with the heavy step will go away."

Best of all, the children like the sky shapes when they are white and puffy and make no noise at all, but slide along and change their shapes. Sometimes it looks like two cloud shapes would run into each other. The children listen to see if there is a noise when the masses collide and are maybe a little disappointed when one cloud melts into another. To small minds, it is very confusing. Funny too, that no matter how long they look they can never find two clouds alike.

#### Looks Longingly

To the little children, the changing cloud forms are not images or portraits of things that come but shapes of things that have been. Every Indian child looks longingly for his or her favorite picture to appear on the canvas of the sky. The most desired shape is that of a great dugout canoe, manned by many warriors; their head-dresses dancing, sailing the skyway, for the elders have told the children that below the sawgrass, below the line of trees and far away, are the great waters stretching away forever.

"It is one of the wonders my eyes have beheld" said one of the wise tribesmen who had traveled far and seen many wonders, "a great water, larger than all the swampland so big it and the sky are one. Over it sail ships as big as a 'hammock' on which the Indian village stands, on the boat the white men, coming the same as my forefathers tell about many summers ago."

#### In Darkness Too?

And the Indian children look and listen at these fantastic stories, told by one who has seen the things he tells about. No wonder the sky-shapes are so wonderful, for they come from over there and go nowhere. And when darkness flows over the swamp, like spilled berry-juice on a white deerskin, and the only light comes from the campfire, the children wonder if in the darkness too the sky shapes march overhead.

When lightning flashes light the clouds by night, Seminole mothers tell the little ones, "The great firefly walks to-

### Space Program Reduction Expected

Washington — (UPI) — Chairman George P. Miller (D-Calif.) indicated today that his House Space committee probably would vote to cut nearly \$500 million from next year's civilian space program.

The committee begin consideration today of the \$5.7 billion President Kennedy has requested for the National Aeronautics and Space Administration for the fiscal year starting July 1. Miller has been a strong supporter of the administration's space requests. But he indicated he felt his committee would pretty much go along with the judgment of three subcommittees that spent several months going over the space budget item by item.

"I assume that the committee members will defer to their colleagues who have gone into so much detail and know so much about the individual programs," Miller told a newsman.

### Bassett Escapes Injury in Mishap

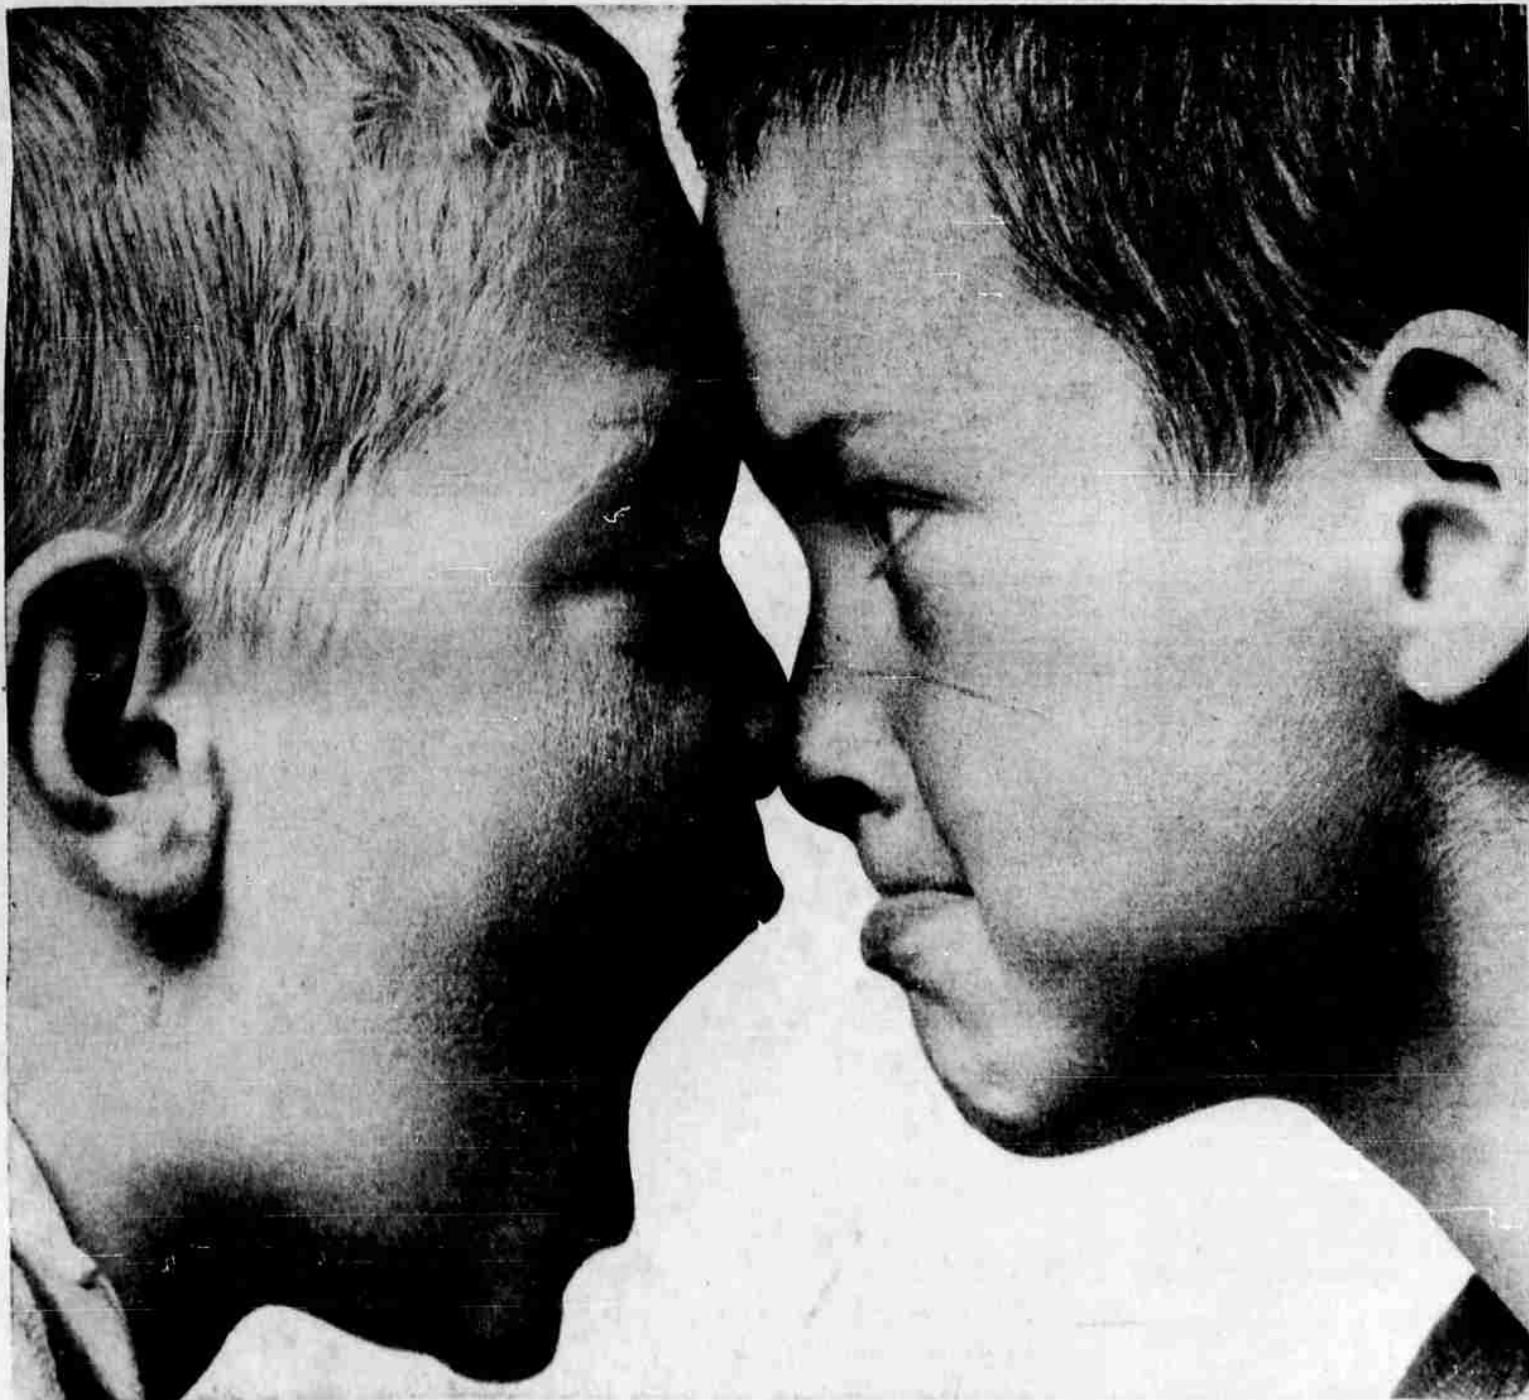

Happy Camp — Walter Daniel Bassett, 36, 1411 Prune st., Medford, escaped injury when the truck he was driving was involved in a collision with an auto driven by Ernest A. Snapp, 30, of Etna, on the Klamath River highway 11 miles northeast of Happy Camp Saturday night.

Peter Selby of Yreka was incorrectly identified as the driver of the truck in Monday's Mail Tribune.

Snapp suffered a broken leg and chest injuries in the accident and was confined to Siskiyou General hospital.

**BIRTHDAY PARTY**—Mary Livingston claims she's much younger than husband Jack Benny's unchanging 39, and she holds a candy-coated 21 hand to prove it. She and Benny celebrated her birthday in Las Vegas this week. (UPI)

Sometimes children should be seen...

and not heard.

Small boys' arguments are seldom serious. But the confusion they create can be, particularly if you have some important telephoning to do. The most practical way out is a bedroom extension. In addition to all that well-earned privacy, you'll save stairs and steps in the daytime, enjoy a priceless feeling of security when you're alone at night. Order your bedroom phone today. Call the telephone business office and ask for Beverly, the Extension Girl.  PACIFIC NORTHWEST BELL
