Taped Recordings Serve As Remembrance of Trip

When your family maps out summer vacation plans which includes the wheres and when but also what to take and what to leave behind, a helpful tip is to carry along a small battery-operated tape recorder. Coupled with a little ingenuity, the tape recorder can capture new adventures and sounds to serve as remembrance of your trip.

Most portable tape recorders come with two speed, one and seven-eighths inches-per-second and three and three-fourths inches-per-second and take three or three and one-fourths inch reels. The slower speed is fine for voice, the faster speed does a creditable job in reproducing AM music and tonal sounds.

According to the 3M Company, makes of "Scotch" brand recording tapes, here are some ways in which to utilize a portable tape recorder during vacation.

While planning your travel route, tape record road directions, turns, names of towns and places you intend to stop. This eliminates forgetfulness, prevents traffic jams while looking for road signs and possible disagreements with the law. If you have mechanical difficulties with your car,

tape record any unusual knocks or noises. These can be played back for the mechanic's benefit and diagnosis.

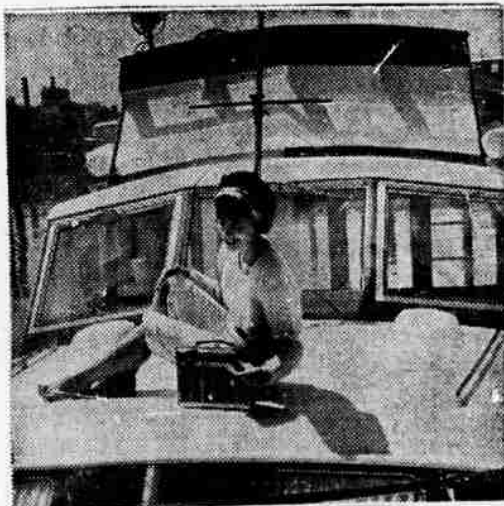

Once at your destination, tape record nature sounds rushing waterfalls, carnival barkers' pitches, zoo animals, outdoor concerts, weather noises, your family's reaction to historic landmarks or picturesque views. At vacation's end, the tapes and any sound effects you might like to add can be incorporated into a sound track for your home movies or slides.

MEN GROW ROSES

While cut roses are given to women as flowers of love, more men than women grow roses in home gardens. Man-wife teams grow more than either men or women separately.
