Seat belts in your car are life savers.

But only if you use them every time you drive—even though you're going only a few blocks or miles.

Because traffic accidents happen without warning, and more often close to home than away on a trip. In fact, 2 out of 3 traffic deaths occur within 25 miles of the victims' homes.

And do seat belts work? They certainly do. The National Safety Council's statistics show that if *everybody* had seat belts *and used them*, at least 5,000 lives could be saved each year, and serious injuries reduced by one-third.

Be safety wise. Join the millions who have had seat belts installed, *and use them*. Every time you drive, buckle up for safety!

With seat belts, you "stay put" . . . with a Margin of Safety between you and serious injury.

Without seat belts. When your car stops suddenly, *you* are flung forward with tremendous force.
