Family's Third Child Born at Air Force Base

Mother, Infant Said Doing Well

Otis AFB, Mass.—(UPI)—Mrs. Jacqueline Kennedy, wife of the President, gave birth today to a 4-pound 10-ounce son at the Otis Air Force Base Hospital.

The baby, five and one-half weeks premature, was born at 10:15 a.m. (pdt) while the President was en route from Washington by jet.

Presidential news secretary Pierre Salinger reported that the baby's condition was "good" but that he was placed in an incubator. He also reported that Mrs. Kennedy was in good condition.

The child was the third born to President and Mrs. Kennedy and their second son.

Salinger reported that Mrs. Kennedy went from the Kennedy family near Osterville this morning. However, she returned home immediately and Dr. John W. Walsh, a Washington obstetrician who has been staying in the area, was notified while she was still en route home.

The baby was born by Caesarean section as were the other two children.

Goes to Hospital

Walsh was at the Kennedy house on Squaw Island off Cape Cod when Mrs. Kennedy arrived. He decided immediately that she should go to the Otis Air Force Base hospital.

Mrs. Kennedy left the house by helicopter, accompanied by Walsh, for the trip to the hospital. She was taken to the surgery ward immediately.

The President, still at the White House, was notified by telephone that his wife had gone to the hospital. He left the White House within minutes by helicopter for Andrews Air Force Base and the jet flight to Cape Cod.

Baby Delivered

When he arrived at the hospital, the baby already had been delivered 25 minutes earlier. Awaiting the President was his sister, Mrs. Stephen Smith, at the hospital.

Assisting Walsh, who also was the obstetrician when John Jr. was born Nov. 25, 1960, were Col. Paul H. Stavig, Sioux Falls, S.D., Maj. Frank Mahon, Panama, Okla., the anesthetist, Capt. William Jablonski, Boston, and Maj. Leonard Cobb, Longview, Ill.

Mrs. Kennedy is the first President's wife in 70 years to give birth to a baby. The last White House baby was born on Sept. 9, 1893, to Grover Cleveland.

Demo Committee Favors Convention

The Jackson County Democratic Central committee has gone on record favoring a party platform convention to be held in February, 1964, prior to the primary elections, it was announced today.

The action was taken at Tuesday night's meeting of the central committee.

Purpose of the convention will be to draft a local party platform to be submitted to the State Central committee for its approval and possible inclusion in the state platform.

Mrs. Davis was the daughter of the late Eastern Oregon and Idaho cattleman Gus Davis.

Several travelers' checks were in the room, along with other items including receipts of several purchases made in Eastern Oregon and Idaho amounting to several thousand dollars, police said.

Mrs. Davis arrived from Payette Sunday afternoon.

A brother-in-law, Robert Rose, in Payette, said the woman had apparently come to Portland for a few days vacation.

Mrs. Davis was divorced several years ago from Robert Solomon and had two sons by the marriage, relatives said. They said she had assumed her maiden name following the divorce.

4 Big Six Plants Resume Operations

Portland—(UPI)—Some 14,000 men began returning to work at four Big Six employers' bargaining associations in lumber companies in the Pacific Northwest today.

Two striking lumber unions agreed Tuesday to put their men back on jobs at Weyerhaeuser, International Paper, Crown-Zellerbach and Rayonier plants in Oregon, Washington, California and Montana.

An estimated 20,000 men were idled at the Big Six plants in four states. Another 6,000 are out on strike against other companies in the region including Georgia-Pacific Corp.

BUILDING STARTS—Installation of six temporary classrooms at Medford High school started recently. Here district workmen are preparing concrete blocks which will hold the buildings. They are scheduled to be ready early next month when school starts.

Zuckert Reveals Six Classrooms Are Being Installed at Local High School

Washington—(UPI)—Air Force Secretary Eugene M. Zuckert disclosed in testimony made public today that 11 members of Congress contacted him about the TFX fighter plane program before the huge program was awarded last Feb. 24.

Zuckert supplied the list of names at the request of the Senate permanent investigations subcommittee. Sen. Henry M. Jackson (D-Wash.), a member of the subcommittee, was one of those on the list.

In providing his personal office log of visits and telephone calls made between Jan. 17 and October of last year, Zuckert also listed contacts made by officials of the contractors then engaged in fierce competition for the multi-billion dollar award.

These included four visits by officials of General Dynamics Corp., two by Gruman Aircraft Co. and three by Boeing Co. officers.

The subcommittee, which has raised conflict of interest issues several times in its five-month-old investigation, is inquiring into why the award went to General Dynamics, instead of Boeing Co.

Eventual cost of the contract for a changeable wing supersonic fighter—one of the largest awards in military procurement history—is expected to exceed \$7 billion.

The log showed that members of Congress from Washington state, home of losing bidder Boeing, and delegations from Kansas, where Boeing has a large Wichita plant, made several contacts.

A member from Texas, location of Dynamics' Ft. Worth plant, also showed up on the list.

The Talent city council last night decided to go along with an offer from the Southern Pacific railroad, under which the city and the county would share the cost of the warning device equally.

City Attorney Richard Cottle told councilmen that a Southern Pacific representative had approached him with the 50-50 offer, the city's share of which would amount to between \$5,000 and \$6,000.

Cottle said he had investigated previous agreements between cities and Southern Pacific on financing of signal devices and had found no instances in which a city paid less than 50 per cent of the cost.

The council decided to accept the offer providing that its share of the cost could be paid over a two-year period.

PLANT DESTROYED—Portland—(UPI)—Fire destroyed the one-story Luderbach Industries plant here today, causing some \$55,000 damage. The firm manufactured water skis.

Rusk Predicts Support for Treaty—Moscow—(UPI)—Secretary of State Dean Rusk predicted today the nuclear test ban treaty he signed with Britain and the Soviet Union Monday would receive "great support" in the United States.

Rusk saw off a senatorial delegation and then flew to Leningrad for a day's break between his talks on further cold war issues with Soviet officials. The senators, here for the signing, were returning to Washington.

The senators were equally enthusiastic about the partial test ban treaty, the first control measure agreed upon between East and West since the start of the nuclear age 18 years ago. They said U.S. interests were "well protected" by the pact.

Haiti Demands OAS Take Action On Aggression

Serious Turn in Developments Seen

Port au Prince, Haiti—(UPI)—Haiti today protested a second time against Dominican aggression in a note to the Organization of American States and demanded that body take immediate action to halt it.

The new Haitian protest coincided with the dispatch of three plane loads of troop reinforcements from Port au Prince to Cap-Haitien in the officially labeled northeast "war zone."

The troops carried light and heavy machineguns and other combat equipment. They traveled in Haitian army troop carriers.

Serious Turn Hinted—The new Haitian protest to the OAS hinted at a possible serious turn in military developments in the northeast. The original Haitian protest, taken up by the OAS Tuesday, did not ask that body to take any action.

There was no indication how many troops were airlifted to the front today but it was speculated that anywhere from 35 to 50 were aboard each plane.

Rumors circulated in Port au Prince of a new exile landing at Grande Saline, on Haiti's west coast, but this was believed to stem from exile claims to that effect made in New York Tuesday.

In Santo Domingo, exile spokesmen claimed their invasion troops were pushing a two-pronged drive into the Haitian northeast, picking up support along the way from army deserters and the peasantry.

Paul Vernas, general coordinator of the Haitian National Democratic Union backing the invasion, said the rebels "have cut off the northern department" of Haiti from their drive to topple the autocratic regime of President Francois Duvalier.

Trial Dates Set For Two GP Men—Grants Pass—Trial dates for two Josephine county men charged with first degree murder were set Tuesday by Circuit Judge James M. Main of Medford, presiding temporarily in Josephine circuit court.

Judge Main set the dates against overruling a demurrer against the grand jury indictment of the two men.

Gerald Richard Oden, 25, of Wolf Creek, represented by Robert A. Boyer of Medford, will be tried Sept. 5.

Norman Stewart Thomas, 22, of Grants Pass, represented by Charles A. Telfer, Grants Pass attorney, will go on trial Sept. 17.

They are charged in connection with the death of Lloyd Harper July 12.

Jantzen Beach Concession Closed—Portland—(UPI)—An amusement concession at Jantzen Beach Park here was ordered closed by the Multnomah county sheriff's office Tuesday. No arrests were made.

Deputies advised manager Jerry Macke of Vancouver, Wash., that a 25-cent-a-chance fish pond appeared illegal under a 1937 state law.

Dist. Atty. George Van Hoomissen Monday night closed down seven amusement concessions at the Multnomah County Fair at Gresham under the law.

Van Hoomissen said he believed the games were being operated as games of chance.

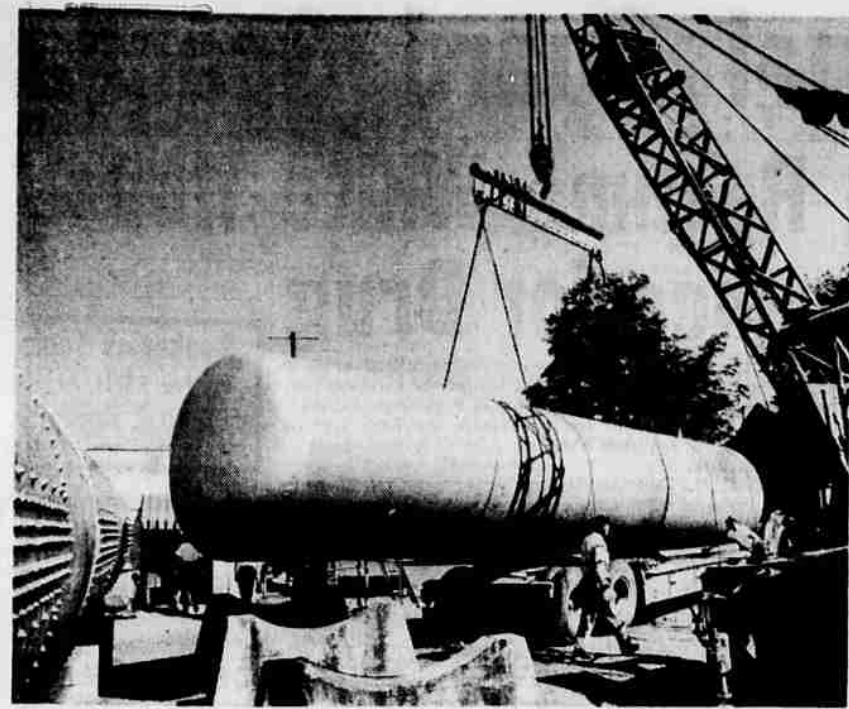

Request for Lower Speed To Be Considered—Jacksonville—This city's request for a 15-mile-per-hour truck speed limit will be considered by the state highway commission Sept. 5, the Jacksonville city council was notified last night.

The council had requested the lower speed for trucks in order to reduce the hazard posed by trucks traveling on Highway 238 through the city.

CREW DISPATCHED—The Star Ranger station Inter-Regional fire suppression crew left by plane at 5:30 o'clock this morning to several forest fires in the Caldwell, Idaho, area.

GAS TANKS MOVED—The California-Pacific Utilities company is clearing the area at Front and Second sts. for the installation of a regulator station for natural gas. This involves removal of six giant tanks which served the "gas-air" plant, built in 1935. The first three were taken out Tuesday. The tank in the photo has a capacity of 15,000 gallons of butane gas. The third tank constitutes a real problem, according to Murray S. Gardiner, district manager. It holds 27,000 gallons. M. C. Lininger and Sons are using a 30-ton Lorain crane to do the job. The tanks are being hauled to the Naumes Equipment company, where they will be used for storage of heating oil.

Coos Bay Man Killed by Police During Gun Fight

Coos Bay—(UPI)—Amos Gibson, 39, was shot and killed by police Tuesday after abducting his estranged wife and leading authorities on a bullet-punctuated chase in a hilly area south of here.

His estranged wife, Kathy Gibson, was treated for shock at a hospital but was otherwise uninjured. Gibson was killed in an exchange of shots with deputy sheriffs Dave Tankersley and Spencer Gaston who located him after a search of nearly three hours.

Authorities gave this account: Mrs. Gibson returned from a trip to Idaho and sought to visit her children. Gibson refused and, according to Mrs. Gibson, threatened to kill her. She fled his home and was walking in downtown Coos Bay with her mother when Gibson drove up in a car.

Mrs. Gibson said he fired at her mother and then forced her into the car. They drove to his home. Tankersley and Gaston arrived with a warrant for his arrest.

The officers came upon the couple and ordered Gibson to drop his .30-30 carbine.

Shots were exchanged and Gibson fled up a hill into heavy underbrush, forcing his wife with him. The officers radioed for help.

State and city police joined deputies and, for nearly three hours combed the hills. Shortly before 7 p.m. Tankersley and Gaston came upon the couple. They said Gibson first fired at his wife, missing her as she ducked behind a tree. Gibson then was killed in an exchange of shots.

Gibson, a farmer, lived in the Boise addition south of here.

Christine Keeler Target of Barrage—London—(UPI)—Women booted and shook their fists at playgirl Christine Keeler, 21, today as Scotland Yard completed a mammoth fresh sensation in the nation's simpering sex scandal.

The playgirl ran the gauntlet of the hostile barrage this afternoon when she left the downtown apartment where she is staying. She was accompanied by her friend, Paula Hamilton-Marshall, 22, who rents the apartment.

Elegant in a green costume and with her face tense and pale, Miss Keeler accelerated her car through the crowd of jeering women.

On the basis of a dossier being prepared by Scotland Yard, legal sources said that other key figures in the scandal, perhaps even including Miss Keeler, may be charged with conspiring to pervert the course of justice.

Majority at Hearing Opposed to District For West Side Area

A majority of those attending a public hearing on formation of the West Side Water district appeared opposed to it, according to opinion expressed this morning in the Jackson county courthouse auditorium.

Approximately 150 people, either property owners living within the proposed district boundaries, or owners of property there and living elsewhere, attended.

Those opposed to district formation stated: (1) that future assessment for a water line serving their property would be too expensive; (2) they already have adequate water; (3) much of the area is prime agricultural land, and should not be forced into subdivisions as would result from the water assessment; (4) many of the property owners within the proposed district boundaries had not been contacted to sign petitions.

Letters Are Read—Two letters and two petitions for exclusion were noted by the county court which conducted this morning's hearing. The county court has received petitions signed by 128 legally registered voters of the area favoring the district formation, County Judge Earl M. Miller said.

John Dellenback, attorney, said he had petitions signed by 148 people opposing the district formation. Edward Branchfield, Medford attorney, represented Robert Heffernan and his mother, Mrs. Heffernan, both of Ross lane, who are seeking exclusion.

Ervin B. Hogan, Medford attorney, representing property owners and residents favoring the district, said discussion of assessments is too far ahead. The petitioners are merely favoring district formation so an engineering survey could be made to determine what area could be economically served by a domestic water line.

Not All Checked—T. M. Gerow, district sanitary engineer, and Orrie Moore, county sanitarian, said not all wells in the area had been checked for pollution, mainly the Westwood subdivision which Dellenback pointed out is a small portion of the overall district proposed.

C. O. Lovejoy, president of the Jackson county planning commission, and Old Military rd. property owner, said pure water will soon be a problem for the whole West Side area in a few years and later for the entire valley floor.

County planning commission studies have revealed the rapidly increasing population will bring about the problem. County Judge Miller said the county court would put the district formation before the voters in an election if and when it determines the district formation would be beneficial to the county and a majority of the affected property owners.

17 New Oregon Projects Reported—Salem—(UPI)—Seventeen new Oregon industrial projects representing an investment of \$10.5 million were announced or completed during June and July, Gov. Mark Hatfield said today.

Seven of the plants are expansions of present Oregon industries. Included in the total are three new plywood plants, a hardwood plant and expansion of a particle board plant.

Hatfield also noted that three other developments in the state during the two months have "potential for great impact on the state's economy."

These are the Boeing company's lease of the Boardman tract; Bunker Hill Company's application for lease of iron-bearing sand near the mouth of the Columbia river and the Hedyne-Newport chemical company's research project on the extraction of chemicals from pine stumps.

First Tax Referral Petitions Go Out—Salem—(UPI)—First petitions seeking referral of the income tax bill passed by the recent legislature are now in circulation, Albany Publisher Francis Howard said today.

He reported the first petition with 20 names had been completed and that the Linn county clerk had found 18 of them valid.

Howard's organization which is spearheading the referral movement, must get 23,185 valid signatures in the secretary of state's office by Sept. 1 if the measure is to be put up for statewide vote Oct. 15.

The bill which revises the state income tax law to raise an additional \$60 million will become law Sept. 1 unless the necessary referral petition signatures are obtained.

North Marion Team Wins Judging Award—Portland—(UPI)—The North Marion High School's Future Farmers of America livestock judging team won first place in FFA livestock judging at the Multnomah County Fair, winning over 26 other Western Oregon FFA teams.

NEWS BRIEFS

FIREMEN'S UNION CALLS GENERAL CHAIRMEN—Washington—(UPI)—The firemen's union today called 156 of its general chairmen to a meeting here Tuesday in the hopes it will be ready with a proposal for settling the key issue in the railroad dispute.

LARGEST CARLOAD OF LUMBER SHIPPED—Tucuman, N.M.—(UPI)—What was said to be the largest carload of lumber ever shipped by rail arrived Tuesday in the Tucuman yard of the Southern Pacific Railroad. It consisted of 76,000 board feet and weighed 146,700 pounds.

WESTERN AIR DEFENSES TESTED—Hamilton AFB, Calif.—(UPI)—The United States tests its air defense in 10 Western states today and Wednesday when Army, Navy and Air Force units swing into action to ward off a mock attack.
