

Valley Woman Wants Krebiozen Resumed

By RICHARD JEWETT
Mail Tribune Staff Writer

"My wife, a cancer victim, has been living due to Krebiozen for 6½ years after five doctors despaired her chances to live. Now the government has stopped shipment. Are we stopping all research and help for those given up to die? Prisoners can be given research medicine, why can't free people?"

In the foregoing appeal, by telegram, sent July 29 to the President of the United States, the attorney-general and to Oregon's senators and representatives in Congress, John L. Patrick, Shady Cove area rancher, tells the plight of his wife, Wilma.

The Patricks maintain that Krebiozen, a controversial drug not yet available on the market, has kept her cancer at bay. Following surgery seven years ago, four of the

doctors gave up hope for her. The other, the one who operated, said she had one chance in four to live.

From another source, the Patricks learned of Krebiozen. Mrs. Patrick has been taking the drug as a precautionary measure.

Patrick's Are Concerned

About the middle of July this year, the Patricks became concerned when an anticipated shipment of the drug did not arrive. Mr. Patrick inquired of the Krebiozen Research Foundation, Chicago, Ill., and learned that the federal Pure Food and Drug Administration had halted all interstate shipments of the drug as of July 12.

The Patricks' family doctor reported that articles in medical journals stated that the Pure Food and Drug Administration had come to the conclusion that it had not been substantiated that the drug has any real value in the treatment of cancer and that further experimental treatment of cancer with it should be cut off. Mr. and Mrs. Patrick have expressed the opinion that political and commercial aspects also have been involved.

Time Magazine issue of July 26 probably points more specifically to the shipment stoppage reason. In its medicine section Time said:

Tough Provision

"On June 7, a tough provision of last fall's Drug Amendments Act became effective. To continue interstate dealings in Krebiozen, Dr. (Steven) Durovic (drug developer) had to file with FDA a detailed plan for his investigation. He did so reluctantly at the last minute. Then last week just as the FDA was concluding that his plan was 'grossly inadequate,' Durovic abruptly withdrew his proposal, angrily charging bad faith on the part of the government. The Department of Health, Education and Welfare responded: 'Your action automatically makes illegal the continued interstate de-

livery of the product.'"

The Patricks' doctor said that an advance warning letter had been received but that, when the last order was placed, there was no answer — no explanation was sent.

Patrick on July 29 made another effort, by telephoning the foundation, to secure an order of the drug. He offered to send his wife to Illinois to get it, if she could obtain a year's supply. He was turned down and was told that now there was a city investigation.

Since it has not been put on the market, "K" is still in the category of a research drug, although it has been used on cancer patients since 1949.

Attitude of Profession

The attitude of the medical profession at large, reportedly, has been that Krebiozen is of no value. "You have to beg doctors," Patrick said. "Doctors are afraid of being called quacks if they prescribe the drug," he declared.

Mr. and Mrs. Patrick believe, however, that she and many others will die because of being denied the drug.

They cite numerous cases in which the drug has done good, arresting cancers or making them disappear. Their source and authority is the book, "K, or Krebiozen — Key to Cancer," by Herbert Bailey (Hermitage House, 1955).

And the Patricks make this point: "Why stop something that is doing good?"

"It's definitely doing no harm so why stop it," remarked Mrs. Patrick, who gives the appearance of bearing her illness calmly.

When something is bad that's different, the Patricks said. When something is shown to be only good, why prevent people from having it? Why stop it?

Proper to Protect

"It is perfectly proper," Patrick said, "to protect persons who have some hope from other remedies. On the other hand are the people

for whom no hope has been given. Let's find anything we can for them."

"To stop the drug with people given up to die is to the point of the ridiculous," Patrick added.

The Shady Cove couple cited the benefit from "K" in Mrs. Patrick's own case. Her surgery seven years ago was radical. The lymph glands under her left arm and her left breast were removed. Three years ago, after she had stopped taking Krebiozen injections for a time, lumps showed up in her right breast. She resumed taking "K" and the lumps receded in size.

The Patricks described as "substantial citizens" by their doctor, moved to the Rogue valley five years ago from Sun Valley in the Los Angeles area. Patrick had operated an "automotive corner" in Hollywood — a service station and auto parts business.

Now the family has property on the west fork of Trail Creek. It is residing on a leased ranch, however, and the Patricks, with the aid of their three sons, have entered the cattle business. Along with ranching, Patrick is employed by a truck service station here as a bookkeeper, mechanic and attendant.

Saw Mrs. Patrick

The doctor said he first saw Mrs. Patrick in 1958. He reported that he agreed to the Krebiozen injections because Mrs. Patrick had been using the drug and it seemed to be doing her some good. The physician said that he has not condoned "K" as effective nor condemned it as ineffective in the treatment of cancer. He stated that Mrs. Patrick is the only person he has seen use it with any apparent results.

"I don't want to say that the drug has benefited her and don't want to say that it hasn't," the doctor further commented. He reported that she claimed to feel better and the "masses" did seem to improve under medication. He pointed out that he has made no real study to evaluate Krebiozen.

The doctor said he does not know for sure whether the masses in his patient's right breast are cancer since there is no proof by pathological examination that the multiple lumps are malignant. Mrs. Patrick declined a biopsy. The lumps, as large as "average" eggs, according to the physician, did regress to walnut or almond size.

Mrs. Patrick's last "K" injection was July 18. The physician remarked that there has not been sufficient time to determine whether the effect of the halt in injections has been detrimental. He has not examined her since that date. Treatments have varied from one to three per week.

Developed By Durovic

Krebiozen, developed by Dr. Steven Durovic, a Yugoslavian native, has been distributed by the Krebiozen Research Foundation for investigational use.

The purpose of the distribution and investigation of the agent is to determine whether it has any specific activity against malignant conditions. The foundation, according to the instruction sheet from the organization, has formed an opinion on the basis of preliminary studies that the agent may decrease or abolish pain, improve the general condition of the patient and provoke a regression or remission of the malignant tumor in some patients.

Krebiozen, a name compounded from Greek terms, means "that which regulates growth."

In the center of the controversy over the drug has been Dr. Andrew C. Ivy, vice president of the University of Illinois and head of its Chicago college of the health professions, which includes the medical school. He has been chief sponsor of the Krebiozen research. According to Herbert Bailey, in his book, Dr. Ivy feels that "K" should be investigated from every aspect known to science.

Go To Illinois

Tim Magazine in the July article reported:

"Dr. Ivy defiantly announced that he would continue to give the injections 'whether I go to jail or not.' Durovic will supply Krebiozen only to Ivy. Thus patients who want to keep on getting injections will have to go to Illinois for them."

That appears out of the question for the Patricks with their limited means.

Time concluded:

"But Krebiozen's backers have powerful friends on Capitol Hill; last week resolutions were introduced in both houses of Congress to require the government to give the controversial drug another chance."

for whom no hope has been given. Let's find anything we can for them."

"To stop the drug with people given up to die is to the point of the ridiculous," Patrick added.

PENNEY'S END-OF-SEASON PATIO

ALWAYS FIRST QUALITY

CLEARANCE

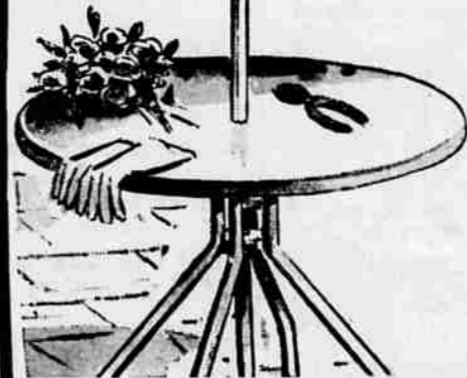

Value . . . Big as All Outdoors

**BIG LUXURIOUS
7 Ft. PATIO
UMBRELLA
Reduced!
\$15.**

Big seven-foot, 8-rib garden umbrella with push-button tilt that keeps your sun protection where you want it. Assorted solid colors with floral print underside.

**42" WHITE ENAMEL
STEEL TABLE
Reduced!
\$12.**

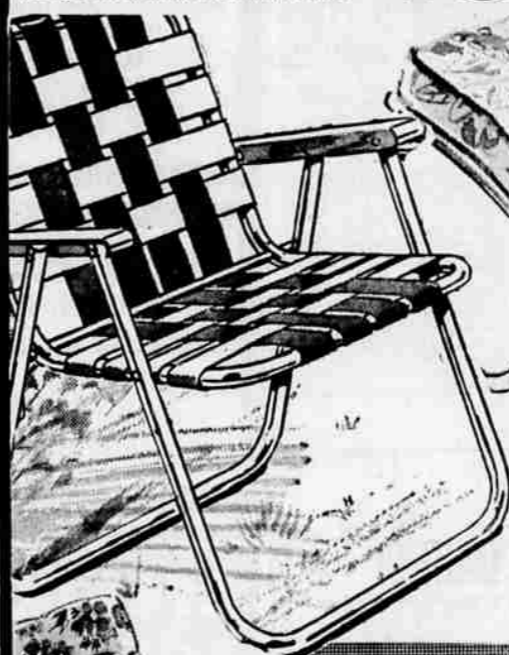

Sturdy 42" diameter steel table with white baked enamel finish. Tubular aluminum legs that are steady and well-braced. Teamed with umbrella it makes an ideal outdoor dining table. Plenty of room for the entire family.

PATIO SHOP . . . Penney's street floor

REDUCED! INNERSPRING CHAISE LOUNGE

Deluxe innerspring chaise lounge with 2-piece spring filled pad. Double bar, tubular aluminum construction. 5-position back rest. Also padded chaise lounge on aluminum frame, 12.99.

16⁹⁹

50 ONLY WHILE THEY LAST!
**FOLDING
WEB
CHAIRS**
3²²

1" tubular aluminum frame with weather-resistant plastic webbing. Easy to fold for storage or carting. Ideal to take camping or the beach, and unexcelled for the Seafair races!

PATIO SHOP—Street Floor

1-INCH TUBULAR ALUMINUM PADDED CHAISE LOUNGE

NOW! **12⁹⁹**

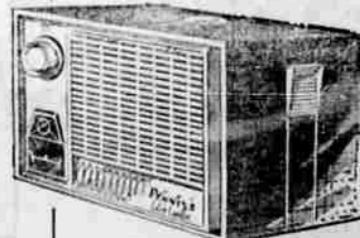

• tufted construction
**Reduced!
25 Only
DELUXE
LOUNGE PAD**
4⁹⁹

Foam filled, button tufted to give new comfort, new life to that old lounge. No more "lumpy cotton" pads! Attractive floral print plastic cover.

PATIO SHOP

**Portable
Room Coolers**
**Reduced!
\$15**

• 2 speed 1/15 horsepower motor.
• Aerial type water level indicator.
• Aquadial control adjusts water flow.

24" BRAZIER GRILLES \$6
7 only—Hvy. gauge bowl, 7" rubber tired wheels.

1 Only, REDWOOD ROCKER \$15
Rugged Ranch Style—thick vinyl cushion.

1 Only, Deluxe Lawn Swing \$59
Canopy covered w/fringed printed vinyl plastic.
