College Aid Bill Receives Approval By Vote in House

Washington—(UPI)—The congressional log jam on education legislation was eased again today with House passage of a \$1.2 billion "bricks and mortar" college aid bill, but no general break was yet in sight.

The bill was sent to the Senate where it joins a House-approved bill expanding aid for vocational schools. No action has yet been scheduled on either measure by the Senate education subcommittee.

No decision has yet been made in the Senate subcommittee to break up President Kennedy's \$5 billion omnibus education bill into segments such as college aid. There were indications the question will not be faced for a matter of weeks.

There were some privately expressed hopes in the Senate that the House might even approve other portions of the President's program—although House leaders expect no such action. Ultimately, informed sources said, the Senate will in all likelihood approve as much as the House has approved—and perhaps a little more.

Political Support
The bill had top-level support from both political parties. The vote for passage was 287-113.

The college aid bill would provide \$835 million in matching grants and \$360 million in low-interest loans over a three-year period to four-year colleges and universities, graduate schools, junior and community colleges and college-level technical institutes.

The bill was the only new school assistance program expected to pass this year.

Two Accidents Are Reported to Police

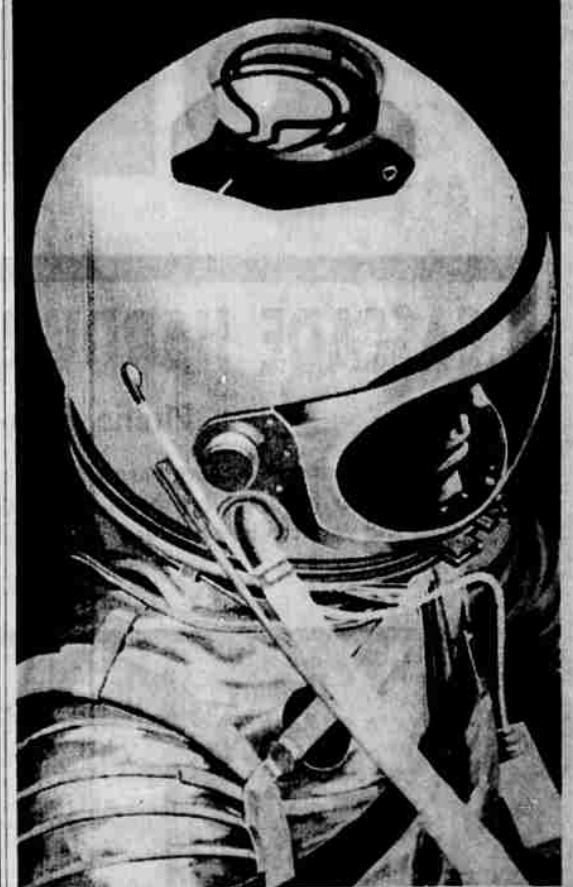

Two non-injury vehicle accidents in Medford Wednesday were investigated by city police. No citations were issued, officers said.

A bicycle ridden by Jerry Michael Garrison, 6, of 419 DeBarr ave., and a pickup truck driven by Nona June Akins, 36, of 5022 Table Rock rd., were involved in an accident about 3:39 p.m. at Merriman and Table Rock rds.

ANTENNA IN HAT—This cutaway sketch shows a tiny ring-shaped radio antenna in an astronaut's helmet to provide communications to earth from an orbiting spacecraft without use of a projecting whip antenna. It also eliminates need for a connecting cable to the space vehicle's communication system, and is applicable for use by jet plane crewmen and paratroops. It is designed by Northrup Ventura at Newbury Park, Calif. (UPI)
