The speaker was not—as you might imagine from reading today's headlines—John F. Kennedy. Rather it was Franklin D. Roosevelt. The time was more than a score of years ago. And the exasperated statement was aimed at Roosevelt's military chiefs who had been pressing him for policy guidance on the area.

The former wartime prime minister, who will be 89 on Nov. 30, appears to have made as full a recovery as could be expected from the broken thigh accident on the Riviera in June, 1962. His health is "quite good for his age," a friend said.

But after a survey by Gen. Maxwell D. Taylor, then a special presidential adviser and now chairman of the Joint Chiefs of Staff, it was decided the better course would be to supply more military aid. It also was agreed to send jungle-wise U. S. Army Rangers into South Viet Nam as "instructing dispatch by UPI's chief of forces. These forces, many of whom have engaged in actual combat when necessary, have increased from 2,000 in January, 1962, to more than 14,000 at present.

Editor's note: More than 14,000 military personnel are now poured into the struggle against communism in South Viet Nam. Now this vast investment is threatened by unrest within that little Asian nation and by political differences between Washington and Saigon. The following dispatch by UPI's chief of Washington diplomatic reports explains the stakes and tells how this country began to be involved.
