Two Types of Broilers

Many free-standing gas ranges today have two types of broilers. One is located below the oven, like a drawer. The other, an elevated unit, is next to the oven. The high broiler is equipped with a rotisserie for cooking roasts and poultry. According to the Gas Appliance Manufacturers association, it serves as a second oven in many homes. It frees the baking oven to be used for foods requiring high-temperature baking.

Easy Main Dish

Make a meat and potatoes meal with soup mix and shredded dried beef. Rinse 1/2 cup (about 2 ounces) of shredded dried beef with warm water. Drain. In a saucepan, gradually stir 2 cups of water into 1 (2 1/2 ounce) can of potato soup mix. Bring to boil, stirring. Partly cover; simmer 10 minutes, stirring occasionally. Add 1 cup of milk and beef. Heat to serving temperature. Serves 3 to 4.

A number of Rogue valley women attended the annual membership tea Saturday, September 7, held by the Medford branch, American Association of University Women. The event gives eligible women in the community an opportunity to meet present AAUW members and gather information about the various interest groups which are available to members and non-members. Two of the interest group chairmen, Mrs. William Mansfield, left, head of the Shakespeare group, and Mrs. Vernon Gebhard, chairman of the morning applied arts group, talk with Mrs. H. C. Massinger, right, an AAUW member who attended.

Women War Against Other Women, According to Book Co-Editors

By GAY PAULEY
UPI Women's Editor
NEW YORK (UPI) — Women war against other women, not against men, and tend to regard men as milquetoasts. And, when you get to the basics, American men tend to be lousy lovers because they marry too young to have much experience circulating the field.

These are some of the conclusions reached by Janice Farrar Thaddeus, 30, an English teacher at Barnard college of Columbia university, and co-editor of a work to be published September 25, called "When Women Look at Men." Harper's. The work is co-edited by John A. Kousser, also of the Barnard English faculty, and is an anthology of writings by women about men. All works have been published in the last 25 years — the same number of years Barnard has been a college.

Mrs. Thaddeus, member of a

distinguished literary family, said she researched more than 1,000 published works in America before she and Kousser settled on the authors represented.

They include Pearl Buck, Margaret Mead, Marya Mannes, Dorothy Parker and Bette Davis.

"When I first began research, I thought one of the conclusions I'd find was one of women being against men," said Mrs. Thaddeus in an interview. "You know, the war between the sexes. But the war seems to be women versus women."

"Even such militant types as the suffragettes seemed kindly toward men. They blamed institutions, not the opposite sex."

Quite often, Mrs. Thaddeus continued, the woman visualizes the man as a milquetoast. Yet she will look down on a failure, not only in business, but in his relationship with other people, even though she is the reason for his failure.

"She may not want her husband to be an oaf-like so many husbands on television — but she wants other husbands to be weak. There again, we're back to women versus women."

She continued, "You'll notice that it's the women who mention 'the other woman' in a triangle. They don't say anything about what a cad the man might be."

Mrs. Thaddeus said she waded through "a lot of dull material" about how more suave the European male is than the American and about the "skirt chasers" which were not included in the anthology. Neither did she incorporate much about men as lovers, although her readings led her to conclude that as women writers look at the U.S. male he isn't much in the Lohario department.

Literary Background

Mrs. Thaddeus, a native New Yorker, is the daughter of John Farrar, chairman of the board of publishers of Farrar, Straus and company, and Margaret Farrar, cross-word puzzle editor of the New York Times.

She attended Radcliffe college, was graduated from Barnard and is working on her doctorate at Columbia. Her marriage to her first husband, who was her high school English instructor, ended in divorce. Last spring, she married Patrick Thaddeus, an astrophysicist working at the Goddard Institute of Space Studies, New York, a part of the National Aeronautics and Space Administration NASA.

The co-editor said when she mentioned to any man of the anthology she and Kousser were compiling about "nothing good to say about us, I guess."

WORK SMARTER — NOT HARDER

By BERNICE STRAWN
Oregon State University

There are two things we can do on any job — enjoy working, or be bored and unhappy. Just in case it's the latter, there are still two things to do — challenge ourselves to find easier ways to do the job and really change, or just drift along and get by. Enjoying work depends on growing to fit the job.

How can one enjoy routine housecleaning, you might ask. Have you experimented with any new cleaning products lately? Jobs you dislike are worth exploring for an easier way. Have you built a Work Smarter Plan?

Poppies Topic For Garden Club

"Poppies for Brilliance" will be the subject of the program to be given by Mrs. C. P. Smetz at the Jacksonville Garden club meeting Thursday, September 19.

Mrs. C. O. Lack will be hostess at her home, 2132 Harrison avenue, Medford, for the 1:20 o'clock session. Mrs. Dee Hendrickson will be co-hostess.

Rainbow Girls To Meet Tonight

JACKSONVILLE — Warren assembly, International Order of Rainbow for Girls, will meet tonight at 7:15 o'clock in the Jacksonville Masonic hall. Miss Susan Ritehey, worthy advisor, will preside. Refreshments will follow the meeting.

Do you think carpeted rooms are easier to care for than smooth surface floors? Most people do. But home economics researchers found only 20 minutes less care was needed per week for carpeted floors. They did their experiments in homes of young married couples living in apartments.

There is a tendency to under-clean carpets because the hidden dust doesn't show. Most of the time the homemakers didn't move the furniture when they vacuumed.

On the other hand, dust shows more on smooth floors so the women cleaned more thoroughly.

Working wives — have trouble keeping up with the laundry during warm weather?

A three-way hamper is a boon to getting the job done. In one section toss over night laundry, the blouses and underwear that should be washed and ready to wear tomorrow. Drop clothes that can wait until the week end in another part. Linens and towels can pile up for a while in the third section.

Keep your vacuum bottle sweet smelling. After each use fill it with cold water and one tablespoon baking soda. Leave stopper out and allow solution to stand in bottle for several hours. Rinse with clear water.

Decorator Tips Will Enlarge 'Room'

The problem of making a small room seem larger is one which has baffled many a housewife. However this is easily solved, reports the Construction Research bureau, a national clearing house for building information. Simply follow the methods used by professional decorators who offer these tips:

1. Use large mirrors on the walls of the small room to give a feeling of space and roominess.
2. Paint or paper the walls in white, or a light shade. Brightening a small room, enlarges it.
3. Bring a feeling of outdoors inside with large - appearance windows. Turn two side-by-side regular windows into one large picture window.
4. Use a simple light colored pattern on the floor such as mosaic vinyl tile which is composed of infinitely small chips embedded into each tile. A light color gives the effect of a longer and wider floor.
5. Use small scale furniture. Avoid the over - accessorized look.
6. Make sure the curtains are the same color as the walls. This will tend to extend the wall length, as far as the eye is concerned.
