MEDIAN INCOME UP WASHINGTON (UPI) — The median family income in the United States rose 100 per cent in 15 years to reach \$6,000 in 1962, but rising prices during this same period allowed only a 45 per cent increase in purchasing power.

Senate Committee Hears Tax Expert

WASHINGTON (UPI) — The Senate Finance Committee enters its sixth day of public hearings on President Kennedy's \$11 billion tax cut bill today... with a backlog of witnesses greater than when it started.

A staff aide said 170 persons have now requested time to testify on the measure—30 more than when the committee began public sessions last Tuesday.

The committee heard one witness Monday, Joe Barlow, a tax expert for the U.S. Chamber of Commerce. Barlow told the committee the bill passed by the House Sept. 25 was "most essential."

He complained, however, that when all structural changes in the bill are taken into account, the lowest income taxpayers actually get a 39 per cent tax reduction, compared with 13 per cent for persons with incomes of more than \$50,000 a year.
