

# Home Accused of 'Arrogance' In Postponement of Parliament

LONDON (UPI)—Opposition Labor Party Leader Harold Wilson today accused Prime Minister Sir Alec Douglas-Home of "arrogance" in postponing the next session of Parliament and charged he was trying to "de-Stalinize" his Conservative party's political record.

Wilson, launching his first major offensive against Douglas-Home's government, leveled the charge during an extraordinary House of Commons debate while Parliament met to end its current session.

The House of Lords, at the same time, heard a speech from Queen Elizabeth II expressing hope that the East West partial nuclear test ban treaty may be the forerunner of further accords "helping to reduce international tension."

The bitter Commons attack by the Laborites centered Douglas-Home's action in postponing the start of the next session of Parliament for two weeks until after a Scottish by-election Nov. 7 in which he hopes to win a House of Commons seat.

"It is with an arrogance I find stupefying that the suggestion was made that the House should be prevented from doing its job to suit the convenience of one individual," Wilson told Commons.

Referring to Conservative tactics since Douglas-Home took over as prime minister from ailing Harold Macmillan, Wilson said:

"It was clear before we even knew of the prime minister's illness what the game

was going to be—to get rid of the prime minister and then start on this process of de-Stalinization of his record of which the Conservative party are such past masters."

The prime minister brought Wilson, who will oppose

about the delay to give himself time to win a seat in the lower house in a by-election Nov. 7.

He was leaving tonight for the district, Kinross, Scotland, to campaign.

Wilson, who will oppose Home in national elections to be held within the year, used the last session of the old Parliament as his platform.

"Because of the extraordinary and unique procedure with which this government has been formed we are now told that this House shall be sent packing for two weeks," Wilson said.

Home was the first peer to become prime minister since 1902, but to govern effectively he must have a seat in Commons.

Wilson said this means that Britain today has a prime minister "who is a member of neither House of Parliament."

"For this reason and this reason only, the House is told that it cannot do its duty as it conceives its duty," he added in a reference to the postponement.

# Cuban Refugees Considered for Asylum in U.S.

BEAUMONT, Tex. (UPI)—Sixty Cubans who faced starvation on the seas to escape food and water shortages on their Communist-held island were being considered today for political asylum in the United States.

Immigration authorities were expected to announce today what disposition would be made of the refugees, including 16 children and 18 women. They docked here Wednesday night.

They were rescued Tuesday from an overcrowded 25-foot sailboat in the Yucatan Strait between Cuba and Mexico. The British freighter Essequibo plucked them from the turbulent sea where they had drifted two days without food.

Stormy seas had hampered their sailing in the fishing boat. They said friends, armed with automatic weapons, guarded them while they rowed in five small boats from beaches in Pina Del Rio and Oriente Provinces.

Five miles from shore, after rowing eight hours, they rendezvoused with the sailing vessel and started sailing toward Mexico. Sailing was thwarted by the battering seas and erratic winds.

A refugee student explained the reason for the exodus: "In Cuba there are not enough shoes manufactured and some people go barefooted."

"There is not enough water in some areas and eggs are rationed so strictly that only people under eight and over 65 are allowed to eat them."

"After a while you get sick of this."

Despite the rugged voyage, the refugees appeared in good condition.

The refugees declined to identify themselves to newsmen because they feared reprisals against their families in Cuba. They are members of 15 different families.

# Duncan Suggests More Use of Wood

A review of architectural designs and materials used in the construction of Federal buildings in the Fourth District was suggested by Congressman Robert B. Duncan, D-Ore., this week.

Duncan said he had met recently with Karel Yasko, General Services Administration's assistant commissioner for design and construction, to discuss the possibility of using more wood and other Fourth District products wherever possible in Federal construction.

"I have always felt that builders who used glass, steel and brick to the exclusion of various wood products have not only done a disservice to local industries, but have denied themselves a beautiful, serviceable and versatile construction material," Duncan said.

"Yasko assured me he would review his agency's policy concerning the use of indigenous products of the area in which Federal buildings are constructed," Duncan added.

Congressman Duncan noted that he had particularly asked that more wood be included in the new post office and Federal office building in Medford.

"I was informed that plans are too far advanced for substantial changes to be made without incurring prohibitive costs and delays," he said.

"However, Yasko agreed that Oregon wood paneling certainly should be substituted in the interior of this building."

NEWSPAPERS EXCEL SALEM (UPI)—The vice president of a food store chain said today "Nothing excels newspapers when it comes to selling merchandise or building a substantial image for the company who sells it."

SALEM (UPI)—The unveiling of a bronze memorial to Samuel C. Lancaster, chief engineer of the scenic Columbia River highway in 1915, is scheduled for 3 p.m. Sunday at Crown Point.

# Foreign Briefs

## FRENCH ATOMIC TESTS IN SAHARA REVEALED

PARIS (UPI)—A Paris weekly reported today that France carried out atomic tests in the Sahara in recent days "in connection with detonators for the H-bomb."

There was no official comment on the report in the left-wing L'Express. France is known to have carried out a series of earlier tests with plutonium bombs to set off the H-bomb it hopes to test in the Pacific.

## NEWS BLACKOUT ON ENCEPHALITIS OUTBREAK

NAHA, Okinawa (UPI)—U.S. Army hospital authorities today claimed a news blackout on what Okinawan health officials termed the worst encephalitis epidemic here since 1956.

At least 21 persons have died here this year of the disease, commonly called "sleeping sickness," one of them an American serviceman who became the Army's first reported fatality on Tuesday.

## U.S. GOVERNORS CONTINUE TOUR OF JAPAN

YOKAICHI, Japan (UPI)—Nine U.S. governors headed into the back country today on the last lap of their two-week tour of Japan.

Wednesday, the governors dined on steaks from cattle which had been fed beer, and Gov. John Anderson of Kansas said they tasted better than the steaks back home.

The governors were told the cattle were "very fond of drinking beer" and this helps their digestions and makes tastier meat.

## Electronics, Drugs Lead Stock Market Slightly Higher

NEW YORK (UPI)—Electronics and drugs led stocks slightly higher today.

Drugs, off sharply Wednesday on a report linking oral contraceptives and cancer, bounded up sharply after G. D. Searle refuted the report, Johnson & Johnson rose close to 4 and Merck and Abbott Labs about 1 apiece.

IBM spearheaded a long list of electronic gainers with a jump of around 4. Beckman, Cenco, Control Data, Electronic Associates, Fairchild Camera, Schlumberger, Havg, and High Voltage Engineering were up 1 or better.

Autos were firm and steel narrowly mixed. Du Pont added roughly 1 1/2 in the chemicals. American Crystal, Holly and Central Acquire improved in the sugar section.

# Bacaloff Compares Self To Goldwater

PORTLAND (UPI)—Portland contractor Jim Bacaloff, who has been running for the 1964 Republican congressional nomination from the Third District since the day after the 1962 elections, said Wednesday his political philosophy matches that of Sen. Barry Goldwater, R-Ariz.

"I believe that the American free enterprise system should be preserved," he said in a speech to the Rocky Butte Kiwanis Club.

## Recreation Site Development Set

Basic development of a 33-acre recreation site on Elk Creek, seven miles from Shady Cove, will start this year, according to Jackson County Parks and Recreation Director Neil Ledward.

A cooperative agreement for development of the old fish hatchery site was signed yesterday by the Jackson County Court and will be forwarded to the Oregon State Game Commission for signature.

A study will be made for full and complete use of the area, Ledward said. Initial development will include garbage disposal and sanitation facilities. Further improvement will include development of a picnic area. A boat-launching facility is already there.

Ledward explained that the new county recreation area includes both sides of the Rogue River and 2,200 feet of river frontage.
