New Measuring System 'Coming'

PORTLAND (UPI)—Log measurement by the cubic foot rather than by board foot measurement is the coming thing, according to G. D. McDonald, Georgia-Pacific controller.

McDonald told the Pacific Logging Congress here last week that proper utilization of available wood fibre is the cornerstone of the logging industry's economic survival, and effective measurement of this fibre is the first step in a breakaway from time-honored conventions of the past.

He was seconded by Douglas C. Smith, U. S. Plywood Corp. forester, who stated the cubic foot formula will determine true log volume, regardless of its ultimate use.

Smith presented a format for complete revision of log scaling and grading practices. The loggers ended their five-day convention here Saturday.

Revised One-Shot Revenue Plan Told

SALEM (UPI)—A revised one-shot revenue plan that would add \$20 million to the state's income this biennium was proposed Friday by Sen. Alfred Corbett, D-Portland.

The Hatfield plan would have raised \$12 million by speeding up the turnover of monies to the state.

"If we follow my proposal," Corbett said, "we will have available at least \$8 million additional for blunting the harsh edge of Hatfield's budget cuts." "I am not prepared to give final approval to this withholding program until we receive some assurance from the governor that these additional monies will be used in some areas where we feel the cuts will be especially severe," Corbett said.
