

**MEDFORD MANAGER** — Murray S. Gardiner, above, is Medford district manager for California-Pacific Utilities Company. He moved to Medford in 1938 after starting with the company at Susanville, Calif., the year before. Upon completion of military service, Gardiner was made assistant division manager in charge of establishing the tank gas department in all districts. He became Medford district manager earlier this year. He is past exalted ruler of Medford Elks Lodge, past chairman of the Salvation Army advisory board, past president of the Chamber of Commerce and is completing his year as chairman of the board of the Chamber. He is a graduate of Ohio State University.

**Incinerators Prove Valuable to Family**

Half the fun of an outdoor barbecue is its informality. While this helps ease the work of the hostess, it also brings mixed blessings. By using paper plates, cups and napkins, she cuts down on dishwashing but is faced with a trash disposal problem.

If she burns the items in an outdoor incinerator, the smoke and odor will be unpleasant. If she postpones burning, the trash is unsightly and will quickly attract annoying insects.

This, says the American Gas Association, is where an automatic smokeless-odorless gas incinerator proves a boon. The host or hostess merely gathers up the used paper ware and drops it in the gas incinerator. There's no fuss or bother and no smoke or odor to contend with. The patio is spic and span in minutes. Garbage, too, can be burned right along with the other items.

Since a gas incinerator is installed indoors, it serves the family all year long, consuming garbage and refuse at the homeowner's convenience. There is never any need to wait for ideal weather for burning or emptying.

**Portland Officers**

**Hurt in Accidents**

PORTLAND (UPI)—Two policemen were injured in separate accidents on rain-slick streets Monday.

Officer Robert Porter, 29, was in satisfactory condition at Portland Sanitarium with injuries suffered in a two-car accident about 5:15 p.m. He was driving his own car.

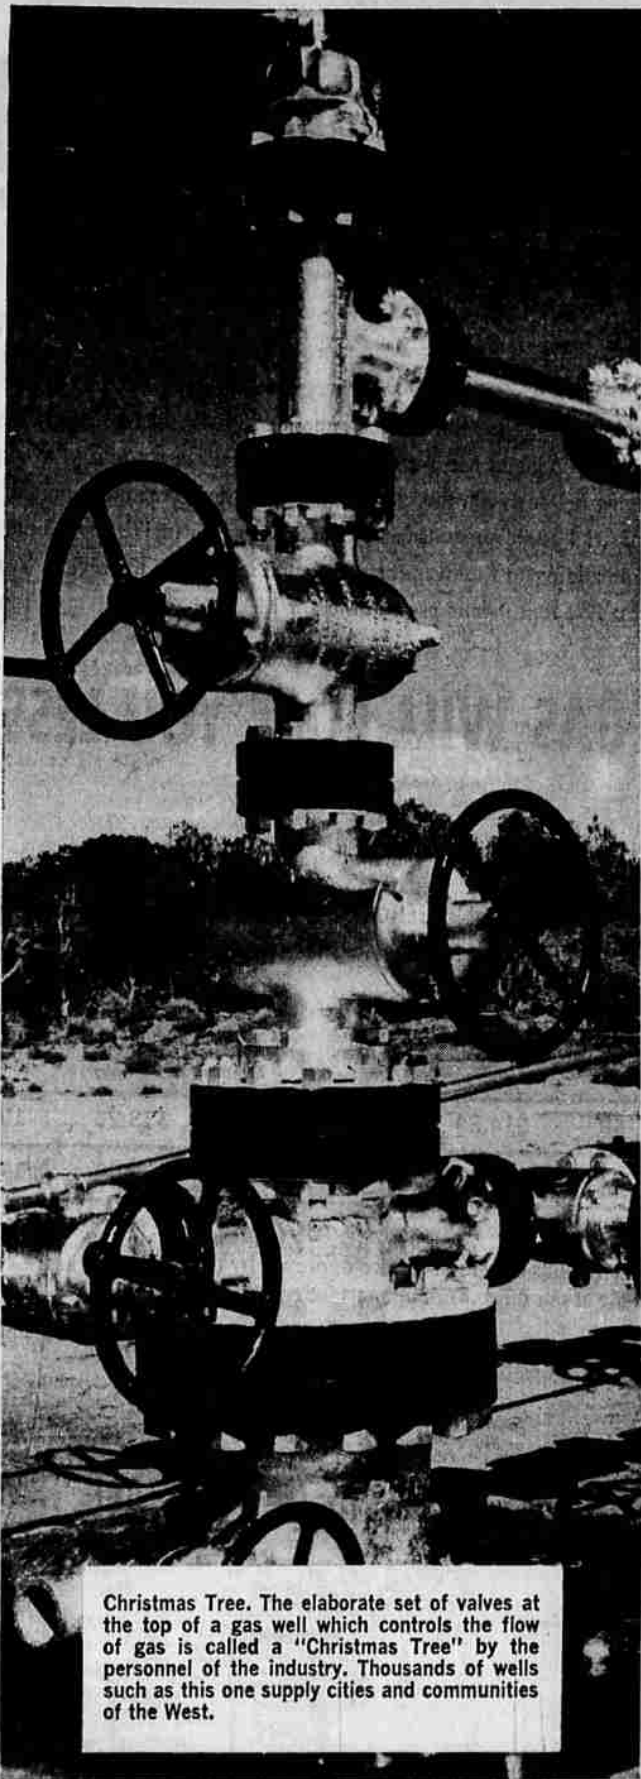

James L. Rogers, 38, a traffic officer, suffered minor injuries about 3 p.m. while en route to another accident when his police car and another collided.

**EXECUTIVE DIES**

PORTLAND (UPI)—William Andrew Montgomery, former president of the J. F. Gill Co. here, died in a hospital Tuesday. He was 85.

**DIVISION AUDITOR** — E. M. (Ed) Falwell, above, joined California-Pacific Utilities Company in 1959 as division chief clerk. In May of this year he was promoted to division auditor and credit manager for Southern Oregon and Shasta, California Divisions. His duties include supervision of accounting, auditing and credit policies. He was with California Oregon Power Company in the accounting section for six years. Falwell attended elementary schools in Medford, Grants Pass High School and the University of Oregon.

Christmas Tree. The elaborate set of valves at the top of a gas well which controls the flow of gas is called a "Christmas Tree" by the personnel of the industry. Thousands of wells such as this one supply cities and communities of the West.

Processing Towers. After natural gas leaves the ground, it is put through extensive plants where such products as gasoline, butanes, and propane are extracted. This processing also guarantees purity.

Pipeline Construction. El Paso Natural Gas Company has built and operates 19,000 miles of pipeline to meet public demands for gas in 11 western states.

**NATURAL GAS FOR MEDFORD**

**... a first class fuel for a first class community**

El Paso Natural Gas Company is proud to begin service of natural gas to Medford.

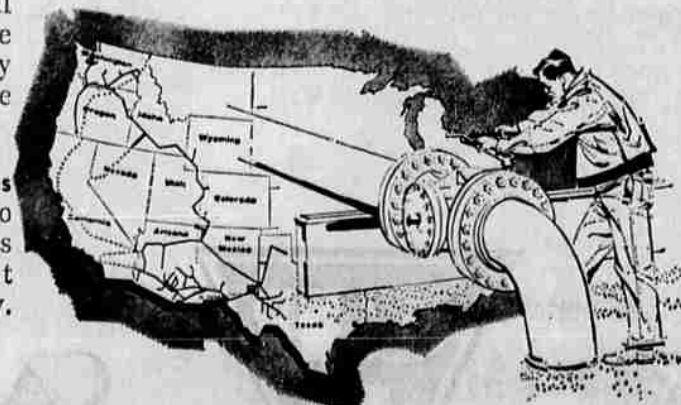

Medford is now directly connected to the immense natural gas reserves of the San Juan Basin, the Rocky Mountain area and Canada. Through its pipeline El Paso Natural Gas Company brings gas to Medford where wholesale service is provided to California Pacific Utilities Company. California Pacific Utilities Company, in turn, provides retail service to homes, stores, churches, schools, businesses and industries of Medford.

Natural gas is the best and most versatile fuel used by man. Wherever it is used and its advantages proved, it is becoming increasingly popular. During the past decade in the United States, consumer demands for natural gas have increased more than have demands for all other

fuels combined. Natural gas now supplies 31.5% of the nation's energy and serves 34,000,000 homes.

Medford is a progressive, distinguished community, destined to grow and prosper. As Medford grows it will need increasing quantities of energy to serve its new homes and industries. Because deliveries can readily be expanded to meet growing demands, natural gas will become increasingly valuable to the community.

El Paso Natural Gas Company is proud to bring a First Class Fuel to a First Class Community.

**EL PASO NATURAL GAS COMPANY**

Through its pipelines, El Paso Natural supplies wholesale gas service to retail natural gas distributors in 11 western states: OREGON • WASHINGTON • IDAHO • CALIFORNIA • NEVADA • WYOMING • UTAH • COLORADO • ARIZONA • NEW MEXICO • TEXAS
