

PIPE SET — A pipe set for dad is sure to be appreciated. But, the Pipe and Tobacco Council suggests you consult local tobacconist as to the right shape and style of pipe as well as the proper tobacco to make sure that dad is as pleased with his new briar as he can be.

New Laundry Equipment Saves Time and Labor

Leisure time is a most-prized possession and it's the lucky mother who receives this very precious Christmas gift in the shape of a 1964 washer and dryer, which are most efficient time-and-labor savers.

It has been estimated that an automatic dryer can save the homemaker forty miles of walking, to and from the clothes line, each year. She can also save the energy required to lift the clothes basket and stretch to the line to put the clothes up and take them down.

Automatic dryers not only dry clothes, leaving them soft, fluffed, and sweet-smelling but can be used in other ways that save mother time and effort.

"Freshening up" is a very useful function for this dryer with a "no-heat" setting. According to the Hotpoint Home Laundry Institute, draperies, curtains, spreads, blankets, pillows, light rugs and stored clothes being brought from storage can all be treated to the lively air currents that circulate so effectively in a dryer. This is an age in which the whole family wears clothes containing synthetic fibers. In addition to doing a thoroughly

efficient job on cottons, linens, and such staples, the new washers and dryers are geared to do a fine job for all those wash-and-wear clothes that play such an important role in our modern wardrobes.

Six Settings
The new Hotpoint washer has six settings, including one for "sturdy wash-and-wear" and one for "delicate wash-and-wear". The machine also features a "tempering" action which adds cool water towards the end of the wash cycle to help prevent wrinkles in clothes.

The dryer also has a special setting for "wash-and-wear," one of four drying selections, and provides a cooling-off period which tumbles the clothes without heat at the end of the cycle. This also does its part in reducing wrinkling which is a very important feature for our modern wash-and-wear clothes.

To provide even more leisure time for mother, as she will have to do fewer washes each week, the new Hotpoint machines wash twelve pounds of regular loads, and fourteen pounds of certain selected loads.

Versatile

Automatic washers are very versatile. They can be used to wash feather pillows, electric blankets, plastic boots, sneakers, with complete directions provided by the manufacturer. A nylon mesh bag is useful to have as you can place small items such as gloves and belts in it, and make recovery from the machine easier.

The new machines allow the homemaker to vary the water level to suit her special load, and she can also vary the temperature of the wash water and of the rinse water. There's even a dispenser in this machine to introduce the bleach, and the fabric conditioner into the water at precisely the right time to achieve the very cleanest sparkling wash.

LURE OF SPORTS

The yearning of the armchair sports fan to replay big league events as exactly as possible is catered to with an ingenious new crop of electric powered games. New is an NFL Electric Football Game which has a magnetized ball which can be picked up as in real play and a kicker-passer device.

KIDNAPED — The Department of Defense has announced in Washington that Col. James K. Chennault, above, assistant chief of the U. S. Army mission in Venezuela, was kidnaped at gunpoint by four men in Caracas, Venezuela, Wednesday. (UPI)

FLY TO FUNERAL — Clifford W. Marx, above, a 17-year-old Redding, Calif., high school student, had been saving money that he earned for the past three years for a European tour when he graduated from high school. Being a close follower of the late President Kennedy, he drew his money from the bank and flew to Washington, D. C., for the funeral. (UPI)
