

Junior TREASURE Chest

EDITED BY ANN DAVIDOW

Santa in a Flash *By Walter Eckhart*

Outline Santa's silhouette on a piece of shirt cardboard and cut it out. Take him into a darkened room along with a flashlight. Point the light at a wall and hold Santa in front of the beam. Inside the circle of light, Santa's silhouette will appear, growing larger or smaller depending on his nearness to the light.

For another trick, try holding Santa still and moving the beam up and down behind him. It's easy to imagine you are seeing a live Santa coming to deliver presents on Christmas Eve!

A Mistletoe Mobile *By Ragna Eskil*

To make this unusual Christmas decoration, you will need one of those latticework plastic pint boxes that berries come in. You will also need some narrow Christmas ribbon, eight small Christmas balls, and a sprig of mistletoe.

Turn the box over and tie two 10-inch lengths of ribbon to the four corners of the bottom so that they crisscross to make a handle. The mobile may be hung from this.

Now tie the balls to places around the rim of the box so that they dangle gaily from uneven lengths of ribbon. Then tie the mistletoe right in the center.

Hang your mobile from a doorway, a chandelier, or some other high spot, and see how many unsuspecting people "get caught" underneath!

Spot Tag *By Betty Kahn*

Play this game just like Tag to start with. But when *It* touches or tags a player, the player keeps on playing though he is now *It*. While he is chasing another player, however, he must place one hand on the spot where he was tagged and hold it there until he catches someone.

Santa's on the Way *By Hans Kreis*

Santa is bringing presents to Jamie and Josie Allen. They are hidden in this picture, and so are their parents. Can you find the four Allens?

NOW...and for the first time! GENERAL ELECTRIC CHRISTMAS LIGHT SETS

**Cord, sockets, plugs and bulbs made entirely
in the United States by General Electric**

NEW DESIGN!
Looks better...lasts longer...helps
you decorate easier, faster!

New streamlined sockets...tough and 20% lighter
