HAPPENINGS HERE IN OREGON

OREGON CEREAL STANDS TEST.

Wheat Pests Identified by New Process

By Charlotte T. Smith, University of Oregon

Wheat growers in Oregon are using a new process for identifying wheat pests. The process involves the use of a special microscope and a new staining technique. The method is said to be more accurate and efficient than traditional methods.

MOUNTAIN ROUND-UP.

Annual Round-Up Held in Cascade Mountains

By E. R. Johnson, Oregon State University

The annual mountain round-up was held in the Cascade Mountains this year. The event attracts hundreds of participants from all over the state. Highlights of the event include horse races, cattle round-ups, and music.

SAINT JOHN'S CAMP.

Saint John's Camp Prepares for Summer

By John A. Clark, Saint John's Camp

Saint John's Camp is preparing for another summer season. The camp offers a variety of outdoor activities and has added several new attractions this year. The camp is expected to be very busy this summer.

FARM & GARDEN.

New Garden Tools Available for 1937

By Jane M. Williams, Oregon State College

Several new garden tools are available for the 1937 season. These include a new type of hoe, a rototiller, and a new type of garden sprinkler. Gardeners are encouraged to try these new tools to improve their yields.

LOYALTY COTTON.

Loyal Cotton Grows Strong

By Paul A. Brown, Oregon Agricultural College

Loyal cotton has been growing strong this year. The crop is expected to be good due to favorable weather conditions. Cotton growers are advised to continue their efforts to increase their yield.

FOOD RELIEF IN SOUTHWEST.

Food Relief Programs Expand in Southwest

By Mary E. Green, Food Relief Administration

Food relief programs are expanding in the Southwest. The increase in funding is making it possible to provide more food to those in need. Volunteer workers are needed to help distribute the food.
