have redeemed 1.000,000 acres of land, capable of supporting a population of 500,000. This announcement closes the preliminary stage of the reclamation project, which, being self-perpetuative by the law which set it in motion, will continue to operate as long as the work of irrigation is commercially profitable. The object of the reclamation law is to make the government the agent of the people in turning over the public domain to small land owners on a strictly business basis. The reclaimed land at what it costs to redeem it. In this way the fund for irrigation will-not be exhausted, but will

remain intact for making more land cultivable. The Eastern farmer is not taxed for the benefit of the Western farm, as would be the case if the government sold the reclaimed land at irrigated land that the average farm of soul-torture. need not exceed forty or fifty acres to support a family in abundance. The population being so much denser than in other farming districts west of the

way to life in the village, and the element of loneliness which has heretopugnant to many will be eliminated. a principal. Great interest is already being taken in the reclamation projects by prospective homeseekers.

History of Japan's Commerce.

APAN has a history antedating that of any of the nations of Europe now existing. Its pages have been shut to us on account of our ignorance of the Japanese language and literature, but these obstacles to the acquisition of knowledge are gradually being removed and many interesting and important facts are coming to light.

The subjugation of Korea in 200 A. D., is proof that Japan had made considerable advancement in maritime And they are held to that hard lot, not power at an early date. The use of packhorses and oxen. by any natural condition, but by the the spanning of rivers by bridges, and the establishment of thoughtless public that likes to take stations at the distance of a day's journey apart, as far its ease, to consult its own time and back as \$13 A. D., show that domestic trade and commerce to domineer over its slaves. Vision- and interior means of communication at that time had aries have many schemes for revolu- reached a fair state of development. Peddlers were known of the man who sows the whole tionizing the entire economic order, as early as 457 A. D., while a systematized market was

the country and stimulated the study of geography and the desire for trade and discovery. So with the assistance of William Adams two schooners were built. In them the Japanese crossed the Pacific and opened trade relations with Mexico, only eighty years after Columbus discovered America. So active was the commercial spirit that during ers. this epoch over 1,000,000 Japanese emigrants had settled

in the islands and mainland of Southern Asia. But in 1636 the Japanese Government became afraid of

foreign religious influence and alarmed on account of the enormous export of gold; so it issued a law shutting up ports, confiscating all ships large enough to go to sea, and prohibiting shipbuilding. China and Holland alone were allowed to continue trade relations, but their operations were confined to one port. As a result of this law, the growing power of Japan was crippled, and for over 200

State Aid to Good Roads.

EVERAL of the Eastern States are taking a practical part in road building. New Jersey, the first to make a State appropriation, passed a law in 1891 by which the State pays one-third of the cost of improving the roads. The counties furnish the other two-thirds, with the privilege of charging a part of this proportion to

the towns in which the roads are built. At first the farmers were opposed to the measure, but now co-operate with It gladly. A State Commissioner of Highways furnishes the plans. Nearly 1,000 miles of roads in New Jersey have been macadamized since the law went into effect. In Massachusetts the State meets the entire cost, but requires the counties to pay back one-fourth. The State appropriations of \$500,000 a year have reached a total of \$5,000,000, and, as a result, Massachusetts has constructed hundreds of miles of fine roads. Connecticut operates on much the

same system, and its \$1,500,000 in appropriations has produced 500 miles of excellent roads. On a smaller scale lence of sunshine. Maine, New Hampshire, Vermont, Rhode Island and Delaware assist in the building of good roads.

By the New York plan the State pays one-half the cost

of building roads, the countles 35 per cent, and the townships 15 per cent. Appropriations have reached a total of over \$2,000,000, last year's installment being \$600,000. Pennsylvania, at the last session of the Legislature, appropriated a lump sum of \$6,500,000 for good roads, the State to pay two-thirds and the counties and townships one-sixth each. But there seems to be a loophole in the law in the matter of determining routes, and the rivalry, or jealousy, of neighborhoods has prevented much headway thus far. The principle of State aid to improved roads has been firmly established, on the ground that the whole people are interested in the best highways and that all citizens should bear a fair proportion of their cost. Already the roads built on this basis in Massachusetts, New York, New Jersey and Connecticut are an impressive lesson on the value

CHARITIES IN JAPAN.

Efficient Care Taken of Adults and Small Children.

The greatest development of Japan in charity has been in the institutional care of able-bodied adults and of dependent children. Progress in the careof the former dates back to 1898, when a commission was appointed to consider the problem in all its bearings, according to a writer in Charitles. This commission recommended, first, the erection, through funds furnished by he state, of workshops in which the

Pechili gulf with floating mines in the hope of getting a warship or two.

Mr. Moseley's commission of Englishmen who came here to study American schools gives them much praise and some censure. One of the chief objections is to sending big boys to women teachers, whose influence, it is alleged, makes them less virile. No doubt a manly man does make a good schoolmaster for a boy more than 12 years old. But it is contrary to all experience to assert that a good woman teacher has a harmful effect on the manliest of boys.

A generation ago an English physician of note declared that four-fifths of the English-speaking people dig their graves with their teeth. But this undoubtedly doesn't tell the whole story. The manner in which eating is done and the makeup of the modern menu have a good deal to do with wrecking constitutions. Many is the business man who allows himself to become so absorbed in his affairs that he will swallow his meals in nervous baste that soon becomes disastrous to digestive organs. Hygienists observe that Gladstone is credited with chewing each bite 22 times, and attribute his longevity to his correct habit of eating. The culinary art of modern society has not for its purpose the preparation of the most wholesome food. The object to be attained is rather to tempt a jaded palate, to induce disregard of the guidance of appetite.

Milton's phrase, "They also serve who only stand and wait," has long been applied to the female portion of the human race. The modern girl prefers to quote, "Let us then be up and doing," with a courageous heart, trained muscles and a resourceful head. When a prominent Philadelphia society girl was recutly attacked by a negro she used her gun-metal-handled umbrella as she would a golf club, and a vigorous "drive" caused the thief to drop her purse and flee. When two sisters discovered a burglar under their bed not long ago, they dragged him forth, one of them sat on his chest. garret, very cold, and they had no and the other ran for the police. A little New Jersey girl recently rescued two small brothers from a burning building, and a Chicago housemaid broke through a group of men and dragged a child from under a trolley car. A "mere man." who recently fainted under the ordeal of vaccination, has collected these items of a week for the edification of his own ser.

After a little less than two years of work the Department of the Interior has issued a statement outlining the disposition of the fund for reclaiming the arid lands of the Western States and Territories. Twenty seven million dollars will be expended during the pert two or three years, and the work of construction, when finished, will Dealer.

20000000000000 ON THE WINGS OF THE WIND. innerenere

The dangers of ballooning, writes Santos-Dumont in "My Air Ships," are confined usually to the landing. But the sea of air presents many kinds of dangers, and sometimes the balloonist encounters more than one on the same voyage. In Nice, in 1900, he went up from the Place Massena in a goodsized balloon, alone, intending to drift a few hours amid the enchanting scenery of the mountains and the sea. His experiences were enough to make most people content with solid earth. The weather was fine, but the barometer soon fell, which indicated a storm. For a time the wind took me in the direction of Cimiez; but as it I went to bed and had the doctors sew threatened to carry me out to sea, I threw out ballast, abandoned the current, and mounted to the height of about a mile. Soon I noticed that I had ceased descending. As I had determined to land soon, I pulled on the valve rope and let out more gas, and here the terrible experience began.

reached a still greater altitude, and I could now take account of the fact by the way in which the land was disappearing under me. The upward-rushing column of air continued to take me to a height of almost two miles. After what seemed a long time the barometer showed that I had begun to descend.

When I began to see land, I threw out ballast, not to strike the earth too quickly. Now I could perceive the trees and shrubbery. Up in the storm "lady of the snows" with something of itself I had felt nothing.

Some Japanese Proverbs.

Seeing that we all are, or ought to be, grateful to the man who provides us with a new proverb, we have especial reason for gratitude to the Japanese, who have quite a collection of excellent variants for some of our best-known efforts in this direction. Thus where we say, "More haste, less speed," a Japanese puts it, "If in haste, go round." Our "Accidents will happen in the best regulated families" becomes "Even a monkey sometimes falls from a tree." "Out of evil cometh good" reappears as "The lotus springs from the mud." Other easily recognizable variants of English proverbs are: "If one plays with a tiger doesn't look very nice," said the cranky trouble may ensue." "You cannot fix scattering fog with a fan," which also appears as "Building bridges to the clouds," or "Bailing out the, sea with a shell." While, in case of a failure in any such attempt, consolation is conferred with "After all your own heart makes the world."

A Change.

Parrot-Do you believe in evolution? Tigerskin-I should say I did. Last year I was roaming the mountains as free as the air; now I'm posing on the carpet-made up into a rug!

mated couples in this country who may desire a legal separation to go to Canada to obtain it. Recently published statistics show that during one generation of thirty-four years-those preceding the year 1901-the divorces granted in Canada numbered only sixty-nine. In the United States during the same period the number of divorces was almost 700,000. The population of the United States has averaged twelve times that of the Dominion, while its divorces were 10,000
