Judge Doan of Rainier transacted business at the county seat Tuesday, and visited the town of Houlton. He says he has 1200 feet of water front for sale in Rainier and also some good locations in St. Johns. The judge is a hustler on the real estate transactions.

The county court will make the tax levy at their next regular meeting. The levy should be cut down materially this year. The road levy should not exceed 3 mills and the levy for the general fund should not be more than half what it was last year. A levy of 17 mills for all purposes should be sufficient this year.

Messer Nowles, Woodard, and others are hauling rock out on the county road West of Houlton. The work is being done by the teamsters. The town of Houlton should appropriate \$100 or so much as is needed and give the road a coat of gravel between the railroad track and Milton creek bridge. We are informed that St. Helens will put crushed rock on the county road running through the City—the county furnishing the rock. This seems like a fair proposition for both towns and county.

There are a few people who seem to think that because the main street in the town of Houlton was laid out as a county road that the jurisdiction over it and that they cannot enforce the building of a sidewalk. If this proposition is true the town council has no jurisdiction in any manner, and any offense that might be committed in the county road could not be punished under an ordinance of the town. Gentleman it is time to quit quibbling and get down to business. This town is either incorporated or it is not. If it is, certain sections of the charter give the town exclusive jurisdiction over the county road. Paragraph 8 of section 16 of the charter provides that the council shall have power to "open and improve the roads, streets, lanes, avenues, and alleys of the Town."

Judge Hattan was over Wednesday and said that they would have to shut the crusher down as it would not crush the rock fine enough for a top dressing to the road without going to the expense of making a new pattern for the toggle. Well we are pleased to learn that after a year and a half experimenting on the machine they have at last found out that the machine was not intended to crush the rock fine enough for top dressing. Now so far as making a road bed is concerned, that can be made better without a crusher than with it, hence we find that the crusher has outlived its day and generation. It accomplished a political work, even if it cannot be used for building roads.
