WORLD'S SUPPLY OF PINS.

Complicated Machine Has Greatly Simplified the Manufacture.

Though the demand for pins the world over is enormous, the mills of

the United States practically supply the entire demand, says the New York Herald. Formerly pins were expensive, but now they cost a mere trifle. In 1905 the 75,000,000 people in the United States used 60,000,000 gross of common pins, which is equal to 9,500,-000,000 pins, or an average of about 126 pins for every man, woman and child

in the country. This is the highest about seventy-two pins each.

In a single year the total number of pins manufactured in the United States was 68,889,260 gross. The total number of pins manufactured in the Unit-Yes, you might," interrupted an old ed States during 1900, the census year, farmer in the audience; "but if you did was 08,880,260 gross. said a tobacconist, "using the earth for a pipe. This benighted savage, when the tobacco hunger seizes him, selects a piece of clayey soll about a foot square, and puts a curved twig therein, so that both ends stick out. Then he builds a fire over the place, and when the fire has sufficiently hardened the clay, he draws out the twig, and a channel, a kind of pipe stem, is left. One end of the channel he hollows into a bowl. The other end is his mouthpiece. He puts his tobacco in the bowl, drops a live coal on top, and, lying down, falls to. The Kaffir sucks away vigorously, and very black and strong are the fumes that enter his large mouth. He will not use an ordinary pipe. He likes his own way of smoking best. He is ,I suppose, the only smoker whose pipe is the earth." -St. Louis Globe-Democrat.

by WATER POWER

THE COLUMBIA HYDRAULIC RAM

PUMPS AWAY UNCEASINGLY WITHOUT ANY ATTENTION

THE COLUMBIA HYDRAULIC RAM is a simply constructed and I inexpensive machine that can utilize a small fall of water for the purpose of raising a portion of it to any desired height. It is the farmer's friend in the "dry season" and is indispensable to those owning land high above ditches. It will furnish water for domestic purposes, even elevating pure water of the spring by means of the impure or muddy water, as found in some streams. Requires no attention. Practically no cost of maintenance, there being no parts to get out of order. A ram will pay for itself in a short time. Every ram installed is giving utmost satisfaction. We keep a large stock constantly on hand. Write to our Hydraulic Department today for illustrated literature.
