CAPITAL PUNISHMENT.

VARIOUS METHODS OF EXECUTION PRACTICED IN THE WORLD.

A Serious Matter of Consideration for Lawyers—The Guillotine, the Garrote, the Gallows and the Gun—Silent Death by Electricity.

The execution of malefactors has been a serious matter of consideration for lawyers in all nations and in all times. The more barbarous the people the more barbarous the method.

The guillotine was designed as a labor saving machine during the Reign of Terror by Dr. Guillotine, who was a member of the Constituent assembly in 1789.

The apparatus is very simple. Between two uprights slides a triangular knife, weighted at the upper edge. It is held in position by a catch.

The garrote is worse to my notion than the guillotine, though but little blood is shed. The felon sits in a chair. To a stout post behind him are affixed two clasps of iron, which when joined encircle his neck.

Electricity is the swiftest and most certain of all possible means by which death may be inflicted. Ninety-five feet a second is the estimated speed of nerve sensibility.

Electricity travels 180,000 miles in a like space of time. The brain is paralyzed before it can feel the shock, the victim of the current passes from life to death without knowing the blow.
