A GOLDEN OPPORTUNITY.

The matter of bringing the waters of Hood river through the west side of shape, and will be presented to the farmere by some of the parties to the project, for their indorsement and assistance. The money is forthcoming to put in a ditch that will carry at least 3,000 inches of water, and this is proposed to be furnished at a figure, that compared to the benefit accruing, is but a trifle. More than all else that commends the project to us all is the fact that the money is to be furnished by a gentleman who has recently made his home among us, assisted by ourjown people. It is conceded by all that, in the present condition of our community, it is almost an impossibility for us to construct a ditch for ourselves and hence it is the part of namental pins, veiling etc., In fact wisdom to do the next best thing, encourage the investment of the capital nery store. My prices will speak far from elsewhere. As we understand better, the proposition about all that will be asked by the company is the right of way, and the agreement to pay a small amount upon the ditch reaching a certain stage; this amount to be credited on the water account of the parties advancing it when the ditch is constant and shoes and shoes, hats and account of the parties advancing it when the ditch is constant and shoes and shoes, hats and account of the parties advancing it when the ditch is constant and shoes and shoes, hats and account of the parties advancing it when the ditch is constant and shoes and shoes and shoes and shoes are shown in the short and should be continued until all is the continuous residuant results and should be continued until all is the continuous residuant results and should be continued until all is the continuous residuant results and should be continued until all is the continuous residuant results and should be continued until all is the continuous residuant results and should be continued until all is the continuous residuant results and should be continuous residuant results and the continuous results are p omise to use at least a small amount best of the kind in the city. Most of named withers have their notice of their interof the water. This is the golden opportunity and should be seized by all.

There seems to be a general impression that a large amount of water is required. that a large amount of water is requir- be positive and continue until everyed, to irrigate a farm, yet the regula- thing is sold and disposed of, tion in the water districts of California, show that even in the dry climate the amount required for an acre is very smad. At Ensenado, the allowance which is said to be abundant, is one chew?" inch of water for three acres, and in other districts the amount is placed even as low as one inch to ten acres. It will be seen from this that at one doing per month per inch, which would be the maximum charge the would be the maximum charge, the cost of irrigation per acre for three months, (which would be as long as needed in most cases) would be one dollar. It is worth that much to see the water run. To discuss the vast Oh, it is partly habit, partly the result propagilities of the valley with a of necessity, broken or defective teeth. thorough irrigation system is not the etc. Next time you sit down to table ooject of this article. Its benefits are incalcuable, and we sincerely hope that every and owner in the valley will do all in his power to make it, what it well, judge for yourself."-Interview in should be, a unanimous success. The Detroit Free Press. right of way, and good will is about all that is asked by those proposing to construct the ditch, and surely we can do no less than to grant both freely.

The GLACIER is more than pleased to see that its efforts towards getting the lightning, clapping his hands at each waters of Hood river brought through flash and exclaiming, "Bonnie!" the valley are in a fair way to be suc- But a story of the same kind, with cessful, the whole matter now resting Schiller, the German poet, as the hero, with our land owners.
