TREES

MASTIFF

There is always a best even among a score of good things, and every pipe smoker who has tried the Mastiff brand acknowledges it to be the sweetest, coolest smoking tobacco made. It does not bite the tongue, and is positively free from any foreign mixture.

J. B. Pace Tobacco Co., Richmond, Virginia.

"August Flower"

For Dyspepsia.

A. Bellanger, Propr., Stove Foundry, Montigny, Quebec, writes: "I have used August Flower for Dyspepsia. It gave me great relief. I recommend it to all Dyspeptics as a very good remedy."

Ed. Bergeron, General Dealer, Lezou, Levis, Quebec, writes: "I have used August Flower with the best possible results for Dyspepsia."

C. A. Barrington, Engineer and General Smith, Sydney, Australia, writes: "August Flower has effected a complete cure in my case. It acted like a miracle."

Geo. Gates, Corinth, Miss., writes: "I consider your August Flower the best remedy in the world for Dyspepsia. I was almost dead with that disease, but used several bottles of August Flower, and now consider myself a well man. I sincerely recommend this medicine to suffering humanity the world over."

THE EGGS OF MURDER.

How They Are Scattered About by Thoughtless and Careless Men.

"The causes of capital crimes," said a Tomba lawyer to a party of friends at a restaurant table the other night—"that is, the real and immediate causes—are frequently overlooked by jurists. Just listen to that man at the table over there. Got a voice like a horse fiddle. He is letting the whole room know the list of hereditary diseases that affect his family. It would be a blessing to humanity if that man was shot dead as a hammer, yet his slayer would be charged with manslaughter and probably convicted by a jury of the crime. I tell you that the words of that curio will grate upon some ears in this room tonight, and will probably derange for the time being some sensitive physical organism, under the influence of which a vindictive act will be committed that will perhaps cause lifelong regret if not a punishment by law.

"A client of mine was once charged with murder in the first degree. The statement presented by the prosecution was that the prisoner had had a difference with an acquaintance. Two weeks afterward he met this acquaintance coming out of an uptown cafe after dark, drew a revolver immediately and shot him to death. The difference referred to was in itself absolutely trivial. It had resulted from an argument over the relative merits of Langtry and Mrs. Brown Potter. They had actually parted good friends, but their high words on one stage of the argument had been overheard.

"Now, on the night in question my client had gone into a restaurant for dinner. One of those creatures with the delicacy of a rhinoceros sat at the next table. He had been attached to a sheriff's office once upon a time, and immediately upon sitting down he began to tell the man near him of the hangings that he had witnessed and the details of the revolting crimes for which the prisoners had been hanged. My friend was at about the middle of his dinner. The words of the brute were like so many leaden balls dropping down into my client's stomach. He tried to continue, but he could not choke down more food. In desperation he called for a glass of brandy and then another glass, and before he left the place he had taken a half dozen large doses in quick succession.

"That morning in starting out he had put a revolver in his pocket, intending to sleep at the house of a friend in the country, the way to which lay through a lonesome piece of woods, which he would have to pass late at night. As he left the restaurant he thought of taking the train, and putting his hand in his overcoat pocket he found the weapon.

"Just at that very moment the acquaintance approached, and what really happened was this: My client went up to the other and said, 'Charley, I feel so desperately miserable that I almost could commit murder or suicide. See here, I have a pistol too. In trying to take the weapon from his pocket it became entangled in the cloth. An explosion followed and one of the men fell dead.

"I exhausted my powers of speech upon the jury, and after proving by hygienic experts how talk of the kind referred to would act upon a sensitive man, succeeded in securing a verdict of manslaughter. The man ought to have been acquitted!" New York Recorder.

AMATEUR GARDENING.

ATTEMPT OF A CITY MAN TO GROW HIS OWN VEGETABLES.

Success After a Season of Apparently Hopeless Failure—The Trouble with Books That Treat of Farming and Gardening—How He Learned.

Unreservedly I want to give my experience with a kitchen garden. I had never tried anything of the kind before and a more absolutely ignorant person as to horticulture and gardening generally never placed a spade in the earth or turned up a grub worm. I had no one to lean upon for instruction and therefore I attempted to make a vegetable garden of about half an acre, with no other assistance than that furnished in the books on the subject.

These books utterly fail to take into account the fact that city bred people know nothing whatever about tilling the earth, sowing seed and stimulating the growth of plants. I was that kind of a person and rashly attempted to make my own garden.

I am very glad, however, that I made this attempt, for I learned, after the many grievous failures in the first season, that these books really did have a meaning and that most of them were full of sound advice, but they were not written for absolute beginners, but for those who understood their technical jargon and who had also had more or less experience.

For instance, when I read in my book that I should plant this seed in drills and that in hills I was as ignorant as before, and did not know what to do. But I did what seemed to me to be intelligent, and in most cases I was wrong. The greatest mistake I made was in planting everything too deeply and also in using too many seeds. And right here I had as well give a rule about planting which I learned from Mr. Burnett Landreth, of Philadelphia. There may be exceptions to this rule, but for the moment I do not recall any, except that of green peas, and that exception is only a qualified one.

In planting seeds cover them with earth to a depth equivalent to four times the diameter of the particular seed planted. In regard to peas, old fashioned gardeners will insist that they must be buried very deeply, else the yield will be poor. This is quite true in regard to peas planted for very late crops, for the roots of such must be deep enough to withstand the withering sun of midsummer, but for the early varieties it is a decided disadvantage to put the seed down so far that the heat of the spring sun cannot readily reach them.

AMATEUR GARDENING.

The Gentle Art of Husbandry.

But I am way ahead of my story. My purpose in writing this is to encourage gentlemen living in the suburbs to cultivate their own gardens. The first season nearly everything failed, though I did get some lettuce, tomatoes, potatoes and cucumbers. Indeed, I got all that we needed of these. During the succeeding fall and winter I literally went to school to every gardener and farmer I came in contact with. From the gardeners I got as a rule very intelligent advice, and this I put into my book in the shape of marginal notes.

From the farmers I got little information worth the having. They seemed to think that for the likes of me to expect that garden truck would grow was little less than presumptuous. Well, with this information, added to my experience and that set down in the books, I made a regular plan for my second garden, and a very attractive map it seemed when it was finished.

I did not attempt to economize space, because I had more than I needed, and I therefore laid off beds with paths between each and broad paths at either end. These beds were thirty feet long and four feet wide, the paths between being a foot and a half wide, and those at the ends three feet wide.

BETTER RESULTS.

I so apportioned my beds that I should have all the vegetables I wished in season. I tried peas, tomatoes, lettuce, spinach, radishes, squashes, sweet corn, peppers, bush beans, lima beans, cucumbers, parsley,okra, eggplant, cauliflower, cabbage, carrots, celery, onions, garlic, salsify, potatoes, musk and water melons. I succeeded admirably with all of these ventures except with the melons. Either the ground is not favorable for the growth of these or the season was bad, or what is quite likely, I have not learned the knack of cultivating them.

The cost was nothing at all. I don't count the labor I put on the garden as an outlay at all. It was an income rather. It took the place of a saddle horse, a bicycle or a gymnasium, for during all the time that I was working in the garden I put in as many hours at my desk as it was wholesome for one to do, and this outdoor work was exercise which was really needed.

I paid money for manure and other fertilizers, it is true, and also for seed, but in balancing my books I found that the ten bushels of onions and the twenty bushels of potatoes I sold more than paid for my outlay in money. The fact is that I was some six or seven dollars ahead, besides the summer supplies and winter stores.

Now, what I have done any man can do who can put in an hour and a half every day with spade and hoe and rake. The difficulty with beginners at gardening is that they are too easily discouraged, and give up because they do not achieve at the first attempt results like those accomplished by the skillful professional gardener.—New York Telegram.

AMATEUR GARDENING.

The Voice of Affliction.

One of S. C. Goodrich's stories is as follows: "Madam," said the Connecticut minister to the widow, "it is a painful subject—but you have recently met with a severe loss." "Yes, doctor," applying her apron to her eyes, "and I try to bear it with submission, but, oh, doctor, I sometimes feel in my heart—Goosey, goosey gander, where shall I wander!"

AMATEUR GARDENING.

Redded About by a Proscriptive Tivoo.

I am not aiming to convince mental babies, as indeed that would be fruitless without the necessary cultured intellect that makes logic applicable. Force, brilliancy and originality even are no weapons to attack a slavish life. For many centuries the medical art was fettered about by a proscriptive taboo which it, as yet, has not survived. The brand for murdering truth is the penalty of imbecility stamped upon the mental caliber of the average individual—in relation to medicine and medicine men. The sun of the nineteenth century has not yet dawned upon his intellectual horizon. He, together with his ideal medicine man, still hibernates in the good old days of the dark ages, when it was had form to be topicality. He still "believes" in bleeding, blistering, vomiting, purging and sweating. He loves copious doses of horse medicine. He delights in ammonia and calomel and carbolic acid. They are considered indispensible to well regulated families, with piggy intellects and abdominal development, considers itself safe without those family lasses. These I do not wish to convert; they are the Rip Van Winkles that will continue to slumber through this and probably through the next century. They play no role in the world's history. They live; they die. No monument marks their forgotten sepulcher. Humanity was not enriched by their existence. It has lost nothing by their exit. They are driftwood on the shores of time, and float with the wind of their autophagous ancestry. No, it is not from these I wish to address myself, but to the thinking ones, whom a thought does not throw into an epileptic paroxysm, who love knowledge for its own sake, who are willing to investigate the truth or falsity of any proposition, and, once convinced, will stand by it through all the grimaces of chattering and delayed civilization. To these—not the chattering, but the thinkers—I recommend the Histogenetic system for investigation, and will elucidate with pleasure any question not so generally cleared in books, which will be sent free to any address.

Dr. Jordan's office is at the residence of ex-Mayor Yesler, Third and James streets, Seattle, Wash. Consultations and prescriptions absolutely free. Send for free book explaining the Histogenetic system.

CAUTION.—The Histogenetic Medicines are sold in but one agency in each town. The label around the bottle bears the following inscription: "Dr. J. Eugene Jordan, Histogenetic Medicine." Every other device is a fraud.

The people in this world are so much alike that if you aim at one man you hit a hundred.

INVIGORATE THE DIGESTION.

BRANDRETH'S PILLS invigorate the digestion and stimulate the torpid liver and bowels; they cleanse the blood and impart new vigor to the body. One or two every night for a week will usually be all that is required. For Constipation or Dyspepsia one or two taken every night will in a short time effect an absolute cure.

BRANDRETH'S PILLS are purely vegetable, absolutely harmless and safe to take at any time.

Sold in every drug and medicine store, either plain or sugar coated.

The Mesmerian's "cure for the drink habit" was entirely successful—"quit yer durned drinkin'!"

Use Enameline Stove Polish; no dust; no smell.

TRY GERMEA for breakfast.

Dr. Williams' Indian Pile Ointment will cure Blind, Bleeding and Itching Piles when all other ointments have failed. It absorbs the tumors, allays the itching at once, acts as a positive, gives instant relief. Dr. Williams' Indian Pile Ointment is prepared only for Piles and Itching of the private parts, and nothing else. Every box is warranted. Sold by druggists, or sent by mail on receipt of price, 50c and 10c per box. WILLIAMS' MANUFACTURING CO., Proprietors, Cleveland, O.

ONE ENJOYS Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation permanently. For sale in 50c and \$1 bottles by all druggists.

CALIFORNIA FIG SYRUP CO. SAN FRANCISCO, CAL. LOUISVILLE, KY. NEW YORK, N. Y.

SEEDS Of all kinds and in any quantity—wholesale and retail—at low prices.

E. J. BOWEN, 65 Front Street, Portland, Or. Send for catalogue.

J. McCRAKEN & CO., DEALERS IN—Reche Harbor Lime, Portland Cement, Golden Gate and Utah Plaster, Hair, Fire Brick and Blue Land Plaster. 60 North Front Street, Cor. D, PORTLAND, OIL.

Dr. Price's Cream Baking Powder. A Pure Cream of Tartar Powder. Superior to every other known. Used in Millions of Homes—40 Years the Standard. Delicious Cake and Pastry, Light Flaky Biscuit, Griddle Cakes, Palatable and Wholesome. No other baking powder does such work.

THE COST IS THE SAME. THE HARTMAN PATENT STEEL PICKET FENCE. Costs no more than an ordinary clumsy wood picket fence, but it will not rot or fall apart in a short time. The "Hartman" Fence is artistic in design, protects the grounds without encircling them and is practically everlasting. ILLUSTRATED CATALOGUE WITH PRICES AND TESTIMONIALS MAILED FREE.

HARTMAN MFG. CO., Beaver Falls, Pa. BAKER & HAMILTON, SAN FRANCISCO, CALIFORNIA. [Always mention this paper in writing.]

PISO'S REMEDY FOR CATARRH.—Best. Easiest to use. Cheapest. Relief is immediate. A cure is certain. For Cold in the Head it has no equal.

It is an Ointment, of which a small particle is applied to the nostrils. Price 50c. Sold by druggists or sent by mail. Address: E. T. HAZELTINE, Warren, Pa.

"PUNCH" says: "Ought to be done?—Ought stands for nothing." The house ought to be cleaned with Sapolio. Try a cake in your next house-cleaning and be convinced.

"IGNORANCE of the law excuses no man," and ignorance is no excuse for a dirty house or greasy kitchen. Better clean them in the old way than not at all; but the modern and sensible way is to use SAPOLIO on paint, on floors, on windows, on pots and pans, and even on statuary. To be ignorant of the uses of SAPOLIO is to be behind the age.

AMATEUR GARDENING.

Attempt of a City Man to Grow His Own Vegetables.

Success After a Season of Apparently Hopeless Failure—The Trouble with Books That Treat of Farming and Gardening—How He Learned.

Unreservedly I want to give my experience with a kitchen garden. I had never tried anything of the kind before and a more absolutely ignorant person as to horticulture and gardening generally never placed a spade in the earth or turned up a grub worm. I had no one to lean upon for instruction and therefore I attempted to make a vegetable garden of about half an acre, with no other assistance than that furnished in the books on the subject.

These books utterly fail to take into account the fact that city bred people know nothing whatever about tilling the earth, sowing seed and stimulating the growth of plants. I was that kind of a person and rashly attempted to make my own garden.
