### A Bird Entirely.

Our neighbor, Phelps, is the owner of a rooster that is a cross between an ostrich and a dodo. He is so large that he has to roost on a stone wall, and he has a voice that is a blending of all the bad qualities of a steam calliope and a fog horn. The ungainly creature comes off his perch as soon as the lights in the residences are put out, and proceeds to crow from that time until sunrise. Late he has acquired the habit of sticking his measly head over our front fence, resting his neck between the pickets, and bracing his "peope's nose" against a convenient oak tree, while he rolls out a trumpet call that would make the angel Gabriel jealous, or the paternal parent of the lowly mule ashamed. He is large enough, and certainly tough enough for a democratic barbecue, and if stuffed with his own voice, would feed a multitude. We have often heard of "the cock's clarion call," but this old sounder swallowed someone's clarinet that still sticks in his throat like Macbeth's amen; a clarinet with a cracked reed and the stops knocked off. There is no gun in the community big enough to kill him, and he and his voice will probably remain and abide with us, unless indeed we can get our Colorado friends to include a petition for his demise, in their prayings for those other birds, the congressmen of the United States. Nothing short of that would kill him.

**At The Summit.**

Wednesday Doug Langille took Mr. Whitefield, S. E. Bartness and Frank Watson to the summit of Mt. Hood. While there a party from The Dalles joined them coming up the south side of the mountain, the latter being five in number made a party of nine on the summit at once. As they started down, another party of six was seen coming up the south side, but as they were only half way up at 1:30 it is not likely that they reached the top.

**These May Teach.**

At the teachers' quarterly examination, held here last week, certificates were granted as follows: First grade: Charlotte T. Roberts, Anna M. Roberts, Anna Sears, H. L. Howe.

Second grade: Grace Graham, Agnes Le Due, Catherine Martin, Dollie Mosier, May Elton, Mrs. Belle Howe.

Third grade: Nellie E. Foss, Ida M. Foss, Emma Roberts, F. H. Isenberg.

**A Protest.**

EDITOR GLACIER: Please say a word in behalf of the farmers on the east side in reference to the game birds. We ought to have some rights after allowing the grouse and other game birds to brood and raise their young upon our premises, but instead, in our busy season of harvest, outside parties raid our fields with gun and dogs, making the Sabbath their especial sporting day. Hereafter parties will find notices put up warning trespassers off, and they will do well to heed them, as the law will be enforced.

**Oreard and Garden.**

When a tree is healthy the top is luxuriant.

Late cultivation in the orchard is rarely desirable.

Do not waste time and labor working with poor trees and plants.

When an apple or pear is mature it readily parts from the tree.

Chestnut trees will come into bearing when 3 years old; they do best planted in groups.

Regular pruning obviates the necessity for cutting away large limbs and insures better fruit.

The secret of profitable apple culture is to cultivate thoroughly and feed the trees liberally.

The presence of borers may be readily detected by their chips near the roots of the trees. See that they are destroyed.

Grapes begin to change color two or three weeks before they are fully ripe.

An application of wood ashes is considered one of the very best remedies for pear trees that bear cracked pears.

Pears ripen best in the dark. They should be picked when matured and carefully ripened by placing them in shallow boxes or drawers and storing in a dark place, well ventilated.

Thin out the old canes of currant bushes. A half dozen well developed stems will produce as much fruit, and that of better quality, than of twice the number of weak crowded ones.

No matter at what season the trees are set out, it is important that good care be taken to pack the earth firmly about the roots before leaving the tree.

In transplanting trees all the roots that may have become broken or bruised in the process of lifting should be cut clean away behind the broken part. Make the cut clear, sloping one in an upward direction.

The peach and plum are so nearly related to each other as to be budded or grafted on each other. The plum endures the cold better than the peach, and the latter grown on plum stocks, can be much more easily protected than grown on its own.

**A Boating Party.**

Miss Irma Coe gave a boating party on the steam packet, Irma, last Friday to Memaloose, island. The party consisted of Misses Theresa Morse, Florence Champlin, Maud Gilbert, Carrie and Lillie Shutes, Lucy Ellison, and Ida Nickelsen. The weather was perfect, and the young people expressed themselves as delighted with the trip.

C. L. Giblert, P. A. Snyder and Judd Ferguson went to Lost Lake this morning.

If you want to be located on government land at small expense, call or write W. R. Winans.

### District Fair.

The next annual meeting of the Second Eastern Oregon District Agricultural Society,—or words to that effect—it being commonly known as The Dalles fair, will begin October 10th and last for five days. The premium list can be had by writing the secretary at The Dalles. Heretofoe Hood River has always made a handsome fruit exhibit, and carried away a goodly number of premiums. This year should be no exception and our fruit should be exhibited, not for the premium, but for the advertisement, the premium being only an incidental.

Wax strings, tin cans, new stoves, preserving kettles and everything else at T. S. Dallas.

### Cheap Homes, Secure one Now.

For 60 days I will show government lands in Hood River valley, suitable for homesteads, to parties wishing to locate, charging from ten to twenty dollars per claim for my services. I settled on government land six years ago, at the falls of Hood river, and live there now; am well pleased with the location, have spent much time and money building roads and bridges leading to these lands, and to improve the country. These lands have plenty of wood and water, and are among the best for fruit and vegetables, as well as for general agriculture. If you want a home of this description, do not fail to see me at the falls.
