

Hood River Glacier.

SATURDAY, NOVEMBER 3, 1894.

The president has appointed Thursday, November 29th, as Thanksgiving day.

Next Tuesday the congressional elections take place in nearly all the states. It is expected the republicans will make sweeping gains if they do not control the next house. Republicans everywhere are united and pulling together. Their success will not prove that the party are tired of tariff reform, for that party will still be in the minority when the votes are counted even if they obtain control of congress. If the issue was plainly between the McKinley law and the present tariff law, the latter would be sustained. The friends of the present law are divided on other questions, and because of this division republican victories will be easy, but it will not be conclusive that the people want the McKinley law again.

Fruit men are busily engaged now-days preparing the ground for planting trees. The acreage in orchard in Hood River valley will be greatly enlarged, probably doubled, this fall and spring. The craze is all for apple trees, and there is a good deal of inquiry among business men regarding the best kinds to plant. This question puzzles older ones in the business. The Yellow Newtown is a general favorite because of its good-keeping qualities, but the markets seem to demand red apples. The Ben Davis is a handsome red apple and always sells well. It is a long keeper and not good to eat till spring. The tree is hardy, bears every year, and the fruit seems less affected by codlin moth than some varieties. The Spitz-enturg is an excellent apple and a good keeper, but the tree is not so hardy nor so productive as the Ben Davis, and the codlin moth seems to get in his work on this apple more than some others. The Baldwin is well liked by everybody. It is a handsome red apple and keeps through the winter. Some one has said that if he were to set an orchard of 1000 apple trees he would plant 999 Baldwins. Upon being asked what variety the one thousandth would be, he answered, after thinking over the list of favorites, "Well, I believe I'd make it a Baldwin." This apple is not always profitable here, for the reason that the fruit is apt to be speckled; it is more apt to be so on young and thrifty growing trees. But if you have soil of a like nature to that of Wm. Boorman and M. V. Rand, the Baldwin will be as profitable variety as you can plant. The winesap is a deep red apple, sells well, and the tree is hardy and very productive, but the fruit is generally too small for the reason that the tree overloads itself. There are other varieties that are favorites with fruit growers here, and the GLACIER would like to publish the opinions of persons who have had experience with the different kinds of apples in this valley. In the meantime let the good work of planting trees go on. Confine your orchard as near as possible to one or two good, long-keeping varieties of apples, and you will make no mistake.

The Dalles Robbery. On Sunday last Frank Klein and Ots Savage were arrested at The Dalles for the robbery of the express office on the night of October 13th. Klein made a full confession and told where the money was secreted, all of which was recovered except \$200. Sheriff Dryer and Sam Simmons, the Portland detective, worked up the case in a manner deserving great praise. Klein, in his confession, also implicated Ralph Gibbons, and he was arrested Monday. Klein and Savage were both born and raised in The Dalles and are each about 25 years old.

The preliminary examination of these men began Wednesday before Justice Davis. The state was represented by Prosecuting Attorney Jayne and Deputy Phelps, and Zera Snow of Portland, attorney for the express company. H.S. Wilson and Huntington and A. S. Bennett appeared for defense.

Frank Klein was called by the state. After being sworn he told how Ots Savage, Ralph Gibbons and himself had planned the robbery. Ralph Gibbons was at first not inclined to take any part in the robbery, because, as he said, he had a family to look after. Then Frank testified that Gibbons said, "Well, I have to rob some one before spring." The signals which Gibbons was to give in case the money was in the treasury box were agreed upon. On the night of the robbery Frank went to bed about 8 o'clock, he testified, and Savage woke him shortly after 10 and informed him that coin was to arrive that night by express and that they could get it. Frank got up and both proceeded down town. In the alley back of the old Sun office they got the iron with which the treasury box was opened. They then secreted themselves near the express office, and soon the express wagon came up with Frank Hill and Ralph Gibbons on the seat. After the express matter had been put in the express office Ralph Gibbons gave the signals agreed upon, and he repeated them as the express wagon drove off. As soon as the wagon was out of sight Klein and Savage came out of the alley and proceeded to the express

office. Klein unlocked the door with a key which he had fashioned after the one given him by Gibbons. Once inside the office they hunted up the treasure box, and after two attempts broke it open. There were five sacks of coin in the box. They took four sacks and went north on Washington street until they came to an alley, which one of them ran up, where he dropped the card found next day. They then went around the Cosmopolitan hotel to an old shanty, where the money was thrown. After doing this they went to Klein's home and retired.

Klein, Savage and Gibbons are also charged with robbing The Dalles post office about a month ago.

A Storehouse of Information. This is an age of encyclopedias, and their value is not to be questioned, but the average person is far too busy to spend time in poring over encyclopedias, and will consult a dictionary a hundred times to a cyclopaedia once. Nor will much be lost either, if the dictionary is Webster's International Dictionary, which contains a wealth of information, making it really an encyclopedia, condensed, it is true, but all the more valuable for that very reason. In fact, the International should be considered a necessity in every family (though the style in which it is presented makes it a luxury as well), and a saving of three cents a day for a year will provide more than enough money to purchase it. The publishers, G. & C. Merriam Co. of Springfield, Mass., cheerfully send free a prospectus containing specimen pages, which in itself is well worth a careful reading.

A writer in Pacific Farmer says Jno. T. Browning of Clatsop experimented with onions this season as follows: The seed was sown in a cold frame March 27th, and the young onions transplanted and set in rows in rich, moist, well-tilled land May 14th, and received ordinary cultivation. A dozen of the onions selected at random and shown to the correspondent weighed a pound apiece. Mr. Browning thinks that by his method of cultivation he can easily raise 1000 to 1200 bushels per acre.

We wish to call the attention of a few unsophisticated people, if any of them are readers of the Farmer, that they are liable to be disappointed when they send to the state board of horticulture for "a few lady birds or children are so fond of pets," that the lady bird of horticultural fame is a bug that feeds upon fruit pests and not a fowl with feathers.—Pacific Farmer.

About two weeks ago Frank McFarland was taken ill, which complaint soon developed into appendicitis. Last Friday he was taken to the Good Samaritan hospital, accompanied by his wife and W. B. Potter and yesterday a Gazette reporter learned that an operation had been successfully performed. The disease, which is an inflammation of the vermiform appendix, is very dangerous, but skillful physicians now handle the disease very successfully. It is to be hoped that Mr. McFarland will speedily recover.—Heppner Gazette.

The arrest of the express robbers it is to be hoped will break up a gang of robbers who have committed depredations in this city for a number of years past, and that our people will feel more secure in their persons and their property. That men so young should have the cleverness to mature such schemes, and carry them almost to success, is no matter of surprise when the fact is known that cheap literature of the most sensational kind is the only brain food that is furnished very many boys during the formative periods of their characters. The time in life when children should be taught habits of industry and honest traits of character is spent among the police court or reading five-cent novels. "Just as the twig is bent the tree is inclined" is as true of the human species as it is of the vegetable kingdom. If boys were taught the dignity of labor by practical experience, and debarred from trashy reading matter, they would develop into better, more stalwart men in every regard.—Times-Mountaineer.

"Appearances are sometimes deceptive," and sometimes folks get too much of a good thing when they buy four to seven foot trees that have been forced and often irrigated, so that they do not ripen up their wood properly. Several of our fruit men bought such trees last fall, and some of them died back clear to the ground. Better get a shorter, harder hom e-grown tree.

This seems to be a good year for school mums to abandon single cuss edness. Nearly all of the ladies who have been married in this county within the last year were school mums. There seems to be quite a boom in marriages this fall, which probably is an indication of a cold winter.—Condon Globe.

A Bright Lad,
Ten years of age, but who declines to give his name to the public, makes this authorized, confidential statement to us:
"When I was one year old, my mamma died of consumption. The doctor said that I, too, would soon die, and all our neighbors thought that even I did not die, I was so never be able to walk, because I was so weak and piny. A gathering formed and broke under my arm. I hurt my finger and gathered and threw one piece of bone. If I hurt myself so as to break the skin, it was sure to become a running sore. I had done me so much good as Ayer's Sarsaparilla. It has made me well and strong."
T. D. M., Norcutt, Kans.
Ayer's Sarsaparilla
Prepared by Dr. J. C. Ayer & Co., Lowell, Mass.
Cures others, will cure you

Making Apple Butter.
Take new cider, fresh from the press, not yet fermented; put it into a porcelain-lined kettle and boil until reduced one-half. Boil the cider the day before you make the butter and boil all that you need for the quantity desired. As soon as one kettle has been boiled, take it out and boil another. This must be watched carefully, that it may not scorch or boil over. To each four gallons of boiled cider allow a half bushel of nice juicy apples pared, cored and quartered. The apples should be one-third sweet and two-thirds sour apples. Now, when ready to make the apple butter, fill two-thirds full with the boiled cider as you can keep moist; allow this to stand and cook very slowly on the back part of the stove, stirring almost constantly, until the apples are soft and of the consistency of marmalade and the color is a very dark brown. If you cannot add all the apples at first, after a portion of them are cooked, add a few more, and so continue until it is the proper consistency. Keep out a portion of the boiled cider; in case the butter becomes too thick you can add a little to thin it down. Twenty minutes before you have taken it from the fire—and remember, long, slow cooking is necessary to insure good keeping qualities—add to each gallon of cider used a teaspoonful of cinnamon and one-half a grated nutmeg. Do not add sugar.

When it has the proper appearance of being just the right consistency, is dark in color, drop a tablespoonful into a saucer and stand it aside; if it retains the consistency, the liquid not running over the saucer, it is ready to take from the fire; but if it separates in the saucer, making a sort of a sauce, the liquid part running around, cook longer. When done, cool; when cold put into tumblers or jars and cover closely.—Grange Homes.

Baked Quinces.
Does every one know the virtues of baked quinces? Our grandmothers did—that is to say, they roasted quinces on the hearth in front of the coals. In these degenerate days of ours you proceed as follows: Choose quinces nearly or quite ripe, rub off the down, or "fur," as their innocent vegetable coat is sometimes called, and pack closely in an earthen baking dish. On no account pare or core them—the very thought is treason. Add a half cupful of water and bake in a moderate oven for three or four hours—half a day is not too much. When they are perfectly tender, skin and all, cut them up as you would apples, cutting as close to the core as possible. Sprinkle liberally with sugar as you proceed, and pour the juice in the dish over the whole. Serve ice-cold; if with cream, so much the better. It is a dangerous thing to begin baking quinces before you have put up your year's supply of jelly—there is likely to be no jelly.—Pacific Farmer.

Plant an Orchard.
Don't be like the man who refused to plant because it would take so many years before they came to bearing, but whose son, when he grew to manhood, planted an orchard and the old man lived to eat of the fruit of it. Rather be like the other Hood River man who told his boys that if they would clear the ground he would buy them the trees to plant themselves an orchard. These boys will be a great deal more likely to stay on the farm and make successful fruit growers than the son of the man who refuses to plant.

Land Decision.
Furnished by W. D. Harlan, Land Attorney, Washington, D. C.
Jerry Walkins Case.—An application to enter presented while the land in question is involved in the pending application of another should be held to await final disposition of the prior application.

Ass't Sec'y SIMS.
This seems to be a good year for school mums to abandon single cuss edness. Nearly all of the ladies who have been married in this county within the last year were school mums. There seems to be quite a boom in marriages this fall, which probably is an indication of a cold winter.—Condon Globe.

Bucklen's Arnica Salve.
The best salve in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter Chapped Hand, Chilblains, Corns and all Skin Eruptions, and positively cures Piles, or no pay required. STOCKHOLDERS' MEETING.
Notice is hereby given that the annual meeting for the election of officers of the Hood River Army Association will be held in Hood River, Saturday, December 1, 1894, at 2 o'clock, P. M. Also, for amendments to By-laws, and such other business as may come before the meeting.
C. E. MARKHAM, President.
W. H. BISHOP, Secretary.

NOTICE TO SETTLERS.
United States Land Office, Oregon City, Oregon, October 24, 1894.—Notice is hereby given that the approved plan of survey of township 1 south, range 6 east, has been received from the surveyor general of Oregon, and on December 18, 1894, at 9 o'clock a. m. of said day, said plan will be filed in this office and the land therein embraced will be subject to entry on and after said date.
ROBERT A. MILLER, Register.
PETER PAQUET, Receiver.

Petition to Incorporate.

To the Honorable, the County Court of the State of Oregon for Wasco County: We, the undersigned, being qualified electors residing within that portion of Wasco county herein described and bounded, do respectfully show that there are about four hundred, and not less than one hundred and fifty inhabitants residing within the territory at the southeast corner of the Nat. L. Benson Donation Land Claim, in section thirty-one (31), township 3 north, range 11 east, W. M., running thence north along the east boundary line of said claim to a point where the same intersects the north boundary line of Wasco county; thence westerly along the said north boundary line to a point where the same is intersected by the north and south section line of section twenty-six (26), township 3 north, range 10 east, W. M.; thence south to the southwest corner of the northeast quarter of section thirty-five (35), township 3 north, range 10 east, W. M.; thence east to the southeast corner of the northeast quarter of section thirty-six (36), township 3 north, range 10 east, W. M.; thence north eight (8) rods to a point; thence east to the point of beginning, being situated in Wasco county, state of Oregon; and that said territory is not incorporated as a municipal corporation.

Wherefore, we, the said petitioners, do respectfully petition and pray the county court of said county that said territory may be incorporated as the town of Hood River, in accordance with the provisions of an Act of the Laws of Oregon, entitled "An Act for a General Law for the Incorporation of Cities and Towns in the State of Oregon." (Signed)
Geo. T. Prather, C. J. Hayes,
W. M. Yates, H. C. Coe,

To Whom It May Concern:
The above petition will be presented to the County Court of Wasco county, state of Oregon, for its action thereon, at the next regular term of said court, on Wednesday, the 7th day of November, 1894.

FOR SALE.
40 Acres!
Near town, good land, plenty of water, at a bargain. Talk to me.
T. R. COON.

NOTICE FOR PUBLICATION.
Land Office at Vancouver, Washington, October 23, 1894.—Notice is hereby given that the following named settler has filed notice of her intention to make final proof in support of her claim and that said proof will be made before the Register and Receiver of the U. S. Land Office at Vancouver, Washington, on December 15, 1894, viz:
Ann Cameron,
Hd. 9271, for the southwest 1/4 southwest 1/4 section 2, southeast 1/4 southeast 1/4 section 3, and west 1/2 northwest 1/4 section 11, township 3 north, range 10 east.

She names the following witnesses to prove her continuous residence upon and cultivation of said land, viz:
F. Lane, W. Fordice and Mrs. M. Fordice of White Salmon, Wash., and Girden Palmer of Hood River, Oregon.
GEO. H. STEVENSON, Register.

NOTICE FOR PUBLICATION.
Land Office at Vancouver, Washington, October 15, 1894.—Notice is hereby given that the following named settlers have filed notice of intention to make final proof in support of their claims, and that said proofs will be made before W. R. Dunham, Commissioner U. S. circuit court for district of Washington, at Goldendale, Washington, on December 6, 1894, viz:
Richard Granville,
H. E. No. 7819, for the S. 1/4 of N. E. 1/4, and N. 1/4 of S. E. 1/4 section 25, township 6 north, range 12 east, Will. Mer.

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz:
John F. Anderson, William McGrath, Aleide Willard and Wenzel Borde, all of Gwendolyn P. O., Washington.
John F. Anderson,
Pre. D. S. No. 217 for the S. E. 1/4 of S. E. 1/4 section 25, township 6 north, range 12 east, Will. Mer.
He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz:
William McGrath, Richard Granville, Aleide Willard and Wenzel Borde, all of Gwendolyn P. O., Washington.
GEO. H. STEVENSON, Register.

FOR SALE.
Two choice lots, with good residence, in the town of Hood River, will be sold at a bargain. Inquire at the Glacier office.

LAND FOR SALE.
Twelve acres, 6 miles southwest of town; two acres cleared, balance scattering oak and brush, not hard to clear. Price \$300.

Hood River Pharmacy's
Directions for Mixing the Acme Compound.
Weigh out ten pounds of the Compound and put it in a barrel or large kettle; then pour on five gallons of boiling water gradually, until the mixture is of the consistency of soft soap—stirring it all the time. After it is thoroughly dissolved add the balance of the water (forty-five gallons), hot or cold—hot preferred. Do not boil the mixture. It is then ready to apply. Be sure and have your kettles or barrel clean (also your spraying tank) and free from other mixtures, in order to avoid clogging your spraying nozzles. Do not spray when the blossoms drop. For Codlin Moth use No. 2, and spray immediately after the blossoms drop, then again four weeks after, which will destroy all other insects that may appear. Apply by means of a spray pump or a florist's syringe.

Testimonials.
Corallito, Cal., March 26, 1894.—Watson, Erwin & Co.: I used one hundred pounds of your Acme No. 1, and it had the desired effect; it not only gets away with the insect but it cleans up the tree and leaves it in a healthy condition. I will guarantee it will do just what it is recommended to do. Yours truly,
J. E. MORTIMER.
Niles, March 14, 1894.—I have had six years' experience spraying, and used various washes to quite an extent. For the last two seasons I have used Acme Insecticide, and find it the best wash, and that it gives the best results of any I ever used. It is a very pleasant wash to use, and easily prepared.
