THIS GOAT SMOKES

He Prefers a Clear Havana, but Comes Down to Cigarettes if He Has To.

A billygoat that smokes cigars and cigarettes, just like a man, is in the possession of Charles Reber, at 120 Krauss street, Carondelet. The goat has a 19 year growth of horns and whiskers of about the same age waving gracefully and odorously from his chin. After a hearty feast upon tin, tacks, rags, paper and anything else in sight Billie, as he is called, takes his siesta. Unless a tigar or cigarette is provided the after meal enjoyment is all broken up for Billie, and he bleats continually until provided with a smoke.

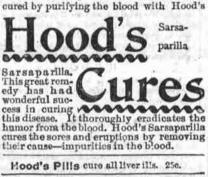

No ardent lover of the fragrant weed pulls at a cigar with more relish than this goat. A complacent smile curls his apper lip when the lighted weed is placed in his mouth, and the right fore foot makes motions toward the whiskers as though to stroke them. But Billie is no ordinary smoker, nor is he unskilled in the habit. He is not only a connoisseur of the best clear Havana goods, but is an adept at fast puffing and graceful manipulation of the weed while in his mouth. The smoke is never puffed out of his mouth. Billie inhales it and blows it out through his nostrils in great clouds. It is related that he attempted to make a smoke ring once, but in puckering up his lips swallowed the cigar, blaze and all. He evidently relished the bite as a dainty morsel, for since that incident he never takes more than one or two puffs at a cigar or cigarette, swallows it down, then blows the smoke out of his nostrils with the ease and grace that would put to shame a two egged cigarette fiend.

It is only of late that Billie has taken to the cigarette habit. It was apparently with much regret that a brother goat in an adjoining yard watched him tackle the papers. He prefers cigars, as a rule, however, but when nothing better is to Unique Bachelor Club In Detroit Designed be had a cigarette is welcome.

The Largest Window.

The largest opalescent glass window in the world is in the new St. Paul's church at Milwaukee. It is what is known as a nave window, the lower half being composed of three immense panels and the upper half of a splendid rose and tracery in a semicircle of brilliancy. This monster window in its extreme measurement is 30 feet and 1 in. h in width and exactly 24 feet in height. It is beautifully executed, the subject being the crucifixion—in fact, it is an exact copy of Dore's masterpiece, "Christ Leaving the Prætorium." There are over 200 life size figures represented on this wonderful window.-St. Louis Republic.

High Government Authority.

From

No authority of greater experience on food products exists than Dr. Henry A. Mott, of New York. Dr. Mott's wide experience as Government Chemist for the Indian Department, gave him exceptional opportunities to acquaint himself with the qualities and constituent parts of baking powders. He understands thoroughly the comparative value of every brand in the market, and has from time to time expressed his opinion thereof. On a recent careful re-examination and analysis he finds

Dr. Price's Cream Baking Powder

superior to all others in strength, purity, and efficiency. Dr. Mott writes :-

" New York, March 20th, 1894.

I find Dr. Price's Cream Baking Powder to be superior to all others, for the following reasons :--

ist. It liberates the greatest amount of leavening gas and is consequently more efficient.

and. The ingredients used in its preparation are of the purest character.

3rd. Its keeping qualities are excellent.

4th. On account of the purity of the materials and their relative proportions, Dr. Price's Cream Baking Powder must be considered the acme of perfection as regards wholesomeness and efficiency, and I say this having in mind certificates I have given several years ago respecting two other baking powders.

The reasons for the change in my opinion are based on the above facts and the new method adopted to prevent your baking powder from caking and deteriorating in strength.
