In Baking Powders "Royal" Leads.

As the result of my tests, I find the **ROYAL BAKING POWDER** superior to all the others in every respect. It is entirely free from all adulteration and unwholesome impurity, and in baking it gives off a greater volume of leavening gas than any other powder. It is therefore not only the purest, but also the strongest powder with which I am acquainted.

> WALTER S. HAINES, M. D., Prof. of Chemistry, Rush Medical College, Consulting Chemist, Chicago Board of Health.

All other baking powders are shown by analysis to contain alum, lime or ammonia.

FARM AND GARDEN

Suggestions and Facts That Tend to Profit.

A VOLUME ON SMALL FARMING

The Great Northern Railway Has the Work Under Preparation and is Desirous of Obtaining all Information Possible.

A communication has been received from St. Paul from F. I. Whitney, general passenger and ticket agent of the Great Northern railway, on the subject of small and diversified farming. The railway officials recognize the fact that there is far more business for a road from a region thickly populated and producing many kinds of crops than from a thinly populated one devoted only to the production of staples. For this reason they are anxious to see the Pacific Northwest increase largely in population by the cutting up of the large farms sulated wire, and after stripping each into small tracts and their cultivation in such a manner that each small area shall support a family. This matter of immigration is an important one and affects the entire Northwest. The efforts of the railroads to induce the right kind of immigrants to come here, and to lay before them the facts necessary to accomplish that end, should receive gen-eral encouragement and aid. The information asked for in the letter should be supplied by the intelligent farmers, journalists and hopgrowers who have it at their command. Mr. Whitney's letter is as follows: "We are desirous of securing a series

of letters from practical men of your State devoted to the discussion of intensive farming. In our various publica-tions, which we freely distribute about the East, we have made the broad claim that ten acres properly cultivated to vegetables or fruits will make a good living for a family. This we have done on account of the many instances of success attending the tillage of small areas, an acre, more or less, which have come to us from nearly every part of the Pacific Northwest. There is more waste land from an agricultural standpoint in your States than in the Mississippi Val-ley. All the land capable of cultivation in your country should be in small holdings and made to produce to the limit. Small farming means much. It means better roads, better schools, nearer neighbors and better markets. It means sociability, companionship and touch with the world; but I need not enlarge upon the importance of increased popu-

lation and well-managed acres. "Your climate invites out-door life; it invites people from more rigorous sec-tions to come and prolong their lives and usefulness. Your varied resources invite capital, industry and develop-ment. New men will uncover new avenues to wealth and happiness. We be-lieve in building for the future, in lay-ing sure and firm foundations; but while doing it we should share some of its benefits. Let us ourselves partake of the fruits of the tree and garden and enjoy while we live some of the beauty d perfume of the flowers. "We therefore respectfully invite con-

tributions from farmers, fruit-raisers and gardeners, showing what can be done on one acre and upwards, and how to do it, so that others may be instruct-ed in the art of right living and labor. Ten Acres Enough' gave an Eastern writer material sufficient to prepare a very readable and useful book. We believe volumes can be written upon your resources and possibilities. We do not want a book from any single person matter to fill a newspaper column will be plenty from each one, and our hope is we may be favored with enough short articles to make a book. Address F. I. Whitney, G. P. & T. A., Great Northern Railway, St. Paul, Minn."

THE NICARAGUA CANAL.

The project of the Nicaragua canal has been debated in the U.S. Senate very vigorously. One thing should be remembered about that climate; it is death to almost every foreigner who goes there, and laborers especially succumb. It is said that the Panama Railroad cost a life for every tie. What an idea of pains and aches is in this sentence. It is mostly due to carelessness. Every laborer provided with St. Jacobs Oil would be armed against these troubles. Oil would be armed sgainst these troubles. Men's muscles there are cramped with rheumatic pain and they ache all over. That's just the condition where this sov-ereign remedy can do its best work. The fearful malady i very much like the break-bone fever in certain parts of America.

Running With a Human Trolley.

The novel sight of a man taking the place of the trolley on an electric car was seen last night on the Lake Roland elevated railway. The trolley on one of the large electric cars in crossing Lexington street at North street had its of the New York State Senate: trolley wheel caught in the wire, and the entire trolley apparatus was torn off, falling to the street. The accident happened at a time when travel over the road was heavy, and it was necessary to prevent a blockade.

Lineman William Scott was equal to the occasion. He procured a piece of inend of the insulating material connected one end through the car roof, and standing on the top of the car held the other end against the trolley wire. A connection being thus made the car was run over the elevated structure to the car barn at Walbrook without accident to Mr. Scott or delay to the other cars. Mr. Scott's position was a novel one and startled persons who are unused to electricity as he stood on the top of the car amid myr-iads of sparks and illuminated by lightninglike flashes from the trolley wire .-Baltimore Sun.

The Queen Receives a Pie.

In accordance with an ancient custom, Queen Victoria has been presented with a lamprey pie. It was an elaborate affair and was presented by the mayor, Mr. Matthews. He signified his intention of giving it, and the queen, through the lord high steward of Gloucester, intimated that she would be happy to receive it. Consequently the pie came, ac-companied by two silver skewers bearing the arms of the city and the name of the mayor.-London Letter.

Mr. Ruskin's Finances

Mr. Ruskin, says his biographer, Mr. W. G. Collingwood, is no longer a rich man. The £200,000 he inherited from his parents have gone, chiefly in gifts and in attempts to do good. The sale of his books is his only income, and a great part of that goes to an army of pensioners to whom in the days of his wealth he pledged himself. Nevertheless "he has sufficient for his wants and need not now feel poverty in his old age."

A County Without Taxes.

The county council of the North Riding of Yorkshire, England, have decided that they will not levy any taxes during the next 12 months. They are in a wonderfully happy position. The balance at their bankers is so large that they want no more money for a year.

It is not often that shares in the London Graphic and Daily Graphic newspapers come into the market. Some, however, were sold by auction the other day, and these realized as much as \$277.50, these being \$50 shares on which \$35 only had been paid.

its earlier stages, con-sumption is a curable disease. Not every case, but a large per-centage of cases, and we believe, fully 98

by Dr. Pierce's Golden Medical Discovery, even after the disease has progressed so far as to induce repeated bleedings from the lungs, severe lingering cough with copious expectoration (including tubercu-lar matter), great loss of flesh and extreme

matching the weakness. Do you doubt that hundreds of such cases reported to us as cured by "Golden Med-ical Discovery" were genuine cases of that dread and fatal disease? You need not take dread and fatal disease? You need not take our word for it. They have, in nearly every instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in mis-representing them, and who were often strongly prejudiced and advised against a trial of "Golden Medical Discovery," Weak memory, Atrophy, Sexual Weakness, etc., Surely cured by strongly prejudiced and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that it surpasses, in curative power over this fatal malady, all other medicines with which they are acquainted. Nasty cod-liver oil and its filthy "enulsions" and mixtures, had been tried in nearly all these cases and had either utterly failed to bene-fit, or had only seemed to benefit a little for a short time. Extract of malt, whiskey, and various preparations of the hypophos-phites had also been faithfully tried in vain. The photographs of a large number of those cured of consumption, bronchitis, lingering coughs, asthma, chronic nasal catarrh and kindred maladies, have been skillfully reproduced in a book of 160 pages which will be mailed to you, on re-ceipt of address and six cents in stamps. You can then write those cured and learn their experience. AddressWORLD'S DISPEN-SARY WEDICAL ASSOCIATION BUILS their experience. AddressWort, D's Dispen SARY MEDICAL ASSOCIATION, Buffalo, N.Y.

A LESSON AT THE WHISTLING CLASS. ter and ear. Without a good ear no ambitious whistler may even hope to succeed. The second step is learning to take a full breath, and the third is practicing the sim-ple scale by the hour. Then the beginner

is allowed to run scales and arpeggios and other things with extraordinary names. Next come chromatics, half steps or semitones of the scale, so called because they were formerly written or printed in colors. The chromatics are the most difficult exercises the whistler encounters.

The most determined and ambitious candidate for whistling honors in San Francisco is Miss Gertrude Judd, who says that a whistler, like a poet, is born and not made. But even when a siffleuse is born with the divine afflatus he or she must have cast iron lungs, a favorable mouth cavity formation, sound health and perseverance. The greater the lip power the better the artist.

The face of a confirmed and irreclaimable sifleuse usually bears what are called the whistle lines. They extend in the form of an inverted V from the nose to the chin. These lines are visible in the faces of such well known whistling experts as Mrs. Shaw and Messrs. Stevens and Kellogg. Miss Judd also possesses them, and although women are not usually fond of lines in their face Miss Judd professes to be very proud of hers.

BRANDING A CLAIM FALSE.

World's Fair Officials Expose a Pretender to an Award.

A most discreditable result of the late Chicago World's Fair is the fraudulent advertising of awards never received by a Chicago baking powder firm. Officials of the Exposition are much incensed, and have notified the offending parties that the misstatements must cease. They are defied, however, by the Chicago concern, who continue to advertise the false statement that they received the highest award for strength, purity and excellence. Mr. Thatcher, Chief of Agricultural Awards, shows in his letter Agricultural Awards, shows in his letter that the awards granted were "for an exhibit of baking powder," merely, not for superiority; while the Judge of Awards on Baking Powders writes a let-ter saying that "no such award was given to the Chicago company," as the company claims and advertises.

Another fact in connection with the baking powder business at the Chicago Fair has come to light. The identical baking powder made by the Chicago concern, and so brazenly advertized as having received the highest award for purity and excellence, it now appears was found by the analysts who made the tests at the Fair to contain traces of ammonia and sulphates.

The officials believe that though they may be powerless to stop the misleading publications of which they complain, the quick wit of the people will doubtless detect the spurious claims and be able to apply the proper remedy.

How to Measure an Acre.

It is desirable-in fact, indispensable -for good work that a farmer should know how many acres are in his field. Otherwise he cannot apportion seed or manure for it, nor can he tell how much time it should take to plow, harrow or cultivate. A good cotton cord, the size of a plow line, should be kept for this purpose. To make one, buy sixty-seven feet of cotton rope an inch round, fasten a ring at each end and make these rings precisely sixty-six feet apart. This is four rods. The a piece of red rag in the center. One acre of ground will be a piece 4 of these cords long and 2½ wide, equal to 16 by 10 rods, making 160 square rods to an acre. The advantage of the rings is that one person can meas ure alone by driving a stake in the ground to hold the rope while he stretches it out. The rope should be soaked in tar and then dried. This will prevent shrinking. Last year a neighbor of the writer had

a heavy sod plowed by contract at \$2.50 per acre. Three persons stepped it off. One said it was 4 acres, another said it was a little over 5, and the third said it was 3½ acres. The contractor sent over and got this rope, and all five men measured it, and it was found to be just 314 acres. He had paid to have the grass cut off it for three years \$1 per acre, or \$5 each season, counting it to be five acres in extent, thus losing \$4.50 through ignorance.

Get a measuring rod and when not in use put it away, so that the hands can-not get at it or they will be very apt to cut a piece off it to tie up harness, thus making it worthless for measuring purposes.

POULTRY NOTES.

There is more in the management than in anything else. Everything depends on the poultryman.

Cheap egg foods are mostly ground oyster shells, and the benefits are only imaginary. Don't buy them.

Feed sulphur sparingly, as it will cause rheumatism or leg weakness Never give it in damp weather.

Don't "break up" a setting hen. It is lost time. Let her get rid of her fat, and she will lay more eggs in the end. To keep eggs for hatching turn them three times a week and keep them in a cool place, where they will not freeze. They will then keep a month.
