Little Bruce Morton had a very narrow escape from drowning the other day. On his father's place a flat boat is used to cross the slough when making hay. The Miller brothers, Mr. Morton and his little boy had gotten into the boat to cross the slough, and while Mr. Morton and Luther Miller were preparing to push the boat from shore with their oars, Bruce ran to the forward part of the boat and managed to fall overboard. Mr. Frank Miller happened to hear the splash made by the boy falling overboard, and quickly going to the bow of the boat, saw the boy struggling in the water about two feet under the surface. Reaching out at arm's length he caught the boy and pulled him aboard just as the boat was pushed out. In another moment the boy would have been under the boat in twenty feet of water.

Strawberry Notes.
The weather for the past week has been favorable for ripening the strawberry crop. The crop is in fine condition and everything indicates a big yield. Picking has commenced on the lowlands along the Columbia and in favored spots along Hood river, and next week the ranch throughout the valley will be marketing the big red Clarke's seedling strawberry that is grown only at Hood River to perfection.
Nine crates of strawberries were shipped to Portland on Friday morning's train—making a total of 20 this season.
Milton, Umatilla county, made the first shipment of Oregon strawberries to Denver May 11th.
The first Mt. Tabor strawberries arrived in the Portland market this season on May 13th.
May 27th was the date of the first shipment of Hood River strawberries last year.
Frank Miller made the first shipment of berries this season. He picked half a crate May 14th, and shipped to Portland.
The Oregonian of May 15th says: "A case of one dozen boxes of very fine ripe strawberries arrived from Hood River yesterday and were retailed at 50 cents per box. Good Columbia berries were selling last evening at three boxes for 25 cents."
Station Agent Henn received word from Milton, Wednesday night, that the strawberries there were blighted and some of the largest growers considered their crops not worth gathering.
Hood River is a little behind some other parts of the state this season in shipping that berry. One reason for this is that growers on our earliest land failed to set new plants last summer, and it is the young plants that bring early berries. Hood River should have been shipping berries all this week, in paying quantities, while prices were good.
Japanese will pick a good share of the strawberry crop of Hood River this season. They work cheaper than Indians and the white labor that has heretofore done the picking. They are a better class of laborers than the Indians from the plains, and will probably give better satisfaction to growers than white boys and girls. But if Japs and Chinese come here to gather our crops, they will soon leave and go into the business themselves. It would be much better for the community if our boys and girls were given the work of picking and packing the strawberry crop, thus doing without this foreign labor and keeping the wages they would earn at home. And if the supply of white labor here is not sufficient, it ought not to be a hard matter to procure all the help needed from other places.

Caterpillars.
The caterpillars have been hatching out for some time. Careful fruit-growers pruned off and destroyed most of the rings of eggs on their trees last winter, but a few probably escaped notice and the clusters of young caterpillars should be crushed or burned with a torch as soon as possible. There are two or three methods of keeping caterpillars from abroad from climbing the trees. One is to take strips of cotton batting and place around the trees, tying with a string about midway of the stem. A more common method where the work is done on a large scale is to tie strips of strong paper, like the P. and B. building paper, around the trees and then smear the paper with tar or printer's ink. The latter is the best, and the cheapest grade is the most useful. It should not cost more than 10 or 15 cents per pound and can be bought in large quantities much cheaper. Some people smear axle grease directly upon the trunks of trees but it is a bad practice.—Rural Northwest.

Office of the Pioneer Press Company, G. W. Hornick, Supt. ST. PAUL, Minn., Sept. 7, 1894.
Eureka Chemical and Mfg. Company, La Crosse, Wis.—Dear Sirs: I have been a tobacco fiend for many years, and during the past two years have smoked fifteen to twenty cigars regularly every day. My whole nervous system became affected, until my physicians told me I must give up the use of tobacco for the time being at least. I tried the so-called "Keely Cure," "No-To-Bac," and various other remedies, but without success, until I accidentally learned of your "Baco-Curo." Three weeks ago today I commenced using your preparation, and today I consider myself completely cured. I am in perfect health, and the horrible tingling for tobacco, which every inveterate smoker fully appreciated, has completely left me. I consider your "Baco-Curo" simply wonderful, and can fully recommend it. Yours very truly,
G. W. HORNICK.
