A Cape Town dispatch says that in the assembly Mr. Spring in announceing the budget said that the available surplus was £1,250,000, estimated surplus net for the year, £822,000. He also produced statistics showing an unprecedented prosperity in all directions and expressed the opinion that the high price of Cape stock was partly due to the fact that the colony was a part of the British empire, and he added that the power which commands the sea must dominate South Africa.

The American line steamer St. Paul has again broken her record across the Atlantic. The St. Paul left Southampton at noon May 30 and passed The Needles about 1:25 P. M. June 5. Her time for the trip was 5 days, 5 hours and 35 minutes, beating all records by over 11/2 hours. The best previous western record of the St. Paul, made on her last voyage, was 6 days, 9 hours and 5 minutes. She has, in the present trip, reduced that time 31/2 hours, and also made a new western record from Southampton.

Alarming news regarding the plague which is raging in China and other countries of Southern Asia was brought by the steamer Peru, which arrived from Hong Kong and Yokohama in San Francisco, seven days late, on account of being detained at quarantine at Nagasaki. Deaths are occurring by hundreds in the Orient. At Canton there were 315 deaths in one week recently. At Hong Kong, when the Peru sailed, May 5, 617 persons were down with the cholers, and new cases were being reported at the rate of 25

S. Asano, one of the chiefs in the naval department of the government of Japan, will arrive on the next steamer from the Orient in San Francisco. An important matter connected with the coming visit of S. Asano to the Pacific coast is the opening of a new steamship line between Tokio and the Pacific coast. In heralding the advance of this new line Asano will say that it will handle freight cheaper than either of the lines running from San Francisco and Paget Sound, and that the landing place on this coast will be at Portland. The Japanese legislature recently appropriated \$5,000,000 to float the com pany, and selected Porsland as bein. the most central point. Freight will be carried at 18 yen, or \$9, per ton. and the passenger rates will be at greatly reduced rates.

#### AUSTIN CORBIN DEAD.

Killed in a Runaway Accident at His Summer Home.

Newport, N. H., June 8 .- Austin York, died at 9:42 tonight, from injuries received by the running away of the horses attached to his carriage. The accident occurred about 3 o'clock this afternoon, while Mr. Corbin was driving form his estate and game preserves, two miles from here, accompanied by his grandson, Edgell Corbin, and the latter's tutor. The driver was John

When coming out of the entrance gate, the horses shied, and in their fright dashed across the street, colliding with a high stone wall. The carriage was overturned sufficiently to eject with great force all its occupants, with the result that one of Mr. Corbin's legs was broken in two places and the other wrenched, while his head was terribly bruised. The dirver was injured internally and died at 6 o'clock.

Edgell Corl in had one leg broken, besides other injuries, while the tutor escaped with a severe shaking up.

The first information of the acciden brought to the village was when local surgical help was summoned. Word was immedately disptached to New York and Boston for the best of surgical skill and skilled nurses.

Mr. and Mrs. Corbin and their grandson came to their summer home from New York on Memorial day, and the other members of the family were to follow in a few days.

### A GALLANT ENGINEER.

Passengers on the Scattle, Lake Shore Seattle, June 8.—As passenger train

No. 2 on the Seattle, Lake Shore &

Eastern road, south-bound, was round-

ing a curve ten miles north of McMur ray yesterday afternoon, the flange on one of the engine wheels broke and the engine turned a somersault down a three-foot embankmen', carrying the tender and baggage car with it and dragging both coaches from the rails, but not from the track. The train was running twenty-five miles an hour, but the engineer, George Gabriel, stuck to his post, put on the airbrake and saved the twenty-five passengers. His courage came near costing him his life, for he was buried in the overturned cab which was at once filled with scalding steam. Fortunately one of the big driving wheels of the engine broke into the tender tank and released the water. which flowed completely over the engineer's body till he was released by Conductor McCaffey and Brakeman Wilson. It was found that he had been struck a severe blow on the right thigh, which will lay him up for a couple of weeks, and may result in serame engine cab, saved a Lake Shore train in the same manner, paying the penalty of a broken leg, from which he had but just recovered.

THE MOSCOW CRUSH.

The Prefect of Police Responsible for the Disaster.

Moscow, June 8.-Eye witnesses of the terrible crush on the Hodynsky plain Saturday agree that M. Vlassovsky, prefect of police, is chiefly to blame for the disaster. He buffly refused military offers of troops to control the crowd, declaring that he knew his own business and that there was no need of any further fear of accident. Popular feeling against Vlassovsky is intense, and his name has become a curse among the populace, who, armed with bottles and stones, would have lynched him the same day upon his arrival at the plain if he had not had his route lined with troops and himself strongly escorted.

It appears that during the crush a number of Cossacks, finding themselves surrounded, freely used their whips on the crowd in order to force their way out. Three were torn from their saddles and were killed and this led to the flight of the others. A number of peasants were drowned in the vats of beer provided for the feast, in which they plunged in order to secure the liquor.

THEY FISH IN PEACE.

Good Effect of the Presence of Militia on Baker's Bay.

Astoria, Or., June 8 .- A prominent citizen of Ilwaco was in town today, and said that fishing is progressing peaceably throughout Baker's bay, under the protection of the Washington militia. The force at Ilwaco now consists of about fifty men. They have two steamers, protected on the outside with heavy railway ties, and each nounting a cannon, carrying a detail f heavily-armed men, and constantly patroling the bay day and night. There has been no attempt made recently by trikers to enter the bay or molest any f the working fishermen.

Seaborg's cannery is in operation and receiving all the fish it can coneniently handle, which are said to be f unusually fine size and quality. A ough of regulars is also maintained on Sand island, and is contributing materially to preserve the peace at that section of the bay and river.

Barcelona Police Making Great Efforts to Find the Bomb-Throwers.

Barcelons, June 10 .- Martial law has been declared here. The total ious complications. Six months ago number of victims of the bomb explosion yesterday is 8 dead, 21 dying and 08 injured.

The person who threw the bomb into the crowd before the church of Santa Maria del Mary in the Corpus Christi procession has not yet been identified.

The impression is general that an anarchist did the work, as a resut of a widespread anarchistic plot. The police are working on this theory, and have arrested men known to entertain anarchistic sympathies.

In connection with the arrests, they have secured a number of documents which give some clew to the plot of which yesterday's bomb-throwing was a manifestation. These documents indicate that the center of the agitation is direct with the purpose of precipitating a number of anarchistic demonstrations, accompanied by acts of violence at different points simultaneousiv, or following close upon each other, so as to create a reign of terror in the Ye4. A Bicyclist's Fatal Accident.

New York, June 10. - Thomas Thompson, in company with two friends, went out for a spin on their bicycles last evening near Greenville, N. J., and passed the spot where three weeks ago Charles E. Schroder, of this city, lost his life by being thrown over the palisades from his bicycle, Thompson being one hundred feet ahead of his friends. On each side of the highway there are deep ravines. The roadway is twenty-two feet wide and the only protection at the brink is a small pile of stones. Thompson's wheel struck a stone in the road and he was thrown off. He plunged over the cliff into the gorge below. His friends crawled down the steep embankment, where they found Thompson unconscious and suffering from a fracture of his skull. His arm was also broken, His chances for recovery are slight.

THE SEAL FISHERIES.

Behring Sea Treaty With England Made Public.

Washington, June 10. - President Cleveland and the queen of Great Britain will officially proclaim within a few days the Behring sea convention, which their respective governments have entered into. The senate made public the text of the treaty which provides for the appointment of a joint commission to ascertain the amount of damages by the owners of British sealing vessels seized in Behring sea by United States revenue cutters before they had authority to do so under the terms of the modus vivendi or the approved decision of the Paris arbitration tribunal.

No definite selection has yet been made so far as learned, of the United States representative on the commission. It is thought Professor D. F. Dal, an expert in seal life, who is connected with the naval museum here, has about the best chance of securing the place. It is not believed that Great

Decisions reached by the commissioners in each claim shall be accepted by the two governments as final. They are given full authority to examine under oath every question of fact not found by the tribunal of arbitration, and shall have power to procure or enforce testimony, as may hereafter be provided by legislation. If in any case the commissioners fail to agree, the differences shall be referred for final adjustment to an umpire, to be appointed by the two governments jointly, or in case of a disagreement, to be nominated by the president of the Swiss confederation.

The amount awarded to Great Britain under the convention is to be paid by the United States within six months after the award is made.

A BOMB THROWN.

Six Persons in a Crowd at Barcelons

Barcelona, June 9.-A bomb was thrown into the crowd during the formus Christi parade today explosion resulted in the killing of six persons and the injury of forty. The perpetrator is not yet known, and his

motive is equally a mystery.

News of the throwing of the bomb spread like wildfire over the city, and caused a panic among the crowds drawn to the streets by the religious festival and the Sunday merrymaking usual to the city. The explosion occurred just as the Coprus Christi porcession was entering the beautiful and ancient church of Santa Maria del Mar. This is one of the most thickly populated portions of the city. The sound of the explosion and the distressed ories of the injured and the friends of the killed created an indescribable panic among the great crowd in the procession and the lookers on. The people were terror-stricken with dread of other bombs being thrown and it was with difficulty that they were restrained from stam-

TO MAINTAIN SPANISH RULE

Spantards Protest Against What They Consider Unfriendly Utterances et the American People.

Havana, June 9.-The Spanish newspapers teem with articles on the loyalty of Spaniards in the republics of Mexico, Uruguay and Argentina. But that is too well known to require ex-tended notice. Spaniards of Argentina and Uruguay have enrolled as volunteers in Cuba, and today over 3,000 of them are serving in this island to maintain Spanish rule and Spanish supremacy. Spaniards in the United States and all Spanish-America have initiated a naval fund, the subscriptions extendingfover three years.

The latest evidence of loyalty of the Spaniards in Spanish-America has taken a new form. What is deemed to be a strong anti-American feeling has been developed by the press in the mother country, as well as in Spanish-America. It has led to the calling together of Spanish merchants in the republics of Mexico, Uruguay and the Argentine Republic. They have pro-tested against what they regard as the unfriendly utterances of the American poeple, and have unanimously decided to discontinue further purchases in the another company. United States. "There are probably not less than ,200 men scattered about Ressurrection and Six-Mile creeks," said the doctor, "and claims have been taken up everywhere. Why, some of them are staked out on 50-foot snowbanks and no one knows what is beneath them. Mining and prospecting is impossible, and it will be six weeks vet before the snow will have left the ground. So far as the outlook for gold is concerned, it is difficult to tell. A prospector can find color anywhere along the creeks, but it is very hard, in most cases impossible, to save the gold. The experiments with gold machines have proved failures.

"The mining country is located along the creeks. Both Ressurrection and Six-Mile creeks have many tributaries and upon these prospectors have locat-Coal bay there are about twenty-five men, and they are waiting the melting of the snow to go to work. Some color has already been found there, but the next point is to save the gold."

Dr. Dunn stated the health of those at the location he visited was good. The general situation was very discouraging he believes, because of the hundreds at the gold fields who were idle and unable to accomplish anything because of the snow. Under his calculation, the season for actual work on claims will not be longer than four months.
