

TO SECRETARY BLISS.

Hermann Urges Suspension of Proceedings Against Sheepowners.

Washington, May 17.—Commissioner Hermann, of the general land office, has submitted to the secretary of interior, a letter urging the suspension of legal proceedings growing out of the Cascade range reserve act. The letter says:

"It has been represented to this department that great hardships and loss has resulted to the sheepowners of Oregon because of their exclusion from the grazing lands within the boundaries of the Cascade range forest reserve, created by the president's proclamation of September 28, 1893; that the large areas of grazing lands within said reservation have been used for years past as a general grazing ground, and the sheepowners are dependent thereon for the support of their flocks during certain seasons of the year; that the suits instituted by the government against certain parties to restrain them from pasturing their sheep within the reserve are repressive and unjust, and relief is asked.

"A special agent of this office reports that Judge Bellinger, on the 16th ult., in the United States circuit court for the district of Oregon, overruled the demurrer to the amended complaint in the case of the United States vs. Tygh Valley Land & Livestock Company, sustaining his former decision therein (76 Fed. Rep., 693), against an implied license to use such lands for pasturage purposes, and recognizing the right of the government to sue to protect its property from threatened injury. The special agent states that the several cases brought against various persons, to which this ruling applies, will probably be at issue and ready for trial some time next month.

"In view of the legislation now pending (Senator Pettigrew's amendment to the sundry civil bill) respecting forest reserves in general and their management, and the authority therein to be given the secretary of the interior 'to regulate their occupancy and use,' and the probable early action of the department on the subject. I think it would be wise to suspend, for the present, legal proceedings growing out of sheep pasturing within the Cascade forest reserve.

"I therefore respectfully recommend that the attorney-general be requested to instruct the United States attorney for Oregon to stay all proceedings in the above-mentioned cases until further orders."

A Ghastly Rehearsal.

Paxton, Ill., May 17.—Frederick William Holman, who is to be hanged tomorrow for the murder of Mrs. Weibkoen Godes, on December 2, 1896, held a dress rehearsal this morning, and was photographed on the gallows upon which he is to be hanged. He hopes to sell enough of the pictures to pay for sending his body to Grand Haven, Mich., and have it buried beside the remains of his wife. In addition to the murder for which he is to die, Holman is supposed to have killed other women. After being photographed, Holman rehearsed a speech, which he has prepared for the gallows.

Universal Stamps Impracticable.

Washington, May 17.—The movement to secure the adoption of a universal postage stamp by the postal congress has collapsed. There were too many difficulties, the chief one being that of currency fluctuations, in the way of adopting such a stamp, and the general committee, after considering the subject briefly, abandoned it as impracticable, and will make an adverse report to the congress.

Sacramento Wants Bryan.

Sacramento, Cal., May 17.—The Iroquois Club, of this city, is making strenuous efforts to induce William J. Bryan to stop over one day in this city while en route to Oregon. A committee has been appointed to communicate with the Nebraska orator, requesting that he honor the capital city with his presence and address its people.

Cattle Train Derailed.

Enfala, I. T., May 17.—A cattle train jumped the track a mile north of here this afternoon while running at full speed. The engine turned bottom up, and ten cars of cattle were derailed. An unknown negro boy was killed, and Peter McCarty, engineer; C. O'Verd, fireman, and two other men were badly hurt. Fifty cattle were killed outright.

Seven Killed and Several Injured.

Florence, Ala., May 17.—This afternoon, the tippie, at the Pinkney, Tenn., ore mines, about twenty-five miles from here, fell, killing seven men and badly wounding several others. Communication with Pinkney is cut off, and full particulars cannot be had. Physicians have left here for the scene.

A New Issue of Short Line Bonds.

New York, May 17.—The directors of the Oregon Short Line & Utah Northern railroad today authorized the issue of noncumulative income bonds, series B, to the amount of \$15,000,000, in accordance with the plan proposed by the reorganization committee.

Done by a Firebug.

Springfield, O., May 17.—The Funderburg mills at New Carlisle were destroyed by fire shortly after midnight. Loss, \$50,000. It was the work of an incendiary.

The War in the Philippines.

Madrid, May 17.—An official dispatch from Manila, Philippine islands, announces that the Spanish troops captured Ternate, and that fifty-seven insurgents were killed. The Spaniards lost twenty-five killed and 225 wounded.

Deputation of Convict Goods.

London, May 17.—In the commons today, the bill to prevent the importation of goods manufactured in foreign prisons passed the second reading.

WEEKLY MARKET LETTER.

Downing, Hopkins & Company's Review of Trade.

The week's contribution of statistics was on the whole more bullish than the average of late. Bradstreet's report showed a decrease of 5,000,000 bushels in the world's visible supply. Our own visible supply decreased 2,550,000 bushels, and the world's shipments were 5,000,000 bushels. These facts, however, are no longer regarded. The trade generally has settled down to an acceptance of the fact that there is plenty of wheat to run well into the next crop year, and that at the present rate of demand the important consideration is not as to the stocks on hand, but as to the prospects for the yield this fall. The consideration relied upon in this respect of the statistics was that short crops abroad would cause an unusual drain upon American supplies. Yet in the last seventeen weeks the American official visible has decreased 21,000,000 bushels in round numbers, while in the same period last year it decreased 14,000,000 bushels, and in the same period in 1895 it decreased 23,000,000 bushels. During the same period the world shipments this year were 72,264,000 bushels, of which America furnished 39,462,000 bushels. It appears, therefore, that the theoretical requirements of 7,000,000 bushels a week is very strictly a theory as distinguished from a condition. Considerations of this kind make the average trader apt to pay little attention to the statistical position. The war factor has now quite disappeared from the market, and it seems that domestic conditions as to weather, etc., are likely to have most influence in making prices for the immediate future.

The crop reports that have come in from abroad of late are indicative of short harvests in some of the most important wheat-producing countries; but, of course, it is too early for any trustworthy showing in that regard. There are still many reports of poor prospects. The drought continues to a degree in California, although some rain has fallen there.

KEEP IN SHAPE.

From the largest cities down to the smallest towns this is the month for the beginning of out-door sports of all kinds, and also the beginning of the season when sprains, bruises, hurts and mishaps are as plentiful as huckleberries. Every Spring this is a common experience, and the common experience has settled down to this, that the best thing to do is to be provided with a supply of St. Jacobs Oil for emergencies of the kind as an especially sure cure for the worst sprain or the blackest bruise. Sportsmen, athletes, ball players and oarsmen have known this for many, many seasons, and reference to it is now only a reminder to get your supplies. Hard strains and overwork of the muscles will bring pains and aches and sportsmen know what's best and are never without the sure cure in the use of the great remedy.

Road Rights in Germany.

Foreigners who visit Berlin will do well to observe that rule of etiquette which precludes a person when out driving or riding from passing people of high rank. Thus, a stranger, an American, it is said, was arrested the other day in the Thiergarten, for having ventured to drive past the carriage conveying the young Crown Prince and his brother on their daily drive.

The royal vehicle was proceeding at a relatively slow pace, and, as the stranger was driving a pair of spirited horses, he saw no harm in driving past and ahead of the Princes.

This rule has always prevailed with regard to military officers, a young lieutenant or captain never venturing to give his dust to his major or his colonel, while the latter, in his turn, is content to follow in the wake of his general.

ROCKED ON THE CREST OF THE WAVES.

The landsman, tourist or commercial traveler, speedily begins, and not only begins, but continues, to feel the extreme of human misery during the transit across the tempestuous Atlantic. But if, with wise prescience, he has provided himself with a supply of Hodson's Stomach Bitters, his pangs are promptly mitigated, and then cease ere the good ship again drops her anchor. This is worth knowing, and thousands of our practical, summer voyagers, tourists and business men do know it.

A SCIENTIST SAVED.

President Barnaby, of Hartsville College, Survives a Serious Illness Through the Aid of Dr. Williams' Pink Pills for Pale People.

From the Republican, Columbus, Ind.

The Hartsville College, situated at Hartsville, Indiana, was founded years ago in the interest of the United Brethren Church, when the state was mostly a wilderness, and colleges were scarce. The college is well known throughout the country, former students having gone into all parts of the world.

PROF. ALVIN F. BARNABY.

A reporter recently called at this famous seat of learning and was shown into the room of the president, Prof. Alvin F. Barnaby. When last seen by the reporter Prof. Barnaby was in delicate health. Today he was apparently in the best of health. In response to an inquiry the professor said: "Oh, yes, I am much better than for some time. I am now in perfect health; but my recovery was brought about in rather a peculiar way."

"Tell me about it," said the reporter. "Well, to begin at the beginning," said the professor, "I studied too hard when at school, endeavoring to educate myself for the professions. After completing the common course I came here, and graduated from the theological course. I entered the ministry, and accepted the charge of a United Brethren Church at a small place in Kent county, Mich. Being of an ambitious nature, I applied myself diligently to

my work and studies. In time I noticed that my health was failing. My trouble was indigestion, and this with other troubles brought on nervousness.

"My physician prescribed for me for some time, and advised me to take a change of climate. I did as he requested and was some improved. Soon after, I came here as professor in physics and chemistry, and later was financial agent of this college. The change agreed with me, and for awhile my health was better, but my duties were heavy, and again I found my trouble returning. This time it was more severe and in the winter I became completely prostrated. I tried various medicines and different physicians. Finally, I was able to return to my duties. Last spring I was elected president of the college. Again I had considerable work, and the trouble, which had not been entirely cured, began to affect me, and last fall I collapsed. I had different doctors, but none did me any good. Professor Bowman, who is professor of natural science, told me of his experience with Dr. Williams' Pink Pills for Pale People and urged me to give them a trial, because they had benefited him in a similar case, and I concluded to try them.

"The first box helped me, and the second gave great relief, such as I had never experienced from the treatment of any physician. After using six boxes of the medicine I was entirely cured. Today I am perfectly well. I feel better and stronger than for years. I certainly recommend this medicine."

To allay all doubt Prof. Barnaby cheerfully made an affidavit before

A Bit of Original Spelling. The Boy, as has been said, was born without the sense of spell. The Rule of Three, it puzzled him, and fractions were as bad; and the proper placing of e and i, or i and e, the doubling of letters in the middle of words, and how to treat the addition of a suffix in "y" or "ion" "always drove him mad," from his childhood up. He hated to go to school, but he loved to play school; and when Johnny Robertson and he were not conducting a pompous public funeral—a certain oblong hat-brush, with a rosewood back, studded with brass tacks, serving as a coffin, in which lay the body of Henry Clay, Daniel Webster, or the Duke of Wellington, all of whom died when Johnny and The Boy were about 8 years old—they were teaching each other the three immortal and exceedingly trying "R's"—reading, 'riting, and 'rithmetic—in a play school. Their favorite spelling-book was a certain old cook book discarded by the head of the kitchen, and considered all that was necessary for their educational purpose. From this, one afternoon, Johnnie gave out "doughnut," with the following surprising result. Conscious of the puzzling presence of certain silent consonants and vowels, The Boy thus set it down: "D-O, dough, N-O-U-G-H-T, nut—doughnut!" and he went up head in a class of one, neither teacher nor pupil perceiving the funny blunder The Boy had made.—St. Nicholas.
