Only One in the World.

So far as obtainable information goes, Mrs. Louise Jewell Cabel of East Lowell, Me., is the only woman justice of the peace in the world. Mrs. Cabel first saw the light of the world 58 years ago last December. At the tender age of 21/2 years her devoted parents sent her to school, her mother having previously taught the child to read the Bible. School occupied her attentions until she was 15 years old, when she became a school teacher. At the age of 24 she was confined to her bed for three years by illness, and during that time took up the languages and became proficient in French and German. For the six years following convalescence she averaged 1,000 vests a year, finally becoming the bride of Mr. Cabel. She finally became interested in prohibition, and became contributor to a score of magazines and papers, keeping up that line of work until 1888, when she was granted a commission by Sebastian S. Marble, then governor of Maine, to 'solemfize marriages, administer oaths and take acknowledgements of deeds." She then began to do the work of a pension justice or notary, as they are called in Maine. She has ridden thousands of miles after affidavits for the soldier and his poorer dependents in their claims before the pension department. She does her own house work all the time. She is now acting under her third commission. One year ago last September her husband, who is an organ and sewing machine vender was stricken helpless with paralysis.

WEEKLY MARKET LETTER.

Downing, Hopkins & Company's Review

Considerable activity has been noted in July wheat during the past week, owing to the fear of manipulation by the elevator men. Stocks of wheat in bushels, and this is firmly held by men who believe in higher prices for spot wheat during the next 30 days. There has been little doing in other options, although September wheat has gained two cents. The news has been somewhat conflicting in many respects, reports of harvesting from the Southwest tending to somewhat dishearten holders, while the news in other respects was bullish in tone, and indicated a good demand for cash wheat. Receipts have fallen off sharply in the Northwest, and everything indicates that from now on until the next crop moves, but littile will be received. Foreign crop news has been bullish in tone, European advices confirming the reported damage to the Roumanian and Bulgarian crop of 25 per cent. Conditions of India have improved but little. Russian reports continue to speak of damage to wheat in certain sections, while in France there has been only a slight improvement. Exports have shown a moderate decrease under those of the previous week. REMARKABLE GAIN IN WEIGHT OF A CALIFORNIA MINER.

Chicago are now down to 3,000,000 A Physical Wreck and Not Expected to Live-He Begins the Use of Pink Pil's and in Three Days Is Able to Walk-His Friends Corroborate His Testimony.

From the Republican, Santa Rosa. Cal.

Here is a true story from California: Some three years ago, James H. Falkner, of Santa Rosa, while prospecting, discovered a quicksilver mine, and while preparing to work it, was alone on his ranch, far from any one. It was there he was attacked by pneumonia, and when found five days after and carried to his home he was apparently dying. He did not die, however, but for over a year was in daily expectancy of death from what was pronounced by nearly all the physicians as consumption.

At the end of about one year Mr. Falkner heard that Dr. Williams' Pink Pills were sometimes efficacious in such maladies as his, and procured some, The result was astounding, for before three boxes of pills had been taken, at his trade, and has ever since been a hale and hearty man.

These facts are vouched for by such men as Sheriff Allen, Mr. C. L. Mabley, the city clerk of Santa Rosa, Mr. Perry Fitts, the well-known lumber dealer, and many others, and are made the subject of quite an extended article in the Santa Rosa Republican by Mr. present duliness lasts, we hardly look Virgil Moore, the well-known correfor a bull market, but our supplies are spondent, who resides near Mr. Falkgetting so low that the short side is ner, and was familiar with the whole

They are sold in boxes (never in loose form, by the dozen or hundred) at 50 cents a box, or six boxes for \$2.50, and may be had of all druggists or directly by mail from Dr. Williams' Medicine Co., Schenectady, N. Y.

Trolley Service Without Wire.

The electric trolley system to be introduced in Paris in time for the International exposition of 1900 is vastly diferent from that commonly employed in the United States, inasmuch as the dangerous overhead wires are absolutely done away with, according to the Philadelphia Inquirer. The new system is the invention of the French engineer, Bochet, and, while rather simple, it steers clear of the objection of unsightly obstruction which is usually raised when overhead wires have to go up. Bochet establishes overhead contacts from electric lamposts belonging to the city, the distance between posts being somewhat smaller than the length of the electric train, consisting of two or three cars, so that contact is always assured at one point at least. Through flexible points of contact suspended from each electric post along the proposed line the current will be taken up by means of a copper rail fastened along the edge of the roof of the car not less than 14 or 15 feet from the ground. The contact point will slide along that copper rail and there is not the slightest difficulty in establishing a continuous current if the points of contact are made sufficiently elastic. The current is allowed to return to the power sta-Mutton-Gross, best sheep, wethers tion through the track of the line, as fits of the overhead as well as of the Hogs-Gross, choice heavy, \$4; light underground system without any of their shortcomings.

A Miracle of Surgery.

A man named George Burns, who will soon walk out of Cook County (Chicago) hospital, is a living example of the miracles performed by modern surgery. He went into the hospital broken up in bone and body, and when he leaves the hospital he will carry with him a certificate showing he has been the victim of the most remarkable assortment of hurts that ever befell a mortal being. Surgeons report him broken up as follows:

Loss of the entire bony vault of the skull, the top of the head being covered with a silver plate.

Five ribs gone from the left side of the body, having been removed by surgeons in an operation.

Heart shifted from its natural position to the right side in order to secure a firm resting place for that organ.

Both legs fractured in two places and right arm broken twice. Both elbow joints gone and the cap of the right knee twisted around

to the back of the leg. Large piece of the breastbone taken out in the removal of a rifle ball.

Part of the windpipe missing.

Durable Shoe Soles.

A German inventor has found a way to make durable shee soles. He applies waterproof glue to the leather and then sticks on a lot of clean quartz sand. This wears splendidly, besides giving a good foothold when walking is slippery. It is said that these soles are as flexible as could be desired.

A company has been formed which made an offer to the municipality of St. Petersburg, Russia, to light all the streets of the city with electric lights for the same price that is now paid for the very unsatisfactory lighting with oil lamps.

An addition of \$11,000,000 a year will be made to the Prussian government expenses by the proposed increase of the salaries and pensions of officials, teachers and their families.

Not Captain Kidd's Treasure.

A quantity of gold and silver coin was discovered the other day at Casino Beach, Astoria, L. I., by workmen engaged in making excavations for some new buildings. The coins were found at a depth of forty feet and ranged in date from 1561, the time of Napoleon III. At first they were supposed to be part of the treasure generally believed to have been buried by the pirate, Kidd, but the presence of a coin of
