WEEKLY MARKET LETTER.

Downing, Hopkins & Company's Review of Trade.

There was much activity in the Chicago market during the past week. There was a temporary advance in July wheat of 5 cents per bushel, but the end of the week shows a tendency to sell out on the confident assertions that the present week will see a good beginning of the movement of wheat to market.

There is no indication that the demands from the milling interests will be sufficient to head off any great quantity of it as the flour trade is apparently calling for lessened rather than increased production. It therefore remains with the farmer to say whether or not he will sell now or at some time in the future. The developments of the last few days lead the trade to believe that there will be the usual liberal marketing of wheat almost direct from the harvester. Looked at in the broad sense, however, the wheat market is in a strong position the world over, and the coming twelve months should see a higher price level than the last twelve. America should take a more than usually prominent part in the trade of the year, as the present crop promises to be not only the finest quality but relatively larger than that of any other country. The government figures on production issued July 10, are practically ignored by the trade. They indicate a crop nearly 40,000,000 bushels less than the most radical in the trade will estimate. The weak point in the report is the notoriously inaccurate figures on area. No one in the trade will seriously entertain the proposition that Oklahoma has but 200,000 acres in wheat this year.

The London Times of recent date says: "The prospect of the harvest in Eastern Europe are disquieting indeed. In Austria and Hungary and along the whole line of the Danube the harvest will be bad. Immense tracts of cornfields in Serbia, Bulgaria and Roumania have been laid under water by destructive floods, and what water has spared, rust has greatly injured. So bad, indeed, is the prospect that Austria and Hungary, instead of exporting wheat will have to import it. At any rate it is clear that the wheat supply from the Danube is likely to be exceedingly small, if not altogether wanting this season."

ENTERPRISES OF GREAT PITH AND MOMENT

flave, are now, had their currents "turned awry," as Handel says, by an attack of dyspepsia. Napoleon failed to improve his advantage at Austerlitz in consequence. It is said, of indigestion brought on by some indigestion in eating. In order to avoid dyspepsia, abstain from over indulgence, and precede the meal by a wineglassful of Hostetter's Stomach Bitters, more effective than any dietetic in improving the tone of the stomach. Liver complaint, chills and fever, and rheumatism are annihilated by the Bitters.

In Rome there are few houses bearing the number 13. Nearly all the houses that should bear those figures are marked 12B or 14A.

AN OPEN LETTER TO MOTHERS.

We are asserting in the courts our right to the exclusive use of the word "CASTORIA," and "PITCHER'S CASTORIA," as our Trade Mark. I, Dr. Samuel Pitcher, of Hyannis, Massachusetts, was the originator of "PITCHER'S CASTORIA," the same that has borne and does now bear the facsimile signature of CHAS. H. FLETCHER on every wrapper. This is the original "PITCHER'S CASTORIA," which has been used in the homes of the mothers of America for over thirty years. Look Carefully at the wrapper and see that it is the kind you have always bought, and has the signature of CHAS. H. FLETCHER on the wrapper. No one has authority from me to use my name except the Centaur Company of which Chas. H. Fletcher is President. March 8, 1897. SAMUEL PITCHER, M.D.

The Lord Mayor's Robe.

The lord mayor of London is entitled to wear an earl's robe whenever a crowned head visits the city. The present lord mayor had such a robe made for use at the recent jubilee festivities which cost him £500.

A little thing happened down at the home of Schilling's Best tea the other day that cost the firm a clean \$200, and the most interesting feature of the matter is that they could have got out of paying it if they wanted to—because it was a voluntary thing and no one expected them to do it.

It seems that, in the earlier part of the missing word contest, A. Schilling & Co. promised \$100 each to the two persons who sent in the largest number of Schilling's Best yellow tickets before June 15.

It seems fair that the consumers of the tea should get those prizes. A grocer has a better opportunity for collecting tickets; and then, too, he makes a profit on the tea. But two grocers won the prizes, and A. Schilling & Co. paid the money.

Now comes the funny part—they wanted consumers to get \$200, and were determined they should. So they paid another \$200 to the two consumers who had sent in the two largest numbers of tickets.

A Botanical Clock.

Among the botanical curiosities which have been found in the isthmus of Tehuantepec, lately much explored by naturalists, is a botanical clock. It is a flower which in the morning is white, at noon is red, and at night blue, and the alterations of color are so regular that the time of day can be told from the tint of the flower.

It is well known that continued darkness has caused the vision of animals to become partially destroyed.

TO MOTHERS OF LARGE FAMILIES

In this workaday world few women are so placed that physical exertion is not constantly demanded of them in their daily life. Mrs. Pinkham makes a special appeal to mothers of large families whose work is never done, and many of whom suffer and suffer for lack of intelligent aid.

To women, young or old, rich or poor, Mrs. Pinkham, of Lynn, Mass., extends her invitation of free advice. Oh, women! do not let your lives be sacrificed when a word from Mrs. Pinkham, at the first approach of weakness, may fill your future years with healthy joy.

Mrs. A. C. BURLER, 1123 North Albany avenue, near Humboldt Park, Chicago, Ill., says: "I am fifty-one years old and have had twelve children, and my youngest is eight years old. I have been suffering for some time with a terrible weakness; that bearing-down feeling was dreadful, and I could not walk any distance. I began the use of Lydia E. Pinkham's Vegetable Compound and Sanative Wash and they have cured me. I cannot praise your medicine enough."

Prussia's Amber Monopoly.

The working of amber in Prussia is a monopoly in the hands of a firm which owns the two best mines, the Palmnick-en and Kraxteppe. For the concession it has, according to a report from the British consul at Dantzig, to pay to the German government a royalty of 650,000 marks a year. It is reckoned, says the London News, that this firm has, up to now, paid no less than \$1,000,000 in royalties to the German government. In addition to the output from the mines in 1895, a good deal of amber was picked up on the beach at the Pillau, in the province of East Prussia, being washed up with the seaweed during the prevalence of northwesterly gales. The shore at Pillau after a storm is sometimes covered with a layer of seaweed three feet thick, among which the amber is found entangled. Men, women and children find easy and lucrative employment in searching for the amber along this part of the amber coast. The people engaged in this precarious work often earn \$6 a day or more. In 1895 about 100 tons of raw amber came to Dantzig to be worked up, as compared with 140 tons in 1894. It is nearly all melted to make lac and varnish. The larger pieces are also made into beads, which are sent all over the world. The beads known to the trade as the Leghorn corals, are in strong demand.

Russian Railroads.

Russia, with over 4,875,000 square miles more than the United States, has 158,000 miles less of railroads, says the Boston Courier. Most of the engines burn naphtha. Oil for fuel, with excellent results. This oil is the refuse from the first refining and costs about 40 cents per barrel. This oil is also used for general lubricating purposes. None of the engines have bells, but instead they have two whistles. The engines are finely painted, the wheels red, the frame black, jacket and cab green, with a fine black stripe; the inside of cabs nearly white, or cream color. The speed of freight trains is limited to 20 miles an hour, and the fast express is limited to 35 miles per hour. In switching and making up of trains all signals are given by sound—that is, the switchman has a tin horn which he blows and the engine driver is obliged to repeat this signal by whistle before he goes ahead. When an engine stops the engineer is required to give three short whistles.

Singular Effects of Cold.

A bar of lead cooled to a point about 300 degrees Fahrenheit below zero, according to the experiments of M. Pictet, gives out, when struck, a pure musical sound. Solidified mercury, at the same temperature, is also resonant, while a coil of magnesium wire vibrates like a steel string.
