

YOUNG GIRLS.

Their Conduct and Health Often Mystifies Their Mothers.

Young girls often feel, and consequently act, very strangely. They shed tears without apparent cause, are restless, nervous, and at times almost hysterical.

They seem self-absorbed, and heedless of things going on around them. Sometimes they complain of pain in lower parts of body, flushes of heat in head, cold feet, etc.

Young girls are not free from incipient womb troubles. Mothers should see to it that Lydia E. Pinkham's Vegetable Compound is promptly taken; all druggists have it.

BOUNDARY LINE IN DOUBT

Part of the Yukon District Is Really in Alaska—Efforts Will Be Made to Reclaim It—Complications May Follow.

Port Townsend, Sept. 6.—A letter just received from John U. Smith, United States commissioner at Dyea and Skaguay, intimates that government officials now on the way to the Upper Yukon may by their official acts bring on serious international complications with the Dominion government.

It is announced here by a deputy United States marshal that the United States government is to make claim for a large portion of the Yukon gold fields which have heretofore been supposed to be in British territory, and that the territory which is claimed as being within Alaska includes Dawson City.

The basis of the claim to be made by the United States official to the disputed territory is in the fact that the boundary line has never been determined, and that the United States claim to possess information as to surveys made by the Canadian government that fixes Dawson City and a large portion of the district in Alaska.

Tars Attacked by Gold Fever. Santa Rosa, Cal., Sept. 6.—A letter has been received by Deputy Postmaster Griggs from his son, Joseph, who is a member of the crew of the United States gunboat Concord. The letter is dated Juneau, August 25, and gives details of the desertions of 45 men from the Concord during its cruise in Alaskan waters.

To Klondike by Balloon. Toronto, Sept. 6.—Aeronaut Leo Stevens has successfully tested his new generator for manufacturing gas for his balloon, and says he will leave for Klondike the latter part of this month.

ALASKA'S SILENT CITY. Members of the Luigi Party Say They Saw the Mirage.

Seattle, Sept. 6.—Alaska's Silent City has emerged once more from its mysterious hiding place, and revealed its presence to five members of the party that accompanied Prince Luigi up Mount St. Elias. In the early morning of July 13, the party, while returning from the ocean with supplies, suddenly saw the city mirrored in the clear atmosphere.

In the public schools in Japan the English language is required by law to be taught.

WEEKLY MARKET LETTER.

Downing, Hopkins & Company's Review of Trade.

We have had a week of nervous, erratic markets, fluctuations covering a wide range, but finally settling near the figures of a week ago. Receipts are comparatively light, with a good demand both home and abroad.

There has been a very firm undertone to corn, and while it has reacted from the sharp rally that followed the break of last week, yet there is no sign of any real weakness and there is a feeling that it will seek a much higher level of prices than those now prevailing.

Mr. Grocer: there are thousands of people who want good tea (many don't drink tea now, because it has been either costly or bad) and here is Schilling's Best—good tea at a fair price.

Don't you want to sell lots of such tea, and money-back if it your customers don't like it?

The Age of Deer.

Romance has played a prominent part with regard to the longevity of deer, says a writer in Chamber's Journal. What says the Highland adage? Thrice the age of a dog is that of a horse.

This is to assign the deer a period of more than 200 years; and the estimate is supported by many high circumstances. Thus, Captain Macdonald, of Tulloch, who died in 1776, aged 86 years, is said to have known the white hind of Loch Treig for 50 years; his father for a like period before him and his grandfather for 60 years before him.

United States Senate Employees. Thirty years ago 70 employees of the United States senate were on the pay roll. Today the number is 354. The large increase is in proportion not only to the size of the senate, but as well to the increase in public business, due to the enormous development of the country.

Gave His Father the Promotion. A case of a son's thoughtfulness and affection for a father has come to light in the navy department, at Washington.

DO WE NEED BIG MUSCLES? By no means. Persons of herculean build frequently possess a minimum of genuine vigor, exhibit less endurance than very small people.

Vaccination has just been introduced into Afghanistan by the advice of Miss Hamilton an English physician, who is in attendance upon the Ameer.

The ancients knew how to cheat. Loaded dice have been found in the ruins of Herculaneum.
