Convention Held in Astoria-Nominations and Platform.

The Republican state and congressional conventions were held in Astoria last week. The congressional convention, which met on Wednesday, nominsted Malcolm A. Moody, of Wasco county, for representative for the second

Thos. H. Tongue, of Washington county, was nominated for representative for the first district at the congressional convention held in Eugene a few days previously.

The state convention met on Thursday and completed a state ticket before adjournment was taken.

The following resolution was adopted immediately after organization was effected:

"Resolved, That the following message be at once wired to President Mc-Kinley: 'The Republicans of Oregon, in convention assembled, to the president of the United States, greeting: With the utmost confidence in the wisdom of your administration and pledging you the support of the state of Oregon, we express our earnest convictions that the Maine was destroyed by design or criminal neglect of Spanish officers, and that this outrage is just cause for the United States to drive the Spanish nation from the Western hem-

Superintendent of public instruction -J. H. Ackerman, of Multnomah.

The Platform.

"We, the Republican voters of the state of Oregon, in convention assembled, congratulate the people of the state as well as of the whole nation on the unmistakable fact that the dark cloud of adversity, which has hung like a pall over our fair land, has been dissipated. We recognize that the return of prosperity is due to the restoration of the Republican party to power.

"We are in favor of the maintenance of the present gold standard; we are unqualifiedly opposed to the free coinage of silver and to all other schemes looking to the debasement of the currency and the repudiation of debt. We believe that the best money in the world is none too good to be assured by the government to the laborer as the fruit of his toil and to the farmer as the price of his crop. We condemn the continued agitation for free silver as calculated to jeopardize the prosperity of the country and to shake the confidence of the people in the maintenance of a wise financial policy; we particularly condemn as unpatriotic the efforts of the free-silver agitators to array class against class and section against section: we declare that the interests of all classes and of all sections of our country alike demand a sound and stable financial system.

"While we deplore the imminence of war, we recognize that the country is on the eve of war, undertaken for the vindication of the national honor and the performance of a work dictated by every instinct of humanity; we declare that the administration is entitled in Eastern Oregon, this conflict to the confidence and support of the entire people.

"We are firmly attached to the principles of the federal constitution; we recognize that representative government is one of these principles, and we are opposed to any change in law or constitution which will abrogate this time-honored principle.

"We are in favor of retrenchment and reform in state and county matters. "We demand strict economy in public affairs, and the abolition of all needless offices and commissions.

"The salmon fishing industry, so fruitful a source of revenue to the state, should be fostered, and to that end we favor state aid in the artificial propagation of salmon, and their distribution in the waters of this state.

"We affirm our allegiance to the principles of the Republican party of the United States, as enunciated by the Republican convention in St. Louis in

"We denounce the fusion party of Oregon as an aggregation of spoilsmen, who are ready to subordinate principles to offices. Each of the parties to this compact is willing to stultify itself and form alliances with elements which it has heretofore denounced as dangerous and unfit to be intrusted with power; we declare that good government cannot come from such an alliance."

A Western man has designed an endless chain propeller for boats in which a double chain of buckets is hung to two shafts extending crosswise through the boat, with power transmitted to the shafts by piston rods attached to a crank section in the center of each

Moscow has a hospital large enough to hold 7,000 persons. It was founded in 1764, and at present takes in children at the rate of 40 a day, or about 15,000 a year. There are 26 physicians and about 900 nurses.

Very Caloric.

The emotional literateur has just written a piece of which he was very proud. The editor looked it over and then said: "Do you candidly think such opinions

ought to go into cold type?"

'I don't know much about the practical work of printing," was the reply, "but I don't believe it makes any differ-Even if the type is cold I guess that article will take the chill off it." -Washington Star

WEEKLY MARKET LETTER.

Frade Conditions in the Leading Cities of the World.

A year ago wheat traders were theorizing as to the effects on the price of wheat of a war between Turkey and Greece. Neither of those combatants was a wheat producer, but the near fear of the contest involving Russia kept the price for a month swinging through an unusually wide range, and advanced quotations about 10c a bushel, half of t on the Monday following the opening of hostilities. It is surprising that the wheat-consuming countries abroad, in anticipation of a war involving their chief source of supply, have of late been ignoring everything except this possibility, have been maintaing prices in spite of a declining tendency at times on this side, and have been making cash purchases with unexpected energy?

The United States is furnishing at present half of the wants of the wheatimporting countries of the world, about 4,000,000 bushels of the 8,000,-000 bushels supplied weekly. Would the grain operators abroad, whose office it is to anticipate the world's situation, take phlematically a war which threatened to embarrass even in the smallest way this vast weekly supply and which might possibly affect it seriously?

That is hardly to be assumed. Indeed, it has not been the fact. The other side for a fornight, incredulous as everybody has been all this time of the differences growing into an actual conflict, has been ignoring fine crop prospects at home and large offerings, and has been making liberal purchases from America at prices which have been a surprise to the American trade, It was really remarkable that Leiter could sell 200,000 bushels abroad Easter Saturday. These are indications that if a declaration of war removed all the present doubts the price of wheat abroad would advance sharply.

The effect of war on home prices is not easy to anticipate. Sentiment would be a factor. Quick, decisive successes exhilirate a nation as they do individuals, encourage business as well as national ventures and quicken speculation. Any advance in the wheat price on the other side would be predicted upon some embarrassment to the export of American wheat.

Blood

Blood

Is Health.

Without blood circulating through your reins you could not live. Without pure blood you cannot be well. If you have salt rheum, scrofula sores, pimples, boils or any kind of humor, your blood is not pure. If you take Sarsaparilla it will make your blood pure and promptly relieve all these troubles.

"I wish to add my praise for the merits of Hood's Sarsaparilla. It has cured me of a lung trouble and fluttering of the heart, and since I began taking it my weight has increased twenty pounds, and I can now enjoy my meals and eat with comfort, I recommend Hood's Sarsaparilla as the best medicine that it is possible to find."-C. W. Carey, Prineville, Or.

Hood's Sarsa-Is America's Greatest Medicine. Sold by all druggists, \$1; six for \$5. Get only Hood's.

Hood's Pills are the only pills to take ANIMALS AS MODELS.

Some of the Experiences of an Artist is

Sketching From Life. "Leaves from the Sketch Book of an Animal Artist," is an article by Meredith Nugent in the St. Nicholas. Mr. Nugent says: There was an elephant in the Jardin-des-Planets that would not pose unless he were paid for it, and the tender. paid in advance. Then he took payment in buns and pie, but if these were not forthcoming, he would deliberately walk to the farther end of the enclosure and turn his back. The only way to get a drawing of this big fellow was to engage some one to feed him meanwhile. In the same gardens I saw an unusually interesting sight one morning. A little sunbear with a large marrow bone in his shaggy paws was resorting to all sorts of bear devices to get the sweet marrow. Suddenly he lay down on his back, placed one end of the bone in his jaws, and with his hind paws tipped the other end of the bone so high up that the choice morsel slipped into his mouth. If the animal could only have understood the shouts

of approval that greeted this performance, I think it would have turned his head. In one of the sketches you will see how this feat was accomplished. As a rule I find the models very good natured. True, they keep a sharp eye on me for the first few days, but after that are generally quite friendly. Of course, there are some parts of the business they do not like. The oriole never was happy when I held him in my hand for close inspection, but a beautiful cat which rebelled when I first piaced her in a bird cage-to keep her in front of me-grew so fond of being there, and after I finished my drawings she cried and cried to be put back into the cage. Intense curiosity is the great characteristic of animals when in the studio. They are as much interested in you and the surroundings as you are in them. This is especially the case with birds. Leave the studio

ing, and the paints, and the brushes, and occasionally vary these proceedings by taking a bath in the water bowl. THE TWENTIETH CENTURY.

but a few minutes, and these two-

legged fellows are hopping into every-

thing. Of course they inspect the

paper on which you have been draw-

The twentieth century will begin on Jan. 1st, 1901, and end with 2000. People did not begin to recken time from A. D. 1, but waited until about the 650th year of the Christian era. People who begin to take the great health restorative, Hostetter's Stomach Bitters, immediately after the first outbreak of dyspepsia, malaria, rheumatism, constipation, nervousness or kidney trouble will date their cure immediately from them.

Draughting compasses are being made with a flexible rubber suction cup of one end to fasten to the paper and hold the instrument while the circle is being drawn.

In the spring cleanse your system by using Dr. Pfunder's Oregon Blood Purifier.

Bad Boads Are Costliest.

When once the fact gets firmly established in the minds of the farmers of the United States that it is more expensive to maintain bad roads than to make and keep in condition good roads they will take active interest in the question and an era of road building will begin which will add to their wealth, prosperity and comfort, and benefit the country at large as much' as has the laying of railroad tracks and the advance of the steam locomotive. Let those engaged in agriculture study such figures as those recently issued by the supervisor of New York, wherein he shows that it costs half as much to haul produce three miles by wagon as it costs to haul it 500 miles on the railroad. The supervisor figures out that with a system of good macadam roads each year equal to the interest on from \$10 to \$30 an acre, according to the ply the whole Pacific coast. crop raised, and would increase the value of their land either to sell or hold by a like amount.

Church Built of Coral-A church built of coral is one of the

curiosities of the Isle of Mahe, one of the Seychelles islands in the Indian ocean. The Seychelles islands, which are supposed by many to be the site of the Eden of Old Testament history, form an archipelago of one hundred and fourteen islands, and are situated about 1,400 miles east of Aden and 1,000 miles from Zanzibar. They rise steeply out of the sea, culminating in the Isle of Mahe, which is about 8,000 feet above the level of the ocean, and is nearly the center of the group. All these islands are of coral growth. The houses are built of species of massive coral hewn into square blocks, which glisten like white marble, and show themselves to the utmost advantage in the various tinted green of the thick tropical palms, whose immense fernlike leaves give pleansant and much-needed shade. These palms grow as high as 100 feet and more, overtopping both the houses and the coral-built church. They line the seashore and cover the mountains, forming in many places extensive forests.

A CHEAP TRICK.

To manufacture a cheap kalsomme stuck on the wall with glue, claiming it to be the "same thing" or "just as good" as the durable Alabastine, or to buy and sell such goods on such representations would seem a cheap trick. Some resort to it. To be safe buy Albastine only in preferees and safe, buy Albastine only in packages and

One of the heaviest locomotives of ordinary pattern ever made is now running over the Great Northern railroad. It weighs 95 tons, exclusive of
