Indian Sampson of the Warm Springs gave the GLACIER a call Mouday. Sampson is a very old man and was a scout with Col. Wright in the Indian wars over 40 years ago, and in the Mo-doc war he was with Gen. Canby and lost his left arm, which was broken by a bullet and hangs helpless by his side. Sampson claims to be 110 years old, but we would not give him credit for more than 75 years. He has papers to

he carried through the civil war. It was stolen from him some 18 years ago, and since the present war begun and he expects to command a company if more troops are called for, he caused the lost sword to be advertised. A few days ago it came to him by express. It has engraved on the scafford his name and the battles he passed through, and of course he prizes it very highly.

Almost Dilapidated.

The original Declaration of Independence is in so dilapidated a condition that nowadays it is rarely if ever exposed to view. The Ladies' Home Journal was recently granted special permission by the secretary of state to make a single exposure of the document to the camera, and will reproduce the photograph, which is remarkably clear one, in the July issue of that magazine. Exposure to light and the process of making a duplicate copy of the declara-tion have faded the ink in the historic document, but it is still legible. Some of the signatures are nearly faded out, John Hancock, however, seems to have used an imperishable ink, for his name stands black and bold on the parchment, which is now kept in a steel safe, out of the sunlight and out of the public's view.
