There was about 25 out from town. An excellent lunch was served in the old building, after which the tables were put away and the young people enjoyed themselves playing games. Mr. Davis Divers returned from a two month's visit to his old home in Missouri. Mr. Divers came to Oregon in 1852, and during all these 46 years had not been back to visit his relatives and friends in the "states." He found many of his old school-mates yet living and passed a very pleasant two months visiting with relatives and friends. He says he didn't have a good drink of water while he was gone from Hood River and is glad to get back where he can drink when he is thirsty from the fine waters of the spring on his own place. Mr. Divers says he wouldn't accept of the best farm in his old neighborhood in Missouri as a gift if he had to live on it.

Mr. Arthur Disbrow is one of the successful fruit growers of Hood River valley. His place is 14 miles from town, in the upper forks of Hood river. In altitude he is above the codlin moth and doesn't have to spray for this pestiferous insect. His orchards this year produced 1,000 bushels of sound apples. About 300 boxes of fall apples he sold in Portland, which brought from 65 to 75 cents a box. Mr. Green bought 439 boxes, paying 75 cents for Greenings and 85 cents for Baldwins. About 300 boxes will be kept by Mr. Disbrow till spring.

An adjourned meeting of the county court was held on Monday at The Dalles, when A. A broad smile illuminates Dallas' countenance at all times during this cold snap. No one has been caught yet with bursted water pipes, but the plumber knows that, as the weather grows colder from day to day, sooner or later there will be calls for his services.

The weather changed last Sunday and turned cold, and since then the thermometer has gone lower and lower until Thursday morning it stood at 23 degrees above zero, with a biting east wind. A fog hangs over the valley and the sun is obscured most of the day.

Little Maude, a four year old, woke up in the night and asked her mother, "What's that little girl's name that lives over the drug store?" "Her name is Joy," replied the mother. "Oh, yes," said Maude, and she started to sing "Joy cometh in the morning."

THE PEOPLE'S STORE.

The Boys Will Soon Come Home.

The Rocky Mountain News prints the following telegram from Secretary Alger, dated Washington, Dec. 6th:

"It is proposed to send regular regiments to relieve the volunteers in Manila just as soon as transportation can be arranged. The volunteers will be returned to the United States in the order in which they left."

The cry is going to Washington from every state to let the volunteers come home, and the boys, tired, sick, and worn out, are begging to be allowed to return. The president has said it was his purpose to replace the volunteers with regulars, and has asked congress to increase the army sufficiently to allow him to do so. Taking all of these things into consideration, there can be no doubt that the information contained in the telegram from Denver is entirely correct. It is the opinion of those who have given the matter thought that the exchange could not possibly be completed in less than three months from the time it begins, and as the regulars are ordered to be ready to sail from San Francisco between January 5 and 12, it may be April or May before the Oregon boys get home. Within less than a year from the time of their departure it is very probable that the brave boys of Oregon will again be settled down in their native land.

Will be a Big Ad for Oregon.

The executive committee of the national editorial association meets January 15th next, probably at Buffalo, at which meeting the Oregon committee will be represented and will recommend a time for the annual meeting of the association at Portland as well as tell what entertainment is in store for the association. The Oregon committee has the advertising possibilities for the state in mind, and will present a scheme to the citizens through the local press that is novel and graphic. It is proposed to have a few photographs made of special attractions in each county. From these line drawings are to be made, then zinc etchings. These etchings are to be stereotyped in editions of 100 or 150 and offered to the visiting editors free of charge, for the illustration of the articles they write for their home papers. This will require some money, but it is believed that the people of the state will cheerfully bear the expense for the sake of the valuable advertising it will insure in every part of the Union. The state secretary will shortly lay the plan before the newspapers of the state. The organization of the state press association is used to commence this work but it will not be confined to that organization. The members of the national association will be the guests of the state, and the press of the state must be host.

San Jose Seale.

Rural Northwest.

The fruit growers of Oregon are getting pretty well stirred up on the subject of fighting the codlin moth. They must not overlook the fact, however, that the San Jose scale has been spreading rapidly in the state in the past two years. The state board of horticulture now has funds to work with, and the members of that board will undoubtedly be looking after the matter. It will be impossible, however, for them to visit more than a small fraction of the orchards. Every fruit grower should examine his orchard for himself. Red spots with dark centers on fruit or twigs are very likely to be evidence of the presence of San Jose scale. Branches of trees affected by the scale have a dirty, greasy appearance. It is really easier to fight the San Jose scale than the codlin moth, and it certainly does not pay to allow orchards to remain infested with it.

A Kansas correspondent of the Western Fruit Grower says he last year kept 1000 bushels of apples in his barn with a smaller percentage of loss than he had the previous year when he placed his apples in a cold storage warehouse. After storing the apples in the barn he placed a double tier of baled hay all around them and two layers on the loft floor overhead so as to make the storage room almost airtight. On cold days the barn door was opened for from five to eight hours and in this way the temperature was kept low enough to preserve the apples.

Just a Few Left,

And they must be sold right away. In order to do this we will sell them at cost. Ladies' Jackets and Capes are what we are talking about. The cold weather is here, and these are warm numbers. Don't miss this chance. Just the thing for a nice Christmas present. We have other Christmas goods, too, and now is the time to buy, while there is plenty to choose from and while you have plenty of time to choose.

Two Pointed Questions Answered.

What is the use of making a better article than your competitor if you can not get a better price for it?

Ans.—As there is no difference in the price the public will buy only the better, so that while our profits may be smaller on a single sale they will be much greater in the aggregate.

How can you get the public to know your make is the best?

If both articles are brought prominently before the public both are certain to be tried and the public will very quickly pass judgment on them and use only the better one.

This explains the large sale on Chamberlain's Cough Remedy. The people have been using it for years and have found that it can always be depended upon. They may occasionally take up with some fashionable novelty put forth with exaggerated claims, but are certain to return to the one remedy that they know to be reliable, and for coughs, colds and croup there is nothing equal to Chamberlain's Cough Remedy.
