Some one broke into our town jail, last week, and robbed it of the keys, but provided by the authorities for the use of guests. It is not often we hear of any one breaking into jail.
T. C. Dallas has rounded the half-century milestone. His birthday was Feb. 5th. Fat, still fair and fifty. May he live several more half centuries. It would be a cold world, at least in these parts, without T. Callippe Dallas.

Snow fell and melted about as fast as it fell, nearly all day last Friday—ground fog day. Saturday was a beautiful day, and the weather has since been spring like. We have had no severe weather so far, and it is not likely the ground fog, or any other hibernating animal, ever hauled up all winter in this section.
Railroad work has gone along uninterruptedly all winter at this place. Graders are now at work moving the big bowlders and dirt away from the main track to a room for a switch that will be put in on the south side of the main track. The W. C. T. U. sent for County Surveyor Golt to locate the eastern boundary line of our town. Mr. Golt came from The Dalles on Monday and did the work. His survey showed that the bank house of the Lost Lake Lumber company was 42 feet east of the corporation line. This disqualifies about 25 workmen who make their homes at the bank house from voting for town officers. These men voted at the late town election, and most of them signed the petition for the saloon license.

Government Aid Asked.
In view of the great damage done to apples by the ravages of the codlin moth, the Oregon state board of horticulture adopted the following resolutions and sent copies thereof to the state boards of horticulture of California, Montana, Idaho and Washington asking them to co-operate by adopting the same or similar resolutions. Copies of the resolutions will be duly forwarded to the department of agriculture and to the members of congress of the states in which the resolutions are adopted. Whereas, Apple growing has attained such immense proportions throughout the United States that it has become one of the largest industries, and whereas, this industry has been and is seriously threatened with destruction by the codlin moth so universally distributed, defying in a great measure, all known remedies; and whereas, we find that this codlin moth does not exist nor do injury to apples immediately along the Pacific coast tide water line as far north as British Columbia, though repeatedly introduced in infested fruit brought from elsewhere, therefore, be it Resolved, That we most respectfully ask our delegates in congress to use their best efforts with the department of agriculture to send a special scientist to investigate this fact and give us the result of his conclusions, and devise if possible from such examination, some reliable method of destruction of the pest; and whereas, It has been asserted that in southern France where the codlin moth is ever present, it has been kept in check by its natural enemies, we beg you to urge upon the department the advisability of sending into south Europe a qualified scientist to ascertain the facts in the case, and if the statement is found to be true, to arrange for the importation of these natural enemies of the codlin moth.
