D. C. Fouts, of Michigan, who has been visiting his brother, P. F. Fouts of Mt. Hood, left on Wednesday for a trip to southern Oregon. Mr. Fouts is quite well pleased with Hood River, and may conclude to make his home here at some future time. He had an adventure with a cougar, while fishing in Hood River, near Mt. Hood, last week. The cougar seemed to be following his track when he spied him, and, having his gun along, gave him a shot. The cougar was badly wounded, but managed to get away. Mr. Fouts was a soldier in the 1st Michigan sharpshooters during the civil war.

This popular summer resort is compelled to refuse to take guests some days on account of being overcrowded.

The strawbarry yield is not so good this year as in former years. Some think the shortness is caused by the severe frost we had in April. Various causes are given but many are of the causes are given, but many are of the opinion that the Clark's Seedling strawberry is running out, the fate of all plants of its species. Our growers have been careless in selecting plants when setting out a new plantation. No other setting out a new plantation. No other hand been careless in selecting plants when setting out a new plantation. No other setting out a new plantation. been careless in selecting plants when setting out a new plantation. No other berry has yet been found to be as good as the Clark's Seedling for Hood River, and this favorite variety might be saved to us for years to come, by judicious selection of new plants. Setts should be taken only from new plants, and these new plants should not be allowed to mature fruit.

The big yard and hitching facilities at Crowell's store are a great convenience to farmers and others; but sometimes teams are left standing in this yard till a late hour at night, much to the annoyance of Mr. Crowell's family, who occupy the upper story of his store building. Mr. Crowell says the yard is for the accommodation of the public to hitch their teams in daytime, but if hitched there at night there is too much racket made by the teams when his family desire to sleep. He asks persons who know they will be kept in town to a late hour to kindly hitch some place where their teams will not bother persons in the quiet hours of the night. The big yard and hitching facilities at

The Davidson Fruit Co. has grown to large proportions. A visit to their works nowadays will surprise most of our citizens who have not kept posted on the amount of business being done by this company. The two large buildings are alive with bury people day and night during the season for shipping and canning berries. The cannery is now at work putting up strawberries. About 300 crates of berries are canned per day, and a force of about 100 women and girls and boys are employed at hulling and preparing the berries for the big kettles in the cook room. Orders are received in advance for the canned product. The company has a new engine, and a larger dynamo is now being put in that will generate electro light enough for every part of their warehouses and workshops. A room has been set apart for a tip shop which will are the developing and is known as the Logan berry. There are bushels of fruit on the vines and others near by. This fruit, under Mr. Watson's care, attains remarkable size. Some of the berries will measure two inches in length. Mr. Watson's place is visited daily by persons from abroad, who come to see Hood River, and all acknowledge that his fruit and vegetable and flower gardens and pleasant surroundings make an ideal home. His walls of concrete, is a model structure. All visitors are delighted with it. No one can see Hood River without calling at the Watson place.

The recital in elocution and music by houses and workshops. A room has been set apart for a tin shop, which will be in operation in another week, and the company will manufacture their own cans. The facilities for loading own cans. The facilities for loading are not the track at the company's warecars on the track at the company's ware-house are complete. An elevator, con-structed after Mr. Davidson's own idea, is used to lower the crates of berries from the upper stories. A car is loaded

in one hour. The price of strawberries keeps up well. The cash price here went down to \$1.40 last week, but went up again to \$1.40 last week. So a crate, but growers known to put up only a good quality of berries are offered an advance on this price. In the early patches picking has ceased; the later patches picking has ceased; the later patches were singled out, and weeks. Miss Bess Isenberg returned on Tuesthose two crates were singled out, and none of the others marked. The mer-chant said: "Here are berries from California; here are Missouri berries, and here are Kansas berries, but these marked 'Hood River' are the best. marked 'Hood River' are the best. They come from Oregon, where they can grow the best berries, and where they know how to put them up in good shape for market." She then told the merchant she was from Hood River, and asked to see the berries. He opened a crate and they proved to be very fine. in West Hood River precinct. They were from H. J. Hibbard's fruit
