Big Squashes,

A man from Twin Oaks farm called at the Glacier office Tuesday. Seeing W. P. Watson's big squash, he was reminded of the big squashes grown in Nebras-ka. He said he worked for a man who had five acres in corn and squashes. The squashes were so big they couldn't get them into a common wagon bed and had to put on the hay rack to haul them in from the field. The man took off enough equashes to fatten 60 head of beef cattle that winter, besides 40 bushels of corn to the acre. It is claimed that the "coffee" forecast is a reliable way of determining what the weather is going to be. In order to

see what the weather will be you must drop carefully into your morning cup of coffee, prepared with a little milk, two lumps of sugar. Do not stir the coffee. If the bubbles ascend rapidly, separate quickly and fly to the side of the cup, there will be much rain within the next twenty-four hours. If they gather slowly and gravitate in a cluster to the side. only possible showers may be expected. I know the circumstances of the people of Hood River and vicinity and know that many who now run short accounts would be as willing to pay cash if they could save from 5 to 15 per cent on their purchases

I am tired of the annoyance of keeping accounts and have decided that on and after Saturday, September 22d, I shall sell no goods except for cash in hand. I have always been favored with a large cash trade in Hood River, and as two sets of prices can not be maintained in the same store, cash customers are charged credit prices and contribute along with others to pay the extra expenses of conducting a credit business, which is unfair. It is to meet this condition that all accounts will be closed Friday evening, Sept. 21st. Yours very truly,

Waucoma

The Most Attractive of Hood River Suburbs.

Is now for the first time placed on the market. In laying out this new addition the proprietors have given to the man of moderate means an opportunity to make himself a home in the lovliest portion of our beautiful village. The inducements to locate are many. It is healthy; no dust, mud or wind; it is close to one of the best regulated public schools in Wasco county; the great public highway from the city to the country passes on the west side of this addition, but not through it, so the streets will not be muddy in winter nor dusty in summer. Several wells have been bored and fine water found at about 16 feet. An abundance of water for irrigating purposes can be had at small cost to reach every lot. This is an ideal spot. The home-seeker that neglects this opportunity is not wise. You can get a lot now from first hands cheaper than you ever can again.

Hood River property has never retrograded in price. Don't believe the creakers when they tell you that the town is done growing, that there is nothing for the town to grow on. It has been sung ever since the first store was built, still it has kept on growing and will continue to grow long after every lot in Waucoma Park is sold. There are rumors in the airhave you heard them?-that mean this: A great hotel close to Waucoma Park, another at Mt. Hood; a rail line to connect them, and which will bring out the tens of millions of feet of magnificent timber that line the hillsides and valleys. It will bring out train loads of ice from the everlasting glacier storehouses of old Mt. Hood. It will bring home-seekers that will buy lots in Waucoma Park Addition as long as there is any to sell. Buy now on your own terms; they will cost more soon. For full JOHN LELAND HENDERSON.
