CLEAN-UP IN FULL SWING.

Klondike Gold Pouring into Dawson at the Rate of \$40,000 Per Day.

Dawson, May 21, via Seattle, June 8.—The spring clean up is in full swing in all parts of the Klondike camp. Millions of dollars' worth of the precious dust has been washed from the mountain-like dumps of pay dirt that were taken out by the army of toiling miners through the long, weary winter months. Within a month \$5,000,000 or \$4,000,000 more will have been taken out and the washing of the winter dumps will be finished. The spring clean-up of the camp is estimated at \$15,000,000, and the summer output at \$10,000,000. The dust is coming into Dawson at the rate of \$30,000 to \$40,000 a day.

After two or three weeks the roads will be drier and it will flow in at a heavier rate. The two banks at Dawson are busier than they have been for months buying or receiving the dust for storage. The big trading companies are receiving a great deal of dust in payment for goods advanced to miners during the winter. The camp is in a flourishing condition, and everywhere good feeling prevails. The first shipments of dust of any consequence to the outside will perhaps not start for a week or two, or until the river is at a more steady stage and the boats run more regularly. However, there will be a rush of people out by the first boats, and all will carry more or less of the precious product.

The work of washing up is in progress on all the creeks, and all are sending in dust. Some of the more remote creeks are not sending much yet, because of the muddy condition of the roads or trails. Some of the trails are almost impassable for even the pack animals. What gold is sent from Gold Run, Hunker, Dominion, Sulphur, Eureka, Quartz, Last Chance, Gold Bottom and others of the outside creeks comes by horseback. The stages from Grand Forks frequently bring in as much as \$20,000 at a time, and it is no uncommon sight to see prosperous mine owners carrying into banks grips of the yellow metal that draw them heavily earthward.

A nugget, valued at \$38, was found on Pine creek in Eastern Oregon.
Sleet and snow fell at La Grande recently. No damage was done.

Governor Geer will deliver the Fourth of July oration at Baker City.
The Bonanza mine, in Eastern Oregon, yielded nearly \$90,000 for the May cleanup.

Cattlemen in the John Day district have organized for protection against cattle thieves.
The extension of the Sumpter Valley Railroad to Whitney has been opened to traffic.

The Lane County Veterans' Association met in Eugene. Eighty members were present.
There is strong ground for suspicion that John Stanley, who was found dead in Salem a few days ago, was murdered.

An extensive program was rendered at the commencement of the Oregon Agricultural College, Corvallis. There were 35 in the graduating class.

Cherries in Marion county are falling off prettily badly and appearances do not indicate as large a yield as expected. The size and quality promises to be good, however.

Coquille City is preparing for a Fourth of July celebration.
The treasurer of Marion county had on hand June 1 the sum of \$24,959.23.

The Linn County W. C. T. U. convention will be held the first week in August.
It is reported at Prairie City that "rustlers" are stealing stock in the vicinity of Grub creek range.

The question of bonding school district No. 8, Malheur county, in the sum of \$3,000, to improve the school building, will come before the voters June 15.

J. H. Timon has discovered a 14-foot vein of coal where he has been opening up a mine on Lampey creek, Coos county. The mine is located within 200 yards of the river.

There is some talk of moving the school house in district 92, Unmatilla county, to Missouri gulch or Stage gulch. The district is nine miles long and a number of the children live so far from the school building that they either stay at home or are put to great inconvenience during bad weather. There is also a sentiment for dividing the district.

SUICIDE OF DR. DALY.

Surgeon on Miles' Staff in Porto Rico—Insomnia Affected His Mind.

Pittsburg, June 10.—Major W. H. Daly, surgeon on the staff of General Miles in Porto Rico, committed suicide at his home by shooting himself in the right temple. The body was found in the bathroom lying in a pool of blood, with a 38 calibre revolver lying on the floor. Dr. Foster, who was summoned at once, found the bullet hole in the temple and announced that death had taken place several hours before. No cause is known for Dr. Daly's demerit temporarily insane. For some time he had been unable to sleep regularly. The doctor was a widower and leaves no immediate family. He was 69 years of age and for many years had been prominent in medical circles. He gained international prominence during the Cuban war, as it was his report to the commanding general of the army that started the "embalmed" beef inquiry.

SHE IS GOOD AT REACHING.
The Boston Yacht Independence Takes Another Trial Spin.

Boston, June 11.—The Independence had another short sail in the bay this afternoon, and the breeze being only moderate the yacht spread more canvas than has yet been hoisted. The sea was smooth, and again she proved her wonderful reaching qualities, besides showing considerable ability in windward work. Not only did she hold very well up to the three points, but she footed quite fast and tacked in the neighborhood of 20 seconds. The trial was confined to less than two hours of actual sailing, most of the time being spent on the wind or reaching, and as yet the yacht has not been sent dead to leeward, it being thought well to wait for the spinnaker and club topsail. There was no accident today, barring a slight rent in the mainsail, which rather hindered the setting of that great piece of canvas. The yacht may go out again tomorrow afternoon, although there is considerable work to be done upon her.

DYNAMITE IN A CAR.
Collision Causes Two Trains to Be Blown to Atoms—Six Lives Lost.

Binghamton, N. Y., June 11.—While a freight train on the Lackawanna was taking water at Vestal, 10 miles west of here, it was run into from behind by a double header wildcat train. In the second car from the caboose of the stationary train was a large quantity of dynamite, which was exploded by the impact. Six men were killed and three fatally injured.

Both trains were blown to atoms, but the remainder of their crews escaped with slight injuries. Much damage was done by the concussion, most of the windows in Vestal and Union, across the river from Vestal, being shattered. Binghamton's plate glass fronts did not escape, many of the largest glasses in the city being broken. The shock was felt at a distance of 30 miles.

REINDEER TRIP ABANDONED.
Officer Who is Now in Siberia to Secure the Animals May Starve to Death.

Seattle, June 11.—The annual voyage of a government ship to Siberia after reindeer, according to Dr. Sheldon Jackson, who left for the north on the transport Warren today, has been abandoned for the season. Lieutenant Berthoff, who crossed Beringia and Siberia last year to gather a herd of deer, will be left to get along as best he can until a year from the coming July. Dr. Jackson thinks Berthoff may starve to death or perish while waiting for a ship to take him off. He is likely to be left all alone, and to his own personal efforts for subsistence throughout next winter, as there are few natives where he will be. It will be impossible to attempt to rescue him until after next June, as the ice will permit no approach to the coast.

Prospector's Rich Find.
Davenport, Washington, June 11.—H. D. Winhoff, a prospector, arrived yesterday from Stevens county, having in his possession a gold brick valued at \$334. He refused to tell in what manner the specimen was secured, but evidently it was extracted in a crude manner from exceedingly rich ore, as it had been molded in a babbitt ladle.

Emperor's Return Postponed.
Shanghai, June 11.—An imperial edict, issued June 6, announces that, owing to the hot weather and the advanced age of the Dowager Empress, the return of the court to Peking has been postponed until September 1, which the astrologers pronounce to be a lucky day on which to commence a journey.

Fell From a Dome.
Buffalo, N. Y., June 11.—Commander J. H. Bull, of the United States navy, in charge of the hydrographic service on the Pan-American grounds, fell from the dome of the government building. His skull was fractured about the left eye, and one of his legs was broken. The hospital authorities say that, while his injuries are serious, he probably will recover.

ENTOMBED IN MINE

EXPLOSION CAUGHT SIX MINERS AND SET FIRE TO MINE.

Several Rescuing Parties Have Since Gone Into the Mine, but None Have Returned, and it is Feared All Have Been Overcome by Gas—Mine May Have to Be Flooded to Stop the Fire.

Port Royal, Pa., June 11.—The Pittsburg Coal & Coke Company's shaft No. 2, at this place, is again on fire, after running steadily for seven years, and at least 30 men are in the mine, many of whom, it is feared, will never be heard from again.

About 6 o'clock smoke was seen to be issuing from shaft No. 2, which is on the line of the Pittsburg & Lake Erie Railroad. It is thought the fire started from an explosion, and that six men were in the mine at the time. Two of the men, who were not near the point where the explosion occurred, were brought to the surface by a rescue party after being nearly overcome by after damp. They could give no information as to what caused the fire and could not say for sure how many others were in the mine.

After 7 o'clock Superintendent McCune, of West Newton, and several bosses with about 20 men went down shaft No. 1, which is just opposite on the Baltimore & Ohio side of the river, and have not been heard from since. About three hours after the rescue party had been in the mine two more explosions were heard. Meantime the crowd around the opening of the shaft had increased, the crowd numbering many mothers, wives and sisters of the men entombed. All sorts of plans have been suggested for the rescue of the men. Some talk of turning the river into the mine, but many are opposed to this for fear of drowning the miners. All that would be necessary to let the deluge of water loose in the mines would be to pull a plug which was placed in the mines after the explosion of seven years ago, and the water would rush into the mines at a rapid rate.

At 11 o'clock last night four men volunteered to go down shaft No. 3, but No. 2 and one down shaft No. 3, but to the present time nothing has been heard of them.

At 3 o'clock this morning heavy volumes of smoke are still issuing from the mine, and hope of saving any of the entombed men, miners or rescuers, is fast disappearing.

The Port Royal mines are situated on the Youngboughen river, 37 miles from Pittsburg. They are owned by the Pittsburg Coal Company.
District Superintendent McCune, who is reported killed at the head of a brave band of volunteers, was one of the most experienced and best known miners in Eastern Pennsylvania.

The Port Royal mines are located in the thick vein coal belt, and are for that reason extremely gaseous and dangerous. The state mining officials have made their management the object of repeated caution.

Seven years ago the mines caught fire from a similar explosion. The mine boss was killed but the others in the pit escaped.

IN NUEVA ECINJA.
Provincial Government Has Been Established at San Isidro.

Manila, June 12.—The Philippine commission returned to Manila today from the province of Nueva Ecija, Luzon, having organized provincial government at San Isidro, capital of the province.

General Taft told the people that if no power were given to levy customs, the expenses of the central government would be paid by additional internal taxes. He pointed out also that if the decision of the authorities at Washington should result in free trade with the United States, opening up such a great market, the increase in land values would enable the people to respond to the increased internal taxes. The northern tour has been postponed.

The American astronomical commission has returned from Sumatra, and will sail shortly for home.
Lieutenant Wray's command has had six engagements with the insurgents in the province of Sorsogon, Luzon, killing six. Twenty-three insurgents were captured at Atimon, province of Tabayas. Several minor captures are reported from other parts of Southern Luzon, where the insurgents are still active.

The report circulated in the United States that General Cailles has surrendered is unfounded.

Immigration at Manila.
Washington, June 11.—The total number of immigrants arriving at Manila from July to November, 1900, was 6,302, of whom 507 were females. Of the total number arriving, 5,560 had been
