Nood River Glacier. FRIDAY, AUGUST 16, 1901.

Hood River's crop of blackberries is Hood River's crop of blackberries is light this year and will fall short a only, will be controlled by intelligent thousand or more crates of the average farmers and horticulturists, when every crop of 5,000 crates. Prices are good, officer from president down will be per-mented with the idea that 'agriculture is the noblest of all callings and that upon \$1.10 per crate. As much money can its brond base rests every useful science be made off the same area in blackber- known to man. acre in blackberries will produce 300 or corporations and not individuals transbeen gathered, and they require very fruit unions, which help to educate

Hood River Fruit Growers' Union, says he would not advise the farmers to raise blackberries extensively, but he thinks "In conclusion, 'we need an extension

which will give quality rather than organization." quantity. If Hood River fruitgrowers expect to make anything in blackberries they must ship a brand that will hold they must ship a brand that will hold the markets as does the Clark's Seedling strawberry. Hood River blackberries are crowded out of the Montana markets by the Puvallup berries for the same by the Puyallup berries for the same reason that our strawberries crowd out California and Southern berries—be, cause they are superior in quality. The cause they are superior in quality. The fruitgrowers here don't give enough at- scientific importance. tention to marketing the blackberries, Regarding his trip, Professor Reid said and they depend too much on planting a prolific variety rather than securing a variety of high quality. Last week the I have never found a more charm-Hood River Fruit Growers' Union made ing place in the mountains than Cloud a shipment of three varieties of black- Cap Inn, and I wr given every attention berries to Baker City, and the report of Coe, Ladd and Newton Clark. I did not the consignee on the condition of the get around far enough to see closely the different berries is interesting. They Sandy river and the Zigzag glaciers on were all shipped for first-class berries. The crate containing Lawton berries "was in good order and looked quite" is no doubt that the movement is connice;" the crate of Slingerland berries tinning at the present. The glack rs are "was hardly so good," and the crate of Kittitany berries "was not nearly so good." Continuing, the report stated "The cause is this? It is due to cli-

that "the two latter crates had too many red looking berries in them and were quite soft. Had they been held over un-til temarter, they been held over un-til temarter the quanti-ty of the snowfall, and the average goes til tomorrow they would have been up and down. In Europe, these change about spoiled."

River Fruit Growers' union, says that Ithough Hoad River's own of white hoad although Hood River's crop of winter apples will not be so large as last year the prices will be enough better to more than even up the returns with last year, the past. when the apple crop brought \$90,000 into the valley. The union recently received a request from a Chicago commission house for prices on a consignment of here stated that the open season for doe 50,000 or 100,000 bushels of winter ap- will commence next Thursday. The ples delivered in bulk. The demand for Hood River apples increases faster than the supply, and when the orchardists learn to thin out the fruit, give the trees the supply is the fruit of thorough cultivation and spraying, they minutes before sunrise and after one hour after sunset. will be assured of good crops each year, and will have an investment paying bet-ter dividends than most gold mines. hunt or pursue any deer, antelope or moose with dog or dogs, with intention now.
