templar in area,"" THE END. TOWN WHERE ONLY NEGROES LIVE.

SOME OF THE YOUNGER ELEMENT OF LYLES.

Lyles, Ind., is a town in which a white man does not dwell. Lyles came into existence in the ante-bellum days. More than a half century ago, Joshua Lyles, liberated slave, came to Indiana from Tennessee. He had been given his freedom by a kind master, and his first thought was to seek a home in Indiana, where the oppression of slavery was unknown. He journeyed to Princeton, the county seat of Gibson County, and with money from his old master he purchased a tract of land in the Wabash bottoms, four miles west of Princeton. Today his old farm is the site of a prosperous village, the inhabitants of which are

The Civil War came on and passed into history. When the days of war and slavery were at an end Joshua Lyles returned to sunny Tennessee and told his kinsmen of the fertility of the Wabash bottom lands. Several of the Tennessee-ans emigrated to Indiana and rented small farms along the Wabash. Corn and melons grew under their watchful eye and sunny skies.

Then came another change. The Louisville, Evansville and St. Louis Ruilroad -now the Southern-was built through the Wabash corn country. The grain buyers from Louisville and St. Louis made annual invasions of the corn country, and the negro farmers found a ready market for their crops. The railroad company built a side track on the farm of "Uncle Joshua" Lyles, and the siding was designated as "Lyles" on the company's time tables.

Next a small grocery appeared near the side track and the future town was ounded. During the succeeding years there were additions to the population of Lyles, and to-day it is a prosperous town of stores, churches, homes and corn-cribs. It claims a large lumber yard among its infant commercial resources. Great cribs filled with corn, the product of the lowland farms, line the tracks of the Southern Railrond's St. Louis division.

Corn is not king at Lyles, however. During the melon season the Southern's

trains carry car load after car load of luscious cantaloupes and watermelons from Lyies to the Eastern markets. One of the largest fruit farms in southern Indiana is near Lyles, and is the property of Harrison Ashby, an ex-slave. Ashby's apples are far famed. Postmaster "Jim" Cantrell is Lyles' leading spirit in all things. and many are the little disputes and difficulties that he settles by arbitration and

Lyles is a Northern picture of Southern types and customs. When the sun sends its good night rays along the rippling Wabash, one may wander through this quaint town and hear the folk songs of the sunny South. Lyles is a town of uncles, nunts, nephews, nieces and cousins. Everybody is related to everybody else, because all are descendants of "Uncle Joshua" Lyles and the emigrants that came after him.

WYOMING STRIKES OIL.

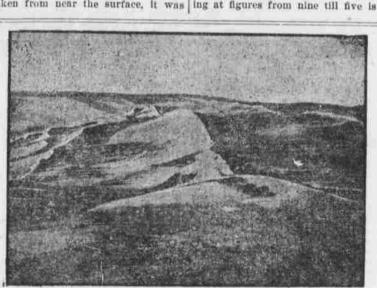

Petroleum Found in Quantities All Over State at Varying Depths.

It is claimed the trace was discovered

near the central part of the State about 1832 by Captain Bonneville and was Washington Irving as "Tar Springs."

Company recently reported finding off sands at a depth of only three feet, of a cure by a competent oculist. and again at seventeen, showing a flattering trace of oil. It is, however, the It may be of interest to those who third sands from which the best results are watching the development of the are obtained, and this formation seems Wyoming oil fields to know just how, to be generally 600 to 1,500 feet below Again, it is absurd to suppose that when and where petroleum was first the surface and is invariably just below a great strata of coal.

EYE-STRAIN HEADACHES.

A Trained Oculist Alone Should Be

Asked to Fit Glasses. Reference has been made more than once, says the Youth's Companion, to the headaches resulting from eye-strain -either overwork with practically normal eyes, or any work with imperfect Dry Goods, Groceries, eyes; but so much suffering results from the neglect or ignorance of this Boots and Shoes, fact that no apology is needed for frequent return to the subject.

The causes of headache are legionbad stomach, nasal disease, "urle-acid Flour and Feed, etc. diathesis," and other things; but it is not an exaggeration to say that eyestrain is more frequently the fault than all the other causes combined, yet it is pays no rent; it employs a clerk, but perhaps the most frequently overlook-ed, not only by the sufferers themselves, All divisiends are made with customers but also by their medical advisers, in the way of reasonable prices. Many and many a person who had been a martyr for years to periodical sick headaches, had consulted physician after physician, and had dieted, taken "headache cures," and done everything but the right thing, has finally had his eyes tested and fitted with proper glasses and then found the headaches disappear as if by a miracle.

Usually these sufferers are people who use their eyes a good deal-they are students, seamstresses, watchmakers, bookkeepers, literary workers, or merely great readers or women given to fine embroidery or lace work.

The eye-strain headache is of no spe cial type, and perhaps this is why it is so often unrecognized. It may be only an occasional dull pain in the forehead or temples, it may be a general soreess, or it may be a throbbing, racking headache which the slightest noise or a bright light makes unbearable. It may be constant, it may be irregular, or it may recur with the regularity of a malarial attack. Sometimes the pain is worse at night; sometimes the pa tient wakes with a headache, which dis- Regulator and Dalles City appears after a cup of coffee. The only characteristic of eye-strain headache is that it is persistent, and does not yield, at least permanently, to any course of dieting, medication, or hygienic living.

The only effective treatment is removal of the strain by correction of any imperfection in the eyes, and by a reform of bad eye habits, such as reading very fine print or reading in a poor light or on a railroad train.

But a word of caution is most necess sary here. The glasses must be fitted by a skilled oculist after a careful examination of the eyes, for badly fitted glasses will only make matters worse, and by leading the patient to think that the eyes are not in fault, cut off all hope

DINED IN THE KITCHEN

"When General Grant stopped at the Palmer House in Chicago on his return from his tour of the world," said described by him and in the works of rubber ball, painted in gay stripes of steward was all but stupified one noon a man who was there at the time, "the pink and gold and white. "Why do at seeing the ex-president slide in at In 1863 petroleum was collected from you always have that ball before you, the kitchen door as though escaping

"'I'm sorry to trouble you,' he said, opolis.
"If he had been one there was no taken from near the surface, it was ing at figures from nine till five is a cabbage?"

"'Why, certainly,' the steward replled; 'but shan't I send it out to you in the dining room?

''No,' he answered; 'I'll eat it right here if you'll let me sit down.' "So a place on a rough board table where the cook had been fixing the meat was cleared, and Grant drew up a stool and set to, and the way he got away with that corned beef and cabbage was a caution. When he had finished, he laid down his knife and fo k with a funny sigh of satisfaction, put one hand on the steward's shoulder

and said: "'Young men. I don't suppose you care for that at all, but if you had had to eat what I have for the past few months it would taste like a dinner for

the gods. It tastes homey!" "The ex-president had dined with everybody from the queen down, but that cabbage and corned beef doubtless reminded him of the time when he was not so well known, but probably far happier-when people in St. spoke to him and bought the wood he

Hound as Guiding Star.

A number of years ago, says a contributor to the Los Angeles Times, three prospectors were working som mining claims south of Prescott, Ariz. When they left town they had expected to return in two days, but, finding more to do than they had anticiin order to finish up. They worked as should have no trouble in following the trail after dark. The night, however, was unusually dark and they could not see the trall. Being fatigued and hungry, they were losing much valuable time rooting about to no purpose. They had a black-and-tan bound with them and the idea occurred to one of the boys to rub the phosphorus from a bunch of matches on the dog's tall. It was done accordingly, thus making a sort of pillar of fire by night. The scheme worked beautifully. The dog found no difficulty in following the \$20 p.m. trail; the men followed the phosphorized narrative of their canine guide and breakfast.

Would Rid London of Smoke. to the surface of the envelope with the A leading English chemist, Dr. Redsealing of the letter, and it is obvious wood, says that if oil were generally that any attempt to force the flap used for fuel in London the great instiwould tear the tissue, in spite of the tution known as the London fog would utmost caution, the torn tissue being absolutely disappear. The doctor says plainly seen when the envelope was that the fogs are caused by unconopened in the proper way. To detect sumed carbon suspended in the air and metropolis.

It is a pity that some of this praise In Germany only 413 out of 1,000 of the way mother used to do things, males reach the age of 50 years, while which men throw at their wives, was more than 500 out of 1,000 females never given mother when she would have most appreciated it.

Some men never give up until after they break down,
